Result of the Questionnaire for JSPS Asian Science Seminar Participants

Seminar Title

JSPS-NRF Asian Science Seminar: Seminar on How To Proceed With Research Activities in Developing Assistive Technology

Part 1

Please let us know how you evaluate this seminar so that we can improve our seminars in the future. Circle the letter from A to E that matches closest your opinion.

The letters stand for the following:

A = strongly agree	$\mathbf{B} = agree$	C = neutral	D = disagree	E = completely disagree

Org	anization of the seminar	А	В	С	D	Е	Total
1-1	The time allotted to each part of the program was appropriate	43%	46%	4%	7%	0%	100%
1-2	The lecture and laboratory components were effectively linked	50%	43%	4%	4%	0%	100%
1-3	The size of the classes was optimal	50%	32%	11%	7%	0%	100%

Lec	Lectures		В	С	D	Е	Total
1-4	Sufficient time was allocated for the lectures	50 %	39%	4%	7%	0%	100%
1-5	The lectures were useful in my research	43%	46%	4%	4%	4%	100%
1-5	(interesting, stimulating and practical)	43%	40 %	4 70	4 70	4 70	100%
1-6	The level of The lectures relative to my educational	36%	50%	14%	0%	0%	100%
1-0	background and experience was optimal	50%	50% 50%	14 70	0 70	0%	100%

Lab	Laboratory Work/Group Work		В	С	D	Е	Total
1-7	Sufficient time was allocated for the laboratory work/group work	25%	54%	18%	4%	0%	100%
1-8	The laboratory work/group work were useful in my research (interesting, stimulating and practical)	57%	14%	21%	4%	4%	100%
1-9	The level of The laboratory work/group work relative to my educational background and experience was optimal	43%	36%	14%	7%	0%	100%

Discu	Discussions		В	С	D	Е	Total
1-10	Sufficient time was allocated for the discussions	25%	61%	11%	4%	0%	100%
1-11	The discussions were useful in my research (interesting, stimulating and practical)	46%	32%	14%	7%	0%	100%

Excu	rsion (if applicable)		А	В	С	D	Е	Total
1-12	The excursion(s) was well organi	zed	38%	38%	8%	13%	4%	100%
		1-12 4% 38% 38% 38% 6 6 6 7 7% 6 7% 6 7% 6 7% 6 7% 6 7% 6						

Lectu	Lecturers		В	С	D	Е	Total
1-13	Lecturers gave equal treatment to all the participants	61%	32%	4%	4%	0%	100%
1-14	Lecturers respected the ideas, opinions and comments of the participants	71%	25%	0%	0%	4%	100%

Over	Overall		В	С	D	Е	Total
1-15	I found my participation in the seminar to be meaningful	64%	32%	0%	4%	0%	100%
1-16	I was able to create and expand working networks with other researchers by participating in the seminar	61%	36%	0%	4%	0%	100%

Part 2

Please write your comments.

 How to make a cooperate research work group. Needs finding. *Friendship with other major's people *Definitely the group discussions and works. Very nice ideat *Group discussion which is allotted at night is good for discuss each other and good for deepening friendship. *Composition of member (Related. But various background) *Lettures (not only robotics but also creative thinking) *The environment of this seminar is very good, not only the accommodation but also the seminar place. It helps us to learn more from the professors and there other students. Thank you very much. *Working with people with different background was very good. *Lectures were very appropriate. *To get the various relationship between many research area. *The field work at nursing home is good experience for us. We could find out new things about real elderly person. *Firstly, we have expanded our working network with researchers who are majoring various field as well as similar field. *Secondly, I firstly consider about what can I do for elderly people and what things does elderly people really need? *Mecting researchers who have various major. *Participants from various countries. *Fiedd work *To have co-work experience with other researchers (interdisciplinary experience) *To make, to search for the elderly market, the elderly need. *Tom the vicwpoint of collaboration between Japan and Korea, this seminar becomes the best in my life, all safs in Japan side di over works to prepare and organize the schedule, actually, we did field work to visit some nursing home. It was the one of the best experience of me to understand the common problem, the super aging society in Asia. I truly appreciate the staffs for my best honor. *Great links between people from different institutions and countries. *Lectures *Collaboration	2-1	The most successful aspect of this seminar:
 *Friendship with other major's people *Definitely the group discussions and works. Very nice idea! *Group discussion which is allotted at hight is good for discuss each other and good for deepening friendship. *Composition of member (Related. But various background) *Lectures (not only robotics but also creative thinking) *The environment of this seminar is very good, not only the accommodation but also the seminar place. It helps us to learn more from the professors and there other students. Thank you very much. *Working with people with different background was very good. *Lectures were very appropriate. *To get the various relationship between many research area. *The field work at nursing home is good experience for us. We could find out new things about real elderly person. *Firstly, we have expanded our working network with researchers who are majoring various field as well as similar field. *Secondly, I firstly consider about what can I do for elderly people and what things does elderly people really need? *Meeting researchers who have various major. *Participants from various countries. *Field work *To have co-work experience with other researchers (interdisciplinary experience) *To make, to search for the elderly market, the elderly need. *From the viewpoint of collaboration between Japan and Korea, this seminar becomes the best in my life, all staffs in Japan side did over works to prepare and organize the schedule, actually, we did field work to visit some nursing home. I was the one of the best experience of me to understand the common problem, the super aging society in Asia. I ruly appreciate the staffs for my best honor. *Collaboration of different expertise (Engineering + Gerontology + Design) *Eating arrangement *Co maet the researchers from different fields such us design, so	I	-
 *Definitely the group discussions and works. Very nice idea! *Group discussion which is allotted at night is good for discuss each other and good for deepening friendship. *Composition of member (Related But various background) *Lectures (not only robotics but also creative thinking) *The environment of this seminar is very good, not only the accommodation but also the seminar place. It helps us to learn more from the professors and there other students. Thank you very much. *Working with people with different background was very good. *Lectures were very appropriate. *To get the various relationship between many research area. *The field work at nursing home is good experience for us. And to visit care centers are very useful and help to understand elderly's needs. *Gathering many various researchers *It was great success to understand another perspective approach for elderly health life environment especially through the discussion time.	*Field w	/ork
*To make, to search for the elderly market, the elderly need. *From the viewpoint of collaboration between Japan and Korea, this seminar becomes the best in my life, all staffs in Japan side did over works to prepare and organize the schedule, actually, we did field work to visit some nursing home, It was the one of the best experience of me to understand the common problem, the super aging society in Asia. I truly appreciate the staffs for my best honor. *Great links between people from different institutions and countries. *Lectures *Collaboration of different expertise (Engineering + Gerontology + Design) *Eating arrangement *To meet the researchers from different fields such us design, social and robotics. And to visit care centers are very useful and help to understand elderly's needs. *Gathering many various researchers *It was great success to understand another perspective approach for elderly health life environment especially through the discussion time.	*To kno	w the other field especially robot technic.
*From the viewpoint of collaboration between Japan and Korea, this seminar becomes the best in my life, all staffs in Japan side did over works to prepare and organize the schedule, actually, we did field work to visit some nursing home, It was the one of the best experience of me to understand the common problem, the super aging society in Asia. I truly appreciate the staffs for my best honor. *Great links between people from different institutions and countries. *Lectures *Collaboration of different expertise (Engineering + Gerontology + Design) *Eating arrangement *To meet the researchers from different fields such us design, social and robotics. And to visit care centers are very useful and help to understand elderly's needs. *Gathering many various researchers *It was great success to understand another perspective approach for elderly health life environment especially through the discussion time.	*To have	e co-work experience with other researchers (interdisciplinary experience)
staffs in Japan side did over works to prepare and organize the schedule, actually, we did field work to visit some nursing home, It was the one of the best experience of me to understand the common problem, the super aging society in Asia. I truly appreciate the staffs for my best honor. *Great links between people from different institutions and countries. *Lectures *Collaboration of different expertise (Engineering + Gerontology + Design) *Eating arrangement *To meet the researchers from different fields such us design, social and robotics. And to visit care centers are very useful and help to understand elderly's needs. *Gathering many various researchers *It was great success to understand another perspective approach for elderly health life environment especially through the discussion time.	*To mak	te, to search for the elderly market, the elderly need.

	-	
	I	

research. Thank you very much for invitation.
*Group discussion.
*To create human network in research area.
*Facilities (Including hotel, congress room, etc)
*Expanded my horizon on the research of caring the elderly.
*Through group work, we learned how to collaborate effectively with our different personal academic
background.
*Interdisciplinary group work was great to solve problem with different point of view
*I found a new aspect for the elderly person. I think it is due to the peoples that have a variety of background
& research area.
2-2 The least successful aspect of this seminar (if possible, suggestion for importants):
*Very tight schedule.
*Not enough face time unfortunately.
*Field work was very short. I wanted to go more other places.
*The schedule of the seminar is a little tight.
*No time for having a break.
*Most engineers are majoring in robotics.
I think more various background knowledge will be helpful to participants.
*Schedule was very tight.
*Add other field such as administration, architecture.
*Give them (each group) specified sisuation.to make them solve problem in practical way.
*Absolutely, there is nothing.
*More free time for extra activities (e.g. buying souvenirs) would be welcome.
*Group work
*No free time (Not enough)
*Tight schedule.
*More organized group format (Pre-organize the group before the seminar like the Japanese team
did Korean team was spontaneous
*Insufficient group discussion time.
*It would be nicer if we could have more discussion time for the group work.
*I think we need more time for discussion.
*Creative thinking.
As a researcher, we must have responsibility to contribute our society. This seminar gives us to think about our
duty.

2-3	Other comments:
*This se	eminar is very impressive that have some interesting topics and subject of my research.
*Good	organization, appreciate all the efforts for accommodation, meals, flights, etc
*Thank	you.
*The sc	hedule of the seminar is very tough. And we could achieve fruitful results of education, research,
and rela	ationship between participants.
*Thank	you very much for me as housing & interior designer (Spatial planner) to have chance to participate
in indus	strial market for the elderly.
*This A	Asian Science Seminar is very different with others, Sincerely, I was worry about the essentials of this
kind	
of colla	boration, However, Every member was focusing on the common issues day by day.
We had	discussed about the given issues not considering the nationality, the age, and the major subject.
Even I	promised the colleague who I met first to be the leaders of future seminar.
*Field t	rip can be more organized in the future!
*Our gr	roup was supposed to visit two facilities, but we could not due to the limited number of cars.
Also, o	ur guide was not rally sure of how to guide us, and after a brief tour of the facility, she left us opt the
dining 1	room and went to take lore of other older adults.
*It was	an excellent seminar and I will look forward to next seminar.
*I need	free time after dinner, please!
*Thank	s for the great opportunity.
It would	d be more fruitful and inspiring if we could have chance to take some lab tours related to the seminar
theme.	
Thank y	you very much. It was wonderful opportunity as a researcher.

Thank you very much. It was wonderful opportunity as a researcher.
