

Purpose of the Research

The applicant shall indicate the general nature of the research and the specific purpose of the research, after succinctly summarizing it and providing an outline at the beginning, and with the existing academic literature referred to where necessary. In particular, details shall be given clearly with a focus on the following points. [Refer to the rules relating to the screening and evaluation for grants-in-aid for scientific research.]

- 1) Scientific background for the research (e.g., domestic and overseas trends related to the research and positioning of the research; how the applicant has reached the concept based on his or her achievements in earlier research work; and details of achievements of past research work where the purpose of this project is to attain a greater level of knowledge in a similar field)
- 2) What will be elucidated and to what extent will it be pursued during the research period
- 3) Scientific characteristics and expected achievements and significance of the research in the area

Purpose of the Research (Outline) * Concerning the Purpose of the Research Project, the applicant should succinctly summarize and describe in detail.

Name of the research institution		Name of the Principal Investigator	
----------------------------------	--	------------------------------------	--

Novelty and challenge of the research

Describe concretely and clearly focusing on the following points:

- 1) In what way does the current research have novel ideas and a challenging nature?
- 2) Elements which demonstrate that the current research will facilitate the development of new theories, novel ideas and will propose novel methodology, elements which demonstrate that the current research is promising in that it will yield outstanding research achievements if it succeeds, etc.

Research Plan and Method

The applicant should provide details of the research plan and the methods for achieving the objectives of the research in a clear and specific manner, after succinctly summarizing it and providing an outline at the beginning. The plan should be divided into one for FY2011 and one for FY2012. The literature should be referred to as needed and main points highlighted. Moreover, where the research plan is being implemented by a group, indicate the specific roles of the Principal Investigator and Co-Investigators (*kenkyu-buntansha*) (using figures, tables and other visual aids) In case the research plan is being implemented together with Co-Investigators (*kenkyu-buntansha*), include the necessity and rationality of the project members, and the relationship to the purpose of the research from the scientific viewpoint. In addition, in order to clearly indicate the general view of the research group, state the roles of Co-Investigators (*renkei-kenkyusha*) and Research Collaborators [overseas co-researchers, company-employed researchers not eligible to apply for the grants-in-aid for scientific research, graduate students and others (the names and the number of members may be stated)].

Research Plan and Method (Outline) * Concerning the Research Plan and Method to accomplish the Purpose of the Research, the applicant should succinctly summarize and describe in detail.

Name of the research institution

Name of the Principal Investigator

Research Plan and Methods (continued)

Challenging Exploratory Research - 5

Protection of Human Rights and Compliance with Laws and Regulations (see procedure for application)

Describe the measures and action that you will take if your research involves compliance with the related laws and regulations (e.g. research requiring the consent and the cooperation of the other party when implementing the research plan, research requiring consideration for the handling of personal information and research requiring effort regarding bioethics and safety measures).

This applies to surveys, research, experiments which require an approval procedure in an ethics committee inside and outside the research institution, such as for example questionnaire surveys in which personal information is involved, interview surveys, the use of provided samples, analysis study of human genome, recombinant DNA experiments, experiments on animals, etc.

Please indicate where this is not applicable.

Rationality and Justification of the Research Costs

The applicant should explain the rationality, necessity and grounds for calculating the research cost to be stated on the following page and thereafter, based on the scale and organization of the research given in *Research Plan and Methods*. Indicate the necessity of the cost (e.g. breakdown) if, in any fiscal year of the research project, any of the costs (equipment, travel expenses, personnel (technical assistant, labor cost, etc.), and suchlike) exceeds 90% of the entire research funding, or if there is any other predominant cost.

Name of the research institution

Name of the Principal Investigator

To be filled in and attached by the Principal Investigator

Challenging Exploratory Research - 7

Application for Research Funding, Current State of Funding and Effort

Since examiners will refer to the information stated here in the second screening (collegial screening) when they discuss whether a research project will be able to be sufficiently implemented without causing unreasonable duplication or excessive concentration of research funding. It is necessary that the applicant correctly states the budget for the proposed research project that he or she receives and uses. The applicant should take into account the following: (1) research funding under application, (2) research funding to be granted and (3) other activities at the time of application by the Principal Investigator. Distinguish between sources of research funding, if there is more than one. For the exact method for filling in the necessary data, the applicant should verify the procedures for preparing and entering the proposal for grant-in-aid for Challenging Exploratory Research.

- 1) Fill in *Effort* with a percentage of time allocation (%) necessary for the implementation of the research where the entire yearly working time is set at 100%.
- 2) State the title of the research project at the beginning of *Research Funding Applied for*.
- 3) In the case of a grant-in-aid for scientific research for “Scientific Research on Innovative Areas (Research in a proposed research area)” or “Scientific Research on Priority Areas”, the applicant should state whether it is “planned research” or “invited research”.
- 4) Include research funding to be competitively provided by the research institution to which the researcher belongs.

(1) Research Funding Applied for

Funding system, name of research funding and research period (e.g., name of the funding institution)	Title of the research project (name of the Principal Investigator)	Role (Principal Investigator or Co-Investigator (<i>kenkyu-buntan sha</i>))	Budget for FY2011 (throughout the period) (thousands of yen)	Effort (%)	Differences in details of research and reasons for additional application for a grant for the current research project <small>(In the case of a Principal Investigator (or a researcher who receives the grant for the whole program, like, for example, the Project Leader), the amount to receive for the whole research period (or for the whole program) should be entered)</small>
Research project for which a grant is applied Challenging Exploratory Research (2011-____)		Principal Investigator			
Name of the research institution				Name of the Principal Investigator	

To be filled in and attached by the Principal Investigator

Challenging Exploratory Research - 8

Application for Research Funding, Current State of Funding and Effort (continued)

(2) Research Funding to Be Provided

Funding system, name of research funding and research period (e.g., name of the funding institution)	Title of the research project (name of the Principal Investigator)	Role (Principal Investigator or Co-Investigator (<i>kenkyu-buntans ha</i>))	Budget for FY2011 (throughout the period) (thousands of yen)	Effort (%)	Differences in details of research and reasons for additional application for a grant for the current research project <small>(In the case of a Principal Investigator (or a researcher who receives the grant for the whole program, like, for example, the Project Leader), the amount to receive for the whole research period (or for the whole program) should be entered)</small>
(3) Other activities <div style="border: 1px solid black; padding: 5px; display: inline-block;"> State the effort for research and educational activities that are carried out as other work than the aforesaid research activities under application or to be funded. </div>					
Total <small>(Total of the effort in (1), (2) and (3) above)</small>				100 (%)
