Grant-in-Aid for Young Scientists A - 1
Purpose of the Research
The applicant shall indicate the general nature of the research and the specific purpose of the research, after succinctly summarizing it and providing an outline at the beginning, and with the existing academic literature referred to where necessary. In particular, details shall be given clearly with a focus on the following points. [Refer to the rules relating to the screening and evaluation for grants-in-aid for scientific research.] 1) Scientific background of the research (e.g., domestic and overseas trends related to the research and positioning of the research; how the applicant has reached the concept based on his or her achievements in past research work; and details of achievements of past research work where the purpose is to attain a greater level of sophistication) 2) What will be elucidated and to what extent will it be pursued during the research period 3) Scientific characteristics, originality and expected achievements and significance of the research in the area
Purpose of the Research (Outline) *Concerning the Purpose of the Research Project, the applicant should succinctly summarize and
describe in detail.

Investigator

Grant-in-Aid for Young Scientists A - 2 Purpose of the Research (continued)

Research	Plan	and	Metl	ahor

The applicant should provide details of the research plan and the methods for achieving the objectives of the research, after succinctly summarizing it and providing an outline at the beginning. The plan should be divided into one for FY2012 and one for FY2013. The literature should be referred to as needed. The plan and methods should indicate achievements through a discussion from multiple aspects, such as the action in the event that the research does not progress as originally planned. In addition, the following points should be highlighted.

- 1) Specific devices for implementing the research (such as ideas for effectively advancing the research and the assistance of Research Collaborators for effectively advancing the research)
- 2) Where the research is being implemented by a research team, the specific roles (using figures, tables and other visual aids) of the Principal Investigator, and if necessary, the Research Collaborators [overseas co-researchers, company-employed researchers not eligible to apply for KAKENHI, graduate students and others (names and number of members may be stated)]
- 3) If the Principal Investigator is employed in conducting other research work or if the Principal Investigator has other research work that is not an occupational task, connection with and differences from the present research

Connection between the Research Plan and the Research Project which received a Research Progress
Assessment
• If the Principal Investigator of the current application received a research progress assessment in FY2010 or in FY2011, as a Principal
Investigator of "Specially Promoted Research", "Scientific Research (S)", "Grant-in-Aid for Young Scientists (S)" or "Grant-in-Aid for
Creative Scientific Research", he or she should describe it in this section.
• The researcher should describe the connection between the research plan and the research project which received a research progress
assessment in this section (e.g. what kind of connection is there, how the researcher will advance the research which received a research
progress assessment in concrete terms, etc.).

Grant-in-Aid for Young Scientists A - 9 Brief Background Description of Research of the Applicant State the background history of research in the sequence from new to old, starting from the graduation of the final education. Clearly indicate details of the research and noteworthy matters (e.g., awards). Protection of Human Rights and Compliance with Laws and Regulations (see procedure for application) Describe the measures and action that you will take if your research involves compliance with the related laws and regulations (e.g. research requiring ,the consent and the cooperation of the other party when implementing the research plan research requiring consideration for the handling of personal information and research requiring effort regarding bioethics and safety measures). This applies to surveys, research, experiments which require an approval procedure in an ethics committee inside and outside the research institution, such as for example questionnaire surveys in which personal information is involved, interview surveys, the use of provided samples, analysis study of the human genome, recombinant DNA experiments, experiments on animals, etc. Please indicate where this is not applicable. Rationality and Justification of the Research Costs The applicant should fill in the rationality, necessity and grounds for calculating the research costs to be stated on the following page and thereafter, based on the scale and organization of the research given in Research Plan and Methods. Indicate the necessity of the cost (e.g. breakdown) if, in any fiscal year of the research project, any of the costs (equipment, travel expenses, and personnel expenditure and remuneration) exceeds 90% of the entire research funding, or if there is any other predominant cost.

Application for Research Funding, Current State of Funding and Effort

Since examiners will refer to the information stated here in the second screening (collegial screening) when they discuss whether a research project will be able to be sufficiently implemented without causing unreasonable duplication or excessive concentration of research funding. It is necessary that the applicant correctly states the budget for the proposed research project that he or she receives and uses. The applicant should take into account the following: (1) research funding under application, (2) research funding to be granted and (3) other activities at the time of application by the Principal Investigator. Distinguish between sources of research funding, if there is more than one. For the exact method for filling in the necessary data, the applicant should verify the procedures for preparing and entering the proposal for grant-in-aid for Young Scientists A/B.

- 1) Fill in Effort with a percentage of time allocation (%) necessary for the implementation of the research where the entire yearly working time is set at 100%.
- 2) State the title of the research project at the beginning of *Research Funding Applied for*.

 3) In the case of a KAKENHI for "Scientific Research on Innovative Areas (Research in a proposed research area)" or "Scientific Research on Priority Areas", the applicant should state whether it is "planned research" or "invited research".
- 4) Include research funding to be competitively provided by the research institution to which the researcher belongs.
