Procedures for Preparing and Entering a Research Proposal Document for “Fund for the Promotion of Joint International Research (International Leading Research)” (New Proposal)

Applicants for the KAKENHI should fill in this Research Proposal Document, giving details of the research project based on the Application Procedures, and submit it to the Independent Administrative Legal Entity Japan Society for the Promotion of Science (hereinafter referred to as “JSPS”) prior to the application. **This Research Proposal Document is used as a review material at the JSPS Scientific Research Grant Committee.**

The applicant should fill in the form correctly, while taking the following points into account.

When the application is adopted as a result of the review at the Scientific Research Grant Committee, a notice concerning the provisional grant decision will be issued. The applicant should submit the form of formal application for grant delivery based on the notice. The KAKENHI will be disbursed if the research plan, etc. are acknowledged as appropriate.

Items to be noted

- * **This Procedures for Preparing and Entering is to be used to prepare Research Proposal Document for “International Leading Research” as “New Application”.**
- * **When preparing the Research Proposal Document, the Principal Investigator should make the preparations with responsibility, in accordance with the rules set forth in the Application Procedures.**
- * **The Research Proposal Document for this research category consists, in the following order: “Application Information (items to be entered in the Website) (first half),” “Research Proposal Document [form S-64 (1)] (forms to be uploaded),” “Research Proposal Document [form S-64 (2)] (forms to be uploaded),” “Research Proposal Document [form S-64 (3)] (forms to be uploaded),” “Research Proposal Document [form S-64 (4)] (forms to be uploaded),” “Application Information (items to be entered in the Website) (second half),” and “Research Proposal Document [form S-64(L)] (forms to be uploaded).”**
- * **Unless specifically instructed, items to be entered in the Website must be in Japanese or English. Forms to be uploaded must be prepared in the language as directed in these Procedures.**
- * **Before submitting, be sure to check whether the contents of the Research Proposal Document converted to the PDF file are complete (missing characters, charts, garbled characters, etc.).**
- * **The review of this research category will be carried out by reviewers of the Scientific Research Grant Committee. The review (document review and panel review) will be based on the content of all the application forms, referencing the review comments and results of overseas reviews prepared by domestic and overseas researchers from the perspective of experts in the fields close to the research proposals submitted. However, if a large number of applications is received, a Preliminary Screening will be conducted based only on the “Application Information (items to be entered in the**

Website) (first half),” “Research Proposal Document [form S-64 (1)] (forms to be uploaded),” “Research Proposal Document [form S-64 (3)] (forms to be uploaded),” and “Research Proposal Document [form S-64 (L)] (forms to be uploaded).”

Overseas reviewers will conduct document review (overseas review) based on the content of “Application Information (items to be entered in the Website) (first half),” “Research Proposal Document [form S-64 (2)] (forms to be uploaded),” “Research Proposal Document [form S-64 (3)] (forms to be uploaded),” and “Research Proposal Document [form S-64 (L)] (forms to be uploaded).” Researchers in charge of the writing of the review comments who belong to domestic research institutions will prepare the review comments based on the content of all the forms.

I . Application Information (items to be entered in the Website)

“Application Information (items to be entered in the Website)” consists of **“Application Information (items to be entered in the Website) (First half)”** and **“Application Information (items to be entered in the Website) (Second half)”**.

The “Application Information (items to be entered in the Website)” are the items which the Principal Investigator directly enters after accessing the KAKENHI electronic application system (hereinafter referred to as “system”) using the ID and the password for the Cross-Ministerial Research and Development Management System (hereinafter referred to as “e-Rad”), which has been provided by his/her research institution.

Also, a part of content entered (title of proposed research project, information of project member, effort, etc.) will be provided to the e-Rad.

- * **The confirmation of the content of the application and the preparation of the review material is based on the “Application Information (items to be entered in the Website)” of Research Proposal Document, which constitutes one part of the application documents. It is possible that the information entered in the website will have an influence on the results of the review, or it is possible that the research project will not be accepted for review because of the content entered, therefore the applicant should prepare the application information with care.**

Select “application information input” of International Leading Research from the “List of Research Categories” in the electronic application system. The “Management of Research Proposal Document” screen will be displayed. Next, select “application information input” in the entered application information (“Research project information”, “Research Expenditure and Description of Each Expenditure Categories”, “The Status of Application and Acquisition of Research Grants”). The respective input screen will be displayed. On the screen of each input, click “Japanese ► English” button at the upper left of the screen to switch into English.

As for the Research Proposal Document (forms to be uploaded), following files should be uploaded into each specified area on the “Management of Research Proposal Document” screen; **the “Research Proposal Document [S-64(1)] (forms to be uploaded),” the “Research Proposal Document [S-64(2)] (forms to be uploaded),” the “Research Proposal Document [S-64(3)] (forms to be uploaded),” the “Research Proposal Document [S-64(4)] (forms to be uploaded),” and the “Research Proposal Document [S-64(L)] (forms to be uploaded)”**.

Moreover, when uploading, the file names should be as follows.

- The name of **the “Research Proposal Document [S-64(1)] (forms to be uploaded)”** should start with “abs” (or capital letters are possible).
- The name of **the “Research Proposal Document [S-64(2)] (forms to be uploaded)”** should start with “en” (or capital letters are possible).
- The name of **the “Research Proposal Document [S-64(3)] (forms to be uploaded)”** should start

with “cv” (or capital letters are possible).

- The name of **the “Research Proposal Document [S-64(4)] (forms to be uploaded)”** should start with “jp” (or capital letters are possible).
- The name of **the “Research Proposal Document [S-64(L)] (forms to be uploaded)”** should start with “loi” (or capital letters are possible).

I-1. Application Information (items to be entered in the Website) (First half)

1. Review Section (Section of Category) (This content will not be converted into PDF file.)

The applicant should select one appropriate category for which he/she wishes review from among “Humanities and Social Sciences”, “Science and Engineering” or “Biological Sciences”.

2. Firstly related to Medium-sized Section/Firstly related to Basic Section/Secondly related to Basic Section (This content will not be converted into PDF file.)

From the Grants-in-Aid for Scientific Research-KAKENHI-, Review Section Table (hereinafter referred to as “Review Section Table”) which appears in the “List” on the System, select one Medium-sized Section which is firstly related (most relevant) to your research project.

Next, select one Basic Section firstly related to the research project from the Review Section Table. Also, for Basic Section, it is possible to select optionally one more section as secondly related to Basic Section.

3. Name of the Principal Investigator

The information on Principal Investigator which has been registered in e-Rad will be automatically displayed, so he/she should verify whether his/her name is displayed correctly. If there is an error, save temporarily the input data, then contact the secretariat of his/her research institution and follow the instructions.

Moreover, in the lower column (English), the applicant should enter his/her name in alphabet, in the order family name, first name.

4. Position, Academic Unit (School, Faculty, etc.) and Research Institution of the Principal Investigator

The information on Principal Investigator which has been registered in e-Rad will be automatically displayed, so he/she should verify whether his/her name is displayed correctly. If there is an error, save temporarily the input data, then contact the secretariat of his/her research institution and follow the instructions.

Moreover, in each section (English) below, the applicant should enter the respective information in English.

5. Title of the Research Project

In the column “Title of the research Project,” the applicant should enter a title for the proposed research project. The title should express the content of the research until the end of the research period in concrete terms. (The applicant should avoid general or abstract expressions.) In giving a title to the research project, applicants should note that the entire Research Proposal Document, including the title of the research project will be reviewed and will be publicized widely in the Grants-in-Aid for Scientific Research (KAKENHI) Database (KAKEN) if the research proposal is adopted.

In the upper column (Japanese), you can enter up to 40 double-byte characters (80 bytes).

Note that double-byte characters are counted as 2 bytes and single-byte characters are counted as 1 byte.

Voiced sound symbols (*dakuten*) and semivoiced sound symbols (*handakuten*) are not counted

independently as one character, but that letters of the double-byte alphabet, numbers, symbols, etc. are all counted as 2 bytes and displayed as such. Bearing this in mind, applicants should avoid the use of chemical formulas and mathematical formulas as much as possible. (Example: “C a 2 +” entered in double-byte characters will be counted as 8 bytes, whereas “Ca2+” will be 4 bytes.)

Moreover, in the lower column (English), the applicant should enter the information in English within 200 characters (only single-byte characters). Double-byte symbols cannot be entered.

Revision on the title of the research project is not allowed in principal.

6. Research Abstract (Both in Japanese and in English. The English content will not be converted into PDF file.)

The applicant should enter the purpose of the research project, and the methods and other matters to achieve the purpose of the research in a clear manner. Please note that the review is to be conducted from diverse viewpoints by a review committee consisting of reviewers with different backgrounds.

Research abstract can be entered up to 1000 bytes, both in Japanese and in English. (Double-byte characters are counted as 2 bytes and single-byte characters are counted as 1 byte).

If you are applying in English, copy the same information you entered in the “English” column in the “Japanese” column.

7. Overseas joint researchers who prepared the Letter of Intent (This content will not be converted into PDF file.)

Enter the names of the researchers, their affiliated institutions, positions, and enter or select country or region in which the affiliated institutions are located. The number of researchers you enter here must match the number of the Letters of Intent to be submitted. There are no restrictions on the number of overseas joint researcher engagements, but only up to three researchers may prepare and submit the Letters of Intent (minimum one researcher is mandatory).

8. Research Expenditure

The contents entered in the “Research Expenditure and Description of Each Expenditure Categories” of “**Application Information (items to be entered in the Website) (Second half)**” will be automatically displayed in the “Research Expenditure” column.

Moreover, in the lower column the amount, in which \$1=¥110, is shown automatically.

9. Researchers in related research areas (This content will not be converted into PDF file.)

In the column “Researchers in related research areas”, the applicant should enter the information of researchers of which he/she thinks that they have the most thorough knowledge of the research area related to the research project, and of which he/she thinks that they are able to assess accurately the content of the research project. He/She should enter the information of researchers who belong to overseas research institutions (3 to 5 persons). (At the time, the “Name,” the “Research Institution,” and the “E-mail” are items which must be entered.)

JSPS plans to reference the overseas researchers in the related research areas entered here upon selecting

overseas reviewers.

However, researchers who are project members in the same research project for which the current application is being made and persons who fall under the points from ① to ⑤ below are excluded.

- ① Kinship or a close personal relationship that is equivalent.
- ② A close relationship in which joint research is conducted.
(For example, a person with whom the applicant has a close relationship in the implementation of a joint project, the writing of a co-authored research paper, or who is a member of a research association with the same purpose.)
- ③ A relationship in which the researcher belongs to the same research unit (a researcher who belongs to the same laboratory).
- ④ A close master and pupil relationship or a direct employment relationship.
- ⑤ An antagonistic relationship that could be considered as a relationship in which the selection of the research project or the assessment directly benefits the grader, or a competitive relationship.

Moreover, if there are researchers of which the applicant thinks that they are not appropriate as domestic or overseas persons in charge of the writing of the review comments, because they are in a competitive or antagonistic position, or because of other reasons, the applicant should enter in the respective sections “Researchers who belong to a domestic research institution and whom the applicant wishes to avoid as persons in charge of the writing of the review comments” and “Researchers who belong to an overseas research institution and whom the applicant wishes to avoid as persons in charge of the writing of the review comments” (optionally, up to three persons for each section).

10. Contact Information of the Principal Investigator (This content will not be converted into PDF file.)

In the “Contact Information of the Principal Investigator” column, enter information in case that direct contact with the Principal Investigator is required.

11. Project Members List

The research plan for International Leading Research must be carried out with the participation of Co-Investigators and/or Research Collaborators. For the definitions of “Principal Investigator,” “Co-Investigator,” and “Research Collaborator,” please refer to the Application Procedures for Grants-in-Aid for Scientific Research.

In addition, the applicant should keep in mind the following points.

(1) Project Members Input (Principal Investigator)

- In the column “Distinction,” it will be automatically displayed as “Principal Investigator”.
- In the column “Researcher Number,” “Name (Pronunciation in katakana ; Kanji etc.),” “Age (as of April 1, 2022),” and “Research Institution, Academic Unit (School, Faculty, etc.), Position” of the Principal Investigator, the information on the Principal Investigator which has been registered in

e-Rad will be automatically displayed. Principal Investigator should verify whether the information is displayed correctly.

- **In the column “Academic Degree,”** Principal Investigator should fill in his/her academic degree.
- **In the column “Role in This Project,”** the Principal Investigator should fill in, how the Principal Investigator and the Co-Investigator(s) will cooperate to carry out the research, in a way that clarifies the respective connections between the researchers, and highlighting the allotment of research tasks in the research implementation plan FY2022. Principal Investigator should also enter those information of Co-Investigator(s).
- **In the column “Research Expenditure for FY2022,”** the share of the grant to the Principal Investigator and the Co-Investigator(s) should be entered in units of thousand yen, based on the research plan. Principal Investigator should also enter those information of Co-Investigator(s).
The total amount of all the shares of the grant to each researcher should correspond to “Research Expenditure for FY2022 (Thousand Yen)” displayed in the screen. If it does not correspond, “error” will be displayed on the confirmation screen after entry.
- **In the column “Effort,”** the Principal Investigator should enter the time allocation rate (an integral number between 1 and 100), assuming that the research project for which the current application is being made would be adopted.

When determining the time allocation rate, the Principal Investigator should determine it keeping in mind the definition of “effort” by the Council for Science and Technology Policy. This definition is “the percentage of time allocation (%) necessary for the implementation of the research in question, if the entire yearly working time of the researcher is set at 100%”. Moreover, the “entire working time” does not mean time spent only on research activities, but entire actual working time, including time spent on educational activities and other activities.

Moreover, when the research project for which the current application is being made is adopted, the Principal Investigator will be requested to confirm the effort anew at that time and to perform the procedure of formal application for grant delivery. If there are any changes with the effort by that time, it is necessary to correct the effort in e-Rad before submitting formal application for grant delivery.

(2) Project Members Input (Co-Investigator)

- **Concerning the entry column for the Project Members List (Co-Investigator),** when pressing the button “Add” on the left side of the entry screen one time for each member of the project, the edit box in which the data need to be entered will be displayed.

The Principal Investigator should delete edit boxes for data entry that are not being used (when he/she entered data but finally did not use them, or when he/she did not enter data at all), by pressing the button “Delete” on the left side.

The column “Number of Project Members”, displayed on the lowermost part of the screen is displayed automatically, according to the number of edit boxes for data entry.

If the number in the column “Number of Project Members” and the total number of persons for whom data have actually been entered do not correspond, “error” will be displayed on the confirmation screen. Therefore, the applicant should delete unused edit boxes or the edit boxes in which no data has

been entered.

- In the column “Distinction,” it will be automatically displayed as “Co-I(s)”.
- In the column “Researcher Number,” “Name (Pronunciation in katakana ; Kanji, etc.),” “Age (as of April 1, 2022),” and “Research Institution, Academic Unit (School, Faculty, etc.), Position” of the Co-Investigator, enter the researcher number of the Co-Investigator and click [Search] button, his/her information will be displayed, then click [OK] button.
Since the Co-Investigator may belong to more than one research institution, ask the Co-Investigator at first to confirm which affiliation he/she wishes to list for the application.
- In the columns “Academic Degree” and “Effort”, the contents which the Co-Investigator entered in the consent process of Co-Investigator will be displayed.
- In the columns “Role in This Project” and “Research Expenditure for FY2022”, the Principal Investigator should enter the contents. (Please refer to the column “(1) Project Members Input (Principal Investigator)” for the entry method).

[About the Consent Process of Co-Investigator]

- The consent both from Co-Investigator him/herself and his/her research institution should be given on the electronic application system to list him/her on the project members as a Co-Investigator.
- To request other researchers to participate in the research project as Co-Investigators using the electronic application system, check the “Request” box in the “Status of Consent” column, and save the changes temporarily. In addition, make sure to contact those researchers by different means to notify them that you have requested them to become Co-Investigators.
- When the consent both from Co-Investigator him/herself and his/her research institution have been given, the “Status of Consent” will be changed to “Obtained the consent from the Co-Investigator” and “Obtained the consent from the institution”.
- The applicant cannot request the researcher to become a Co-Investigator whose status of consent is “Dissented by the Co-Investigator” or “Dissented by the Institution”. Press [Delete] button on the left hand side of that column and delete the frame into which the data is being entered.
- When the applicant requests the researchers to become a Co-Investigator, **his/her official request should be made based on the high probability in obtaining the consent from the Co-Investigator-to-be after surely confirming the following items with the researchers.**
 - ① For this research project, the Co-Investigator has to bear responsibility for the implementation of the research project in cooperation with the Principal Investigator.
 - ② As well as the Co-Investigator understands and complies with both the KAKENHI supplementary conditions (funding conditions) and the terms stipulated in the (a), (b), and (c) below, and receives a share of KAKENHI from the Principal Investigator and use it properly.
 - (a) The Co-Investigator has to recognize that citizens have placed trust in scientific research and that the KAKENHI are funded with their tax, and he/she therefore has to use the KAKENHI in a proper and efficient way and refrain from committing research misconduct in the research.
 - (b) The Co-Investigator has to fulfil the requirement for the research ethics education coursework

either by reading a textbook such as “For the Sound Development of Science - The Attitude of a Conscientious Scientist –“ (“For the Sound Development of Science” Editorial Committee on JSPS), by taking an e-Learning course such as the “e-Learning Course on Research Ethics [eL CoRE] or “APRIN e-learning program (eAPRIN)”, or by participating in the research ethics education course conducted at his/her institution based on the “Guidelines for Responding to Misconduct in Research” (Adopted August 26, 2014 by MEXT), prior to the formal application for grant delivery (or, in case the grant has already been delivered, by the time the “application for approval of change for the Co-Investigator” is submitted by the Principal Investigator to JSPS).

- (c) The Co-Investigator has to understand thoroughly and confirm on what the researchers should consider, in conducting of their researches, from amongst the contents of both the statement “Code of Conduct for Scientists -Revised Version-” by the Science Council of Japan and the booklet “For the Sound Development of Science -The Attitude of a Conscientious Scientist-” by JSPS, by the time of the formal application for grant delivery of the concerned research project. (Or, by the time when the “application for approval of change of the Co-Investigator” is to be submitted to JSPS by the Principal Investigator, in case the official grant decision thereof has been already made.)

*** Refer to the KAKENHI (Grants-in-Aid for Scientific Research) Electronic Application System Operation Manual (URL: https://www.shinsei.jps.go.jp/kaken/topkakenhi/shinsei_ka.html) for the detailed information on the consent processes of the Co-Investigator such as operating environment, operating method, and so on.**

*** The Co-Investigator(s)-to-be who have applied for the International Leading Research should input “The Status of Application and Acquisition of Research Grants” of their own in the course of the consent process. When entering the column above, refer to “1-2 2. Application information Input (The Status of Application and Acquisition of Research Grants)” set forth in the Procedures for Preparing and Entering a Research Proposal Document.**

(3) Joint researchers other than Co-Investigators become “Research Collaborators.” Of such Research Collaborators, there are no items to be entered in the Website for those who are not overseas joint researchers, but the applicant should appropriately identify them in the relevant columns in the Research Proposal Documents (forms to be uploaded).

(4) In each column where (English) is written, the applicant should enter the respective items in English.

(5) In the “Number of Research Collaborators” column, enter the average number (planned) of Research Collaborators (PDs and DCs) that will be participating in the Japanese research team during the research period.

Application Information (items to be entered in the Website) (First half) (Screenshot)

【International Leading Research】 ③

【Project Members List (Principal Investigator and Co-Investigator)】

- Click [Add] button if you add Co-Investigator(s) (Co-I(s)).
- Note: Click [Add] on the left-hand side of the window to insert additional Project Members List fields. Click Delete on the left-hand side of each field to delete unused fields (if any field is not used or no longer required).
- Enter the researcher number of the Co-Investigator and click on the [Search] button, his/her information will be displayed, and click [OK] button. Since the Co-Investigator may belong to more than one research institution, please ask the Co-Investigator at first to confirm which affiliation he/she wishes to list for the application.
- The consent both from Co-Investigator him/herself and his/her research institution should be given on the electronic application system to list him/her on the project members as a Co-Investigator.
- To make a request for Co-Investigators, check the checkbox at "Request" in the "Status of Consent" row and save it temporarily. The researcher registered in the field is provisionally requested to participate in the research project as a Co-Investigator. Check the checkbox again to confirm that you want to request him/her to participate in the research project. (In addition, please contact him/her that you had made the Co-Investigator request on the system.)
- Once the consent by each Co-Investigator is obtained, the term "Return Back" will be displayed in the Status of Consent column of the Co-Investigator. In case pressing the [Save Temporarily] after checking the checkbox at "Return Back" in the Status of Consent column of the Co-Investigator, the status goes back to the status of "The consent from Co-Investigator has not yet been confirmed" and the Co-Investigator is able to correct the input information such as efforts again. Should the registered contents by the Co-Investigators be corrected, please make sure to check. (And also always inform the Co-Investigator that the "Return Back" has been commanded.)
- If you want to update the affiliation information of Co-Investigator, click [Search] button of Co-Investigators Researcher Number, confirm the displayed his/her information, and then click [OK] button. Note that the status of consent will be changed into "Request" when you update the affiliation information of Co-Investigator. You have to follow the process of obtaining consent from Co-Investigators once again.
- Regardless the entry of the consent from the Co-Investigator (including the research institutions to which the Co-Investigator belongs), pressing the [Delete] button enables to delete the frame for the data input. Please take note that you have to follow the same procedure from the beginning, in case you request the identical researcher to become a Co-Investigator again after the [Delete] of the frame above completed.
- You cannot register the researcher, whose status of consent is "Dissented by the Co-Investigator" or "Dissented by the Institution", as a Co-Investigator to the project members. Press [Delete] button on the left hand side of that column and delete the frame into which the data is being entered.

【When you request the researchers to become a Co-Investigator】

- When you request the researchers to become a Co-Investigator, **your official request should be based on the high probability in obtaining the consent from the Co-Investigator-to-be after surely confirming the following items with the researchers.**

① For this research project, the Co-Investigator has to bear responsibility for the implementation of the research project in cooperation with the Principal Investigator.

② As well as the Co-Investigator understand and comply with both the KAKENHI supplementary conditions (funding conditions) and the terms stipulated in the (a), (b) and (c) below, and to receive a share of KAKENHI from the Principal Investigator and use it properly.

(a) The Co-Investigator has to recognize that citizens have placed trust in scientific research and that KAKENHI are funded with their tax, and you therefore have to use KAKENHI in a proper and efficient way and refrain from committing research misconduct during my research.

(b) The Co-Investigator has to fulfil the requirement for the research ethics education coursework either by reading a textbook such as "For the Sound Development of Science - The Attitude of a Conscientious Scientist -" ("For the Sound Development of Science" Editorial Committee on JSPS), by taking an e-Learning course such as the "e-Learning Course on Research Ethics [eL CoRE]" or "APRIN e-learning program (eAPRIN)", or by participating in the research ethics education course conducted at his/her institution based on the "Guidelines for Responding to Misconduct in Research" (Adopted August 26, 2014 by the MEXT), prior to the formal application for grant delivery (or, in case the grant has already been delivered, by the time the "application for approval of change for the Co-Investigator" is submitted by the Principal Investigator to JSPS).

(c) The Co-Investigator has to understand thoroughly and confirm on what the researchers should consider, in conducting of their researches, from amongst the contents of both the statement "Code of Conduct for Scientists - Revised Version -" by the Science Council of Japan and the booklet "For the Sound Development of Science - The Attitude of a Conscientious Scientist -" by the JSPS, by the time of the formal application for grant delivery of the concerned research project. (Or, by the time when the "application for approval of change of the Co-Investigator" is to be submitted to the JSPS by the Principal Investigator, in case the official grant decision thereof has been already made.)

| Position | 特任教授 |
| Title of Research Project | XXXXXXXXXX |

| | |
|-----------------|--|
| Co-Investigator | <input type="radio"/> Consent <input type="radio"/> Dissent |
|-----------------|--|

If you consent to become a Co-Investigator, check the contents below and check the checkbox.

☐ For this research project, I consent to become a Co-Investigator who bears responsibility for the implementation of the research project in cooperation with the Principal Investigator.

☐ I have read, understand and will comply with the KAKENHI supplementary conditions (funding conditions) and the terms stipulated in the following, and pledge that I will receive my share of KAKENHI from the Principal Investigator and use it properly.

- You have to recognize that citizens have placed trust in scientific research and that KAKENHI are funded with their tax, and you therefore have to use KAKENHI in a proper and efficient way and refrain from committing research misconduct during my research.
- You have to fulfil the requirement for the research ethics education coursework either by reading a textbook such as "For the Sound Development of Science - The Attitude of a Conscientious Scientist -" ("For the Sound Development of Science" Editorial Committee on JSPS), by taking an e-Learning course such as the "e-Learning Course on Research Ethics [eL CoRE]" or "APRIN e-learning program (eAPRIN)", or by participating in the research ethics education course conducted at his/her institution based on the "Guidelines for Responding to Misconduct in Research" (Adopted August 26, 2014 by the MEXT), prior to the formal application for grant delivery (or, in case the grant has already been delivered, by the time the "application for approval of change for the Co-Investigator" is submitted by the Principal Investigator to JSPS).
- You have to understand thoroughly and confirm on what the researchers should consider, in conducting of their researches, from amongst the contents of both the statement "Code of Conduct for Scientists -Revised Version-" by the Science Council of Japan and the booklet "For the Sound Development of Science -The Attitude of a Conscientious Scientist-" by the JSPS, by the time of the formal application for grant delivery of the concerned research project. (Or, by the time when the "application for approval of change of the Co-Investigator" is to be submitted to the JSPS by the Principal Investigator, in case the official grant decision thereof has been already made.)

Application Information (items to be entered in the Website) (First half) (Screenshot)

【International Leading Research】⑥

If you consent to become a Co-Investigator, enter your "Name", the "Research Institution", the "Academic Unit" and the "Position" with the English name. And also enter your "Academic Degree" and the "Effort" of the research project in which you are supposed to participate.

| | |
|---|---|
| Name(English) | (Family Name) <input type="text"/> (First Name) <input type="text"/> |
| Research Institution(English) | <input type="text"/> |
| Academic Unit (School, Faculty, etc.)(English) | <input type="text"/> |
| Position(English) | <input type="text"/> |
| Academic Degree | * <input type="text"/> (Japanese) <input type="text"/> (English) |
| Effort(%) | * <input type="text"/> * The data of effort you enter in this column will be provided to e-Rad and shown at the time of the formal application for grant delivery when the proposed research project is adopted. You can accordingly carry out the procedure to modify your effort if necessary. |

【The Status of Application and Acquisition of Research Grants】

* Click "Add" on the left-hand side of the window to insert additional research project fields. Click "Delete" on the left-hand side of each field to delete unused fields. (if any field is not used or no longer required)

Note: PI : Principal Investigator , Co-I(s) : Co-Investigator(s)

The entries in this column will be referred to by the review committee in order to ensure that the grant status would not constitute a case of "unreasonable duplication and/or excessive concentration in the grant allocation" so that the proposed research project can be duly carried out in parallel with other projects.

List, at the time of submission of this KAKENHI application, (1) research grant application(s) in the review process and (2) Research Grant(s) Receiving and/or Adopted to be Delivered of Co-Investigator(s)(Co-I(s)). Refer to the "Procedures for Preparing and Entering Research Proposal Document (to be entered in the Website)" for the specific entry method of this form.

- For research grants other than KAKENHI, select "Others" and enter the name of the research grant and the name of the funding agency in "1. Funding System/research grant name (funding agency name)".
- In the "Effort Percentage" entry, enter the percentage of hours allocated to each research project, with the total yearly working hours set at 100%.
- If the applicant has acquired competitive research grants within his/her research institution, they should be also listed.
- If you are participating in project research conducted according to the specific purpose (mission) of your research institution, also enter the funded research grants. If the research grants funded to individuals are not clear, fill in "Distinction of the Research Contents and Reason for Submission of This KAKENHI Application in Addition to the Other Projects, and Other Relevant Information" to that effect.
- The columns for the "Research Period", the "Title of the Research Period" or the "Research Expenditure (throughout the period)" in the Research Grant Application(s) in the Review Process are not displayed until the Principal Investigator input the application information data. If you want to refer to, please make a contact with the Principal Investigator directly.

29 minutes have been passed since the screen had been displayed.

[Other notes in participating in the research]

In participating in the research, before pressing the OK button, researchers, in accordance with the rules on handling information stipulated by his/her affiliated research institution, must appropriately share with his/her research institution the information necessary to ensure the transparency of all research activities that he/she is involved in, including information on research funds, side jobs, etc., as well as information on donations etc., and information on supports other than monetary funds through the provision of facilities, equipment, and the like. In addition, if he/she plans to handle any technology that is restricted under the Foreign Exchange and Foreign Trade Act (Act No. 228 of 1949), he/she should carefully check the security export control system and determine how to handle such restricted technology and other matters in accordance with said Act and the rules etc. of his/her affiliated research institution.

I-2. Application Information (items to be entered in the Website) (Second half)

1. Application Information Input (Research Expenditure and Description of Each Expenditure Categories)

Under this research category, the research expenditure is roughly divided into the following expenditure categories depending on the intended use:

Research Funding (overseas): Expenditures that are mainly made abroad, such as research grants, etc. to be used by Japanese researchers to conduct research while staying at overseas research institutions (excluding expenditures that fall under Human Resources Development Costs).

Research Funding (domestic): Expenditures that are mainly made domestically, such as research grants, etc. to be used by Japanese researchers to conduct research in Japan (excluding expenditures that fall under Human Resources Development Costs).

Expenses for Human Resources Development:

Expenses for hiring early-career researchers, their overseas travel expenses, and other expenditures related to the development of human resources, which is one of the aims of this research category.

In this column, enter the expense item and details of each research expenditure as well as the necessity and basis of estimation for each of the expenditure categories of research grants (overseas, domestic) and expenses for human resources development in line with the Research Proposal Document (forms to be uploaded). In doing so, check the “eligible expenditures (direct expenses)” and “ineligible expenditures” described below. Also note that research proposals with research expenditures of less than 100,000 yen in any fiscal year of the research period are not eligible for the call for proposals.

Additionally, if, of the expense items, the total of the equipment costs, travel expenses, personnel costs/honoraria exceed 90% of the total research expenditure, or if either the consumable expenses or any other expense item take up a significantly large portion of the total research expenditure, use either of the columns “Description of research grants” or “Description of human resources development costs” to describe the necessity (breakdown, etc.) of such expenditures.

“Eligible expenditures (direct expenses)”

The expenditures necessary for the implementation of the research plan (including the budget necessary for summarizing the research achievements) is eligible.

“Ineligible expenditures”

The following expenditures are not included in the funding:

- ① Expenditures for buildings and other facilities (excluding the expenditure for installations which became necessary because of the introduction of goods that have been purchased by means of direct expenses)
- ② Expenditures for handling accidents or disasters that occurred during the implementation of funded

project

- ③ Personnel costs/Honoraria for the Principal Investigator or Co-Investigator(s)
- ④ Other expenditures which fall under indirect expense*

* Indirect expense is expenditures necessary for the management of the research institution and other things that arise during the implementation of the research project (corresponding with 30% of the amount of the direct expense), and is to be used by the research institution.

It is scheduled to set up indirect expense for the research categories for which a call for proposals is organized this time. However, the Principal Investigator does not need to state that indirect expense in the Research Proposal Document.

Research expenditure and usage breakdown are automatically calculated from the details of each expense. Also, for data entry fields that you do not use (if you have entered but do not use it or if you did not enter at all), delete the data entry field by pressing the “Delete” button on the left side.

Enter the amount of each column in thousand yen units rounding off fractions smaller than one thousand yen. After completing all the details of each expense, click the recalculate button.

Note the following points when entering details of each expense. However, the way to journalize each expense should be handled in accordance with such as the accounting rules of the research institutions to which the applicant belongs including but not limited to the following examples.

(1) “Equipment Costs”

When purchasing equipment in the final year of the research period, enter the particular reasons (necessity) for the purchase.

- When purchasing a large number of books and/or materials, input, to some extent, the contents of the books and/or materials to clarify what they are, such as “the books related to the Western medieval political history” (As for the books, the same way to journalize should be applied even if they were not handled as equipment.).
- In the case of machinery and equipment, simply enter a set of XXX as well as its breakdown.

(2) “Consumables Expenses” “Travel Expense” “Personnel Cost/Honoraria” and “Miscellaneous Expenses” column

- For consumables expenses, enter for each product name such as chemicals, laboratory animals, glassware, etc.
- For travel expenses of Principal Investigator, Co-Investigator(s), and Research Collaborator(s) (data collection, various investigations, meetings of research, announcement of results of research, etc.), enter the expenditures (transportation fee, accommodation fee and daily allowance), etc. for each matter.
- For personnel cost/honoraria, enter the expenditures for each matter such as honoraria, compensation, wages and salaries to Research Collaborator(s) (postdoctoral researchers, research assistants (RA), researchers belonging to overseas research institutions, and others) who engaged in organizing materials,

assisting in experiments, performing translation or proofreading, providing technical knowledge, distributing and collecting questionnaires and collecting information materials for research), and payment to temporary staff agencies. In addition, enter the status at the time of collaboration (such as project assistant professor, postdoctoral fellow, student in Doctoral course/Master's course, etc.) of the people to whom the personnel cost or honoraria to be paid if it is obvious.

(Example) Organizing materials: [breakdown: X (number of students in Doctoral courses) \times Y (number of months)]
= XXXX yen (Refer to Page 52 of the Application Procedures for Grants-in-Aid for Scientific Research.)

- For miscellaneous expenses, except for above mentioned expenditure, enter the expenditures to carry out the research (e.g. the costs for printing, photocopying, developing/printing, correspondence (stamps and phone calls), transport, renting or leasing the research facilities (only where the grant-aided project cannot be conducted in the facilities of the research institution), meetings (rental of the venue and meals (excluding alcohol)), equipment rental (e.g. computers, automobiles, experimental equipment), equipment repairs, transportation other than travel expenses, presentation of the research achievements (fees for contributing to the publications of academic societies, website creation, and preparation of pamphlets to publicize the research achievements, costs of PR activities disseminating research achievements to the general public, and other matters), experiment waste disposal cost, the cost of “buyout”, *i.e.* someone taking over a part of the duties (other than research) of the Principal Investigator or Co-Investigator(s). (Refer to Page 42 of the Application Procedures for Grants-in-Aid for Scientific Research)) item by item.

2. Application Information Input (The Status of Application and Acquisition of Research Grants)

The entries in this column will be referred to by the review committee in order to ensure that the grant status would not constitute a case of “unreasonable duplication and/or excessive concentration in the grant allocation” so that the proposed research project can be duly carried out in parallel with other projects. Therefore, it is strictly required that all the relevant information on research grants be correctly entered. Principal Investigator and Co-Investigator should input and confirm following information up to the time of current application such as (1) research grant application(s) in the review process, (2) research grant(s) receiving and/or adopted and to be delivered, and (3) other activities.

In addition, as for the information on the Co-Investigator, the contents which have been inputted by the Co-Investigator in the course of the consent process are displayed on the screen. Therefore the Principal-Investigator should confirm the contents which the Co-Investigator has inputted and fill in the column of the “total research expenditure for the whole research period” for the research project applied.

- This research project should be entered at the head of “(1) Research Grant Application(s) in the Review Process”.
- Not only KAKENHI but also other competitive research funds (including foreign ones) (*) should be entered in “(1) Research Grant Application(s) in the Review Process” and “(2) Research Grant(s) Receiving and/or Adopted and to be Delivered”.

(*) The Integrated Innovation Strategy 2020 states that “Regarding the acceptance of funds from foreign countries, we

[the Government of Japan] will make information disclosure of the situation, etc. as a requirement at the time of a research funds application.” In response, starting from the FY2021 call for proposals, it is clearly stated that applicants submitting KAKENHI grant applications must declare any foreign research funds in “The Status of Application and Acquisition of Research Grants” column in the Research Proposal Document. Enter all domestic and foreign competitive research funds as well as any research funding, including subsidies from private foundations, funds for contract research and joint research in the review process and/or adopted and to be delivered.

Note the following points about joint research, etc. with a non-disclosure agreement will be handled.

- For the time being, you can submit without entering the name of the partner institution and the amount of research expenses accepted, if it is difficult to submit due to unavoidable circumstances such as when it is difficult to submit based on the contents of the confidentiality agreement that has already been concluded, etc. And it should also be noted that when concluding a confidentiality agreement, etc. in the future, it is assumed that only necessary information may be submitted when applying for competitive research funds. Provided, if the parties to the agreement mutually agree on the scope of information to be kept confidential and reasonable grounds for such confidentiality (e.g., in case such information is materially important to corporate strategy and is deemed extremely confidential), the agreement can be formulated to prohibit the submission of such confidential information.

※ The submitted information may be shared among the funding agencies and related ministries as well as information that has not been subject to a confidentiality agreement, but even in this case, the information will be shared only with those who have confidentiality obligations.

- There is no need to enter the fundamental research grants that are allocated so that research activities, etc. can be carried out as duties within the research institution to which the researcher belongs in “(1) Research Grant Application(s) in the Review Process” or “(2) Research Grant(s) Receiving and/or Adopted and to be Delivered”. The effort of the research activities and so on that utilize such grants is included in “(3) Other Activities”. Moreover, the effort in the research project supported by a KAKENHI in which the researcher participates as Research Collaborator is included in “(3) Other Activities”.
- If the applicant is participating in project research conducted according to the specific purpose (mission) of his/her research institution, also enter the funded research grants. If the research grants funded to individuals are not clear, fill in "I: Distinction of the research contents" to that effect.
- If the applicant is a Research Fellow for Young Scientists (SPD/PD/RPD/CPD) and plan to receive a Grant-in-Aid for JSPS Fellows in FY2022, enter it in “(2) Research Grant(s) Receiving and/or Adopted and to be Delivered”. Moreover, do not enter the Grant-in-Aid that is paid monthly by JSPS (research implementation costs).

○ “Role in this Project”

Select “PI” if the role of the researcher is a Principal Investigator or select “Co-I” if the role of the researcher is a Co-Investigator.

○ “Funding Scheme, Grant Category (Funding Organization)”

In case of KAKENHI, select the research category. For cases other than KAKENHI, “Other” and enter the

name of the research grant and the name of the funding organization in the lower row.

○ “Research Period”

Enter the research period.

○ “Title of Proposed Research Project”

Enter the title of proposed research project.

○ “Name of Principal Investigator”

If the applicant selects “Co-I” in the column of Role in the Project, enter the name of the Principal Investigator (or equivalent) of the research subject.

○ “Research Expenditure for FY2022 (Research Expenditure for the whole period) (Unit: thousand yen)”

Enter the amount of direct expense of research expenditure to be received and used by him/herself in FY2022 (items under application is the applied amount) in the upper row, and at the same time enter the total amount (planned amount) to be used by him/herself during the whole period in the lower row.

If applicant select “Co-I” in the column of Role in the Project, enter the amount of allotment (planned amount) to be received and used by him/herself in FY2022 in the upper row, and at the same time enter the total amount of allotment (planned amount) to be used by him/herself during the whole period in the lower row. (Enter "0" if contributions are not distributed in the respective column.)

○ “Effort Percentage in FY2022 (%)”

Enter Effort (the allocation rate (%) of the time required for conducting activities, etc.) based on 100% of the total working hours for “(1) Research Grant Application(s) in the Review Process”, (2) Research Grant(s) Receiving and/or Adopted and to be Delivered” and “(3) Other Activities”.

The “total working hours” does not mean time spent only on research activities, but entire actual working time, including time spent on educational activities and other activities.

In addition, when conducting research by the competitive research funds, be sure to enter the effort related to the research activity. When the research project for which the current application is being made is selected, the applicant will be requested to confirm the effort anew at that time and to perform the procedure of formal application for grant delivery. If there are any changes with the effort by that time, it is necessary to correct the effort in e-Rad before submitting formal application for grant delivery.

○ “The distinctions between the research contents and the reason for submission of this KAKENHI application in addition to the other projects.

Give a clear description, focusing on the distinctions between the content of this research proposal and contents of any research grant application(s) in the review process or research grant(s) you are receiving (and/or research grant(s) adopted and to be delivered), and the reason you are submitting this application in addition to such other research grants.

Also, enter the affiliated institution and your title/position under which you will be submitting the application

or receiving grant delivery for this research project.

You must enter the affiliated institutions and titles/positions for each and all of the projects, even if they are the same as the affiliated institution and your title/position under which you are submitting this application.

If the applicant is the Principal Investigator of KAKENHI, please enter the total amount of direct expense for the whole research period including the shared amount to the Co-Investigator(s) in the section “Sum Total.”

Research Proposal Document for "Fund for the Promotion of Joint International Research (International Leading Research)" (FY 2022)

【Research Expenditure and Description of Each Expenditure Categories (Round off the fractions less than 1000 yen)】

- In this column, details of research expenditure, their necessity and the basis of their estimation should be given in connection with the "Research Proposal Document (forms to be uploaded)".
- Projects under the Fund for the Promotion of Joint International Research (International Leading Research) and other KAKENHI projects cannot pool their funding, which must be separated. This should be borne in mind when computing the funding needed to carry out a research plan for a project under the Fund.

In filling out this column, please refer to the "Procedures for Preparing and Entering Research Proposal Document (to be entered on the Website)"

Research expenditure and usage breakdowns are automatically calculated from the details of each expenses. Please click on the recalculate button when you have completed inputting details of each expenses.
Details of each research expenditure are sorted and saved in ascending order of fiscal year and item of expense when temporarily saved.

| In Total | | | | | | |
|--|---|------------------------------|----------------------|----------------|--------------------------|------------------------|
| | Research Expenditure (Thousands of Yen) | Breakdown (Thousands of Yen) | | | | |

| Sum Total | 0 | 0 | 0 | 0 | 0 | 0 |

【Details of Budget (Round off fractions smaller than 1000 yen.)】

Please note the following points when entering details of each expense.

- Regarding equipment costs, please enter the specifications and the place of installation (or the institution's name) in the section "Item".
- Regarding travel expenses, please enter the breakdown of each item, as such as transportation, lodging and per diem.
- Regarding personnel costs and honoraria, please enter the breakdown, that is, X (a number of people) × Y (a number of months), of each item.

*Please first check the rules of your affiliated research institution and accordingly calculate the expenses.
Particularly when deemed necessary in calculating travel expenses and accommodation fees, coordination should be carried out with the section in charge at your affiliated research institutions.

Research Proposal Document for "Fund for the Promotion of Joint International Research (International Leading Research)" (FY 2022)

[The Status of Application and Acquisition of Research Grants]

* Click "Add" on the left-hand side of the window to insert additional research project fields. Click "Delete" on the left-hand side of each field to delete unused fields. (if any field is not used or no longer required)

Note: PI: Principal Investigator, Co-I(s): Co-Investigator(s)

* When you add Co-Investigator(s) (Co-I(s)) at the column [Project Members List (Principal Investigator (PI) and Co-Investigator (Co-I)) on the application information input screen, the page will be added for each additional person on "The Status of Application and Acquisition of Research Grants".

* The name of Co-Investigator(s) (Co-I(s)) is displayed when you enter the name of the researcher and save it in [Project Members List (Principal Investigator (PI) and Co-Investigator (Co-I)) on the application information input screen.

* The "(1) Research Grant Application(s) in the Review Process" or the "(2) Research Grant(s) Receiving and/or Adopted to be Delivered" related to the Co-Investigator will display the contents which were registered when Co-Investigator save a consent to the participation request. The input should be completed by confirming the contents in the registration for all Co-Investigators.

The entries in this column will be referred to by the review committee in order to ensure that the grant status would not constitute a case of "unreasonable duplication and/or excessive concentration in the grant allocation" so that the proposed research project can be duly carried out in parallel with other projects.

List at the time of submission of this KAKENHI application, (1) research grant application(s) in the review process and (2) Research Grant(s) Receiving and/or Adopted to be Delivered of Principal Investigator or Co-Investigator(s) (Co-I(s)). Refer to the "Procedures for Preparing and Entering Research Proposal Document" for the specific entry method of this form.

- In the "Effort Percentage" entry, enter the percentage of hours allocated to each research project, with the total annual working hours set at 100%.
- If the applicant has acquired competitive research grants within his/her research institution, they should be also listed.
- If you are participating in project research conducted according to the specific purpose (mission) of your research institution, also enter the funded research grants. If the research grants funded to individuals are not clear, fill in "Distinction of the research contents and Reason for submission of this KAKENHI application in addition to the other projects." to that effect.

II. Research Proposal Document (forms to be uploaded)

The Research Proposal Document (forms to be uploaded) consists of five files (forms S-64 (1) through S-64 (4) and S-64 (L)). The Principal Investigator should download each of the forms from the JSPS Grants-in-Aid for Scientific Research (KAKENHI) webpage, then upload the completed forms into the Electronic Application System. You should note the following in preparing the Research Proposal Document:

- Make sure that the title of each item appears at the top of the page. Do not exceed the maximum number of pages specified for each item. As you prepare the documents in accordance with the instructions on each item, you may end up with blank pages, which is okay. In such case, do not delete those blank pages.
- Delete the Notes on the forms. Do not delete any other instructions. Also leave the text box lines.
- Out of consideration to the review process in which many research proposal applications will be reviewed, please use a font size of 11 points or larger (10 points or larger for English).
- The margin of style is set with upper 20 mm, lower 20 mm, left 25 mm, and right 25 mm. Do not change the setting margins because there is a risk of missing characters, etc. when preparing the review material.
- You cannot upload files of 10MB or larger. Prepare the documents in appropriate file size.

II -1. Research Proposal Document [Form S-64 (1)] (forms to be uploaded)

This file should be prepared either in Japanese or in English. When preparing the file, the instructions given for each column should be observed.

- * The Preliminary Screening will be conducted based only on the “Application Information (items to be entered in the Website) (first half),” this form, “Research Proposal Document [form S-64(3)] (forms to be uploaded),” and “Research Proposal Document [form S-64(L)] (forms to be uploaded).” Therefore, in this form, do not refer to information contained in forms other than those listed above. Meanwhile, this form will not be used for overseas review, so the information contained in this form should not be referenced in other forms. For example, in [Form S-64 (2)], you cannot reference any of the graphics you include in this form (and vice versa), so you should illustrate the necessary figures in each form.

II -2. Research Proposal Document [Form S-64 (2)] (forms to be uploaded)

This file should be prepared either in English. When preparing the file, the instructions given for each column should be observed.

You should take special cautions in **describing sensitive research ideas, etc. that may cause substantial disadvantage to the applicant in case such ideas, etc. were leaked.**

- * Note for the description of “Details of the applicants’ ability to conduct the research, the research environment”,
Focus on describing research activities relevant to your research plan in order to demonstrate the feasibility of the plan. Also describe the Co-Investigators, focusing on research activities relevant to their

anticipated roles.

For research achievement (research papers, publications authored, industrial property rights, invited lectures, etc.), avoid listing exhaustive information, but rather appropriately provide key achievements such as supporting literature that could explain the feasibility of your research plan. When describing your research achievements, provide sufficient information so that said achievements can be identified, e.g., the title of the paper, author names, title of the academic journal, volume and page numbers, and year of publication in case of a research paper, and bibliographic information, etc. in case of a book. Note, however, that you may cite only those research papers that have been published or accepted for publication.

If you have suspended your research activity for a certain period due to maternity and/or childcare leaves or nursing care leave, you may state so here.

* Note for the “Plan for Fostering Early-career Researchers” column,

Under this research category, it is vital that you send off early-career researchers to overseas research institutions long a term as possible and enable them to be exposed to various opportunities. As such, include plans for these initiatives as much as possible in this column. Even if it is difficult to send graduate students (doctoral students) abroad for a long term, it is still important for them to spend time abroad for as long as possible and gain various experiences, so the plans may include short- and medium-term stays and/or multiple stays as the case may be. You are also expected to utilize online means to carry out your joint international research efficiently. However, from the perspective of fostering human resources, it is essential for early-career researchers to physically go overseas and gain research experience. Therefore, to the extent possible, you should plan the research project so that the works in which early-career researchers will be involved are mainly conducted abroad.

II -3. Research Proposal Document [Form S-64 (3)] (forms to be uploaded)

This file should be prepared in English. When preparing the file, the instructions given for each column should be observed.

1.”Application Requirements that PI must meet”

This column asks you to demonstrate that the Principal Investigator is a researcher who has a record of excellent research achievements and an international research network, together with evidence (to prove that such achievements and results actually exist). Note the following when presenting evidence:

- If presenting a top 10% most highly cited international joint paper

You should determine at your discretion, whether the paper to present is eligible using commercial databases, analytical tools, etc. You should specify at your discretion which databases and other tools to use and/or your own definition of Top 10% (such as subject area, applicable year, date of search, etc.), and attach evidence (screen shot images, etc.) in the form of graphic figures to enable the reviewers to acknowledge that your paper is a top 10% international joint paper. The international co-authors of your paper do not have to be the Overseas Joint Researchers of this proposal. Note that if you fail to provide

evidence or if the definition of Top 10% is extremely arbitrary, reviewers may determine that you are not eligible.

- If presenting other evidences

If your research area does not use Top 10% international joint paper as an indicator, you should attach as evidence, achievements and results that are acknowledged in your research area to demonstrate that you are a “Japanese researcher who has a record of excellent research achievements and an international research network.” When providing information available on the web as evidence, be sure to attach screen shot images and other evidence in addition to the URL links.

You may provide multiple items of evidence instead of a top 10% international joint paper, but you must limit the volume of information within the given number of pages.

Whether each such evidence meets the eligibility criteria will be judged in the review.

2. “CURRICULUM VITAE (CV)”

The applicant should prepare this section on separate pages for each Principal Investigator and Co-Investigator (in the order mentioned in the column “Project Members List”), according to the instructions below and the instructions mentioned in the respective columns to be filled in. Add pages for the second Co-Investigator and beyond (in this case, add the page numbers in the header, e.g., pp. 3-(7) and 3-(8) for the second Co-Investigator, pp. 3-(9) and 3-(10) for the third Co-Investigator, and so on).

- (1) In the column “Research Institution, Academic Unit (School, Faculty, etc.) and Position”, the applicant should enter his/her research institution, academic unit (school, faculty, etc.) and position at the time of the preparation of the Research Proposal Document.
- (2) In “Role in this Project”, the applicant should enter concisely the roles of the researchers in the proposal.
- (3) In “Research Career and Experience”, the applicant should enter their principal research career and experience since graduation in their last school in a retroactive chronological order. When entering your research achievements, provide sufficient information so that said achievements can be identified, e.g., the title of the paper, author names, title of the academic journal, volume and page numbers, and year of publication in case of a research paper, and bibliographic information, etc. in case of a book. Note, however, that you may cite only those research papers that have been published or accepted for publication.

II-4. Research Proposal Document [Form S-64 (4)] (forms to be uploaded)

This file should be prepared either in Japanese or in English. When preparing the file, the instructions given for each column should be observed.

II-5. Research Proposal Document [Form S-64 (L)] (forms to be uploaded)

This file should be prepared in English by the overseas joint researchers in person.

When preparing the file, the instructions given for each column should be observed.

Note that the uploaded Letters of Intent will be reviewed as part of the Research Proposal Document. Therefore, as set forth in the Application Procedures ((2) Electronic Submission of the Research Proposal Document, 4 on page 33), when requesting the submission of the Letters of Intent, explain to the overseas joint researchers in advance that their names and other personal information contained in the Research Proposal Document will be used for administrative tasks of KAKENHI grants (which may include providing personal information to external contractor(s) in charge of the electronic processing and management of KAKENHI data).

* If you have several overseas joint researcher engagements, you can attach up to three sets of this form (provided, minimum one set is mandatory). When uploading two or more sets of this form, change the header of the form as follows: for the first overseas joint researcher, the header should read S-64-(L)-(1)-1, S-64-(L)-(1)-2, and so on; for the second researcher, the header should read S-64-(L)-(2)-1, S-64-(L)-(2)-2, and so on; and for the third researcher, the header should read S-64-(L)-(3)-1, S-64-(L)-(3)-2, and so on.

Summary of Research Proposal Document (no more than 4 pages)

The summary should include the contents of “Framework and Significance of the International Joint Research,” “Research Plan,” and “Plan for Fostering Early-career Researchers” in the research proposal document (FormS-64(2)).

*In this research category, preliminary screening will be conducted using only the “Research Proposal Document (Outline),” which consists of this form, S-64(3), and S-64(L) with the first half of the Research Proposal Document (items to be entered on the website). Preliminary screening will not be conducted if the number of applications is small.

Notes to observe when preparing the Research Proposal Document

*Delete this entire text box when completing this form.

Note 1:

1. In the research category “International Leading Research,” preliminary screening will be conducted using only the “Research Proposal Document (Outline)” which consists of this form, S-64(3), and S-64(L) with the first half of the Research Proposal Document (items to be entered on the website). Preliminary screening will not be conducted if the number of applications is small.

Note 2:

- 1. Read the “Procedures for Preparing and Entering a Research Proposal Document” before preparing this form.*
- 2. Complete the form using font size 10-point or larger.*
- 3. The title and instructions on the upper part of each page should be left intact.*
- 4. This form is to be written in 4 pages. Therefore, if there are any blank page(s), leave them as they are (do not delete any pages).*

【Summary (continued)】

【Summary (continued)】

【Summary (continued)】

Framework and Significance of International Joint Research (no more than 5 pages)

Please describe the framework and significance of the international joint research incorporating the following points. You may switch the order of items and/or the order of descriptions in each item if necessary.

- The level of advancement and future potential of the proposed research domain or field.
- Prospects of the project having a global impact and making a scientific contribution to the research domain or field.
- Necessity and importance for the project to have large-scale and long-term support.
- Concrete description of the participating researchers and their roles within the whole group, made up of the Japan-side research team comprising the applicants and postdocs and/or doctoral students, and the overseas research team.
- The applicants' achievements and/or experience in international collaboration.
- The superiority of the group of applicants, in particular the research capacity of the international joint researcher(s), and the significance of doing the proposed research via international collaboration.
- The state of preparation toward implementing the international joint research plan.

Notes to observe when preparing the Research Proposal Document

*Delete this entire text box when completing this form.

1. Read the "Procedures for Preparing and Entering a Research Proposal Document" when preparing this form.
2. This form is to be written in English.
3. Complete the form using font size 10-point or larger.
4. The title and instructions on the upper part of each page should be left intact.
5. This form is to be written in 12 pages. Therefore, if there are any blank page(s), leave them as they are (do not delete any pages).
6. Please bear in mind that this form is to be read by overseas reviewers as well as Japanese reviewers.

Research Plan (no more than 5 pages)

Please describe the contents of the research plan incorporating the following points. You may switch the order of items and/or the order of descriptions in each item if necessary.

- Background of the proposed research including the circumstances leading to this research proposal, global research trends related to the proposed research, and the positioning of the research within the relevant domain or field.
- Research objectives and methodologies.
- "Key research questions or issues" at the core of the research plan, and the originality and creativity of the research.
- Details of the applicants' ability to conduct the research, the research environment, and the state of preparation toward implementing the research project.

Plan for Fostering Early-career Researchers (no more than 2 pages)

Please describe the plan for fostering early-career researchers incorporating the following points.

- A concrete plan for fostering early-career researchers, including dispatch of those researchers to overseas research institutions and international exchange. List the names of the participating postdocs and doctoral students of the Japan-side team, up to about the second fiscal year of the project if they have already been specified. The status of coordination of the plan with overseas counterpart teams should also be clarified.
- Details of measures to be taken to support the self-reliance of early-career researchers.
- Other unique ideas and initiatives.

Application Requirements that PI must meet (no more than 2 pages)

Please clarify that the PI is a researcher who has a record of excellent research achievements and an international research network. Provide evidence to verify these facts.

Specifically, show that the PI has achieved and published internationally outstanding research results, providing evidence such as the number of citations that have ranked his/her coauthored international joint papers (published in and after 2016) among the world's top 10%. The PI should be the primary author of the paper who is, for example, the first author or corresponding author, depending on the research field and the guidelines of the journal(s) you mention.

Depending on the characteristics of the research area, "internationally outstanding research results" can also include the PI's experience as a representative of a large international collaboration (e.g., being a spokesperson who plays a central role in the project and is responsible for the whole operation of the project), as the author of prominent academic books (published in and after 2011) highly appraised within the international research community, and the like.

Notes to observe when preparing the Research Proposal Document

*Delete this entire text box when completing this form.

1. Read the "Procedures for Preparing and Entering a Research Proposal Document" when preparing this form.
2. This form is to be written in English.
3. Complete the form using font size 10-point or larger.
4. The title and instructions on the upper part of each page should be left intact.
5. This form is to be written in 2 pages for "Application Requirements that PI must meet," 2 pages for the PI's CV, and 2 pages for each Co-I's CV. Therefore, if there are any blank page(s), leave them as they are (do not delete any pages).
6. Please bear in mind that this form is to be read by overseas reviewers as well as Japanese reviewers.

CURRICULUM VITAE (CV) (no more than 2 pages)

| | | |
|-------|--|--|
| 1. PI | Name | |
| | Date of Birth | |
| | Research Institution, Academic Unit (School, Faculty, etc.) & Position | |
| | Academic Degree | |

2. Roles in this Project

3. Research Career and Experience

CURRICULUM VITAE (CV) (no more than 2 pages for each Co-I)

| | | |
|---------|--|--|
| 1. Co-I | Name | |
| | Date of Birth | |
| | Research Institution, Academic Unit (School, Faculty, etc.) & Position | |
| | Academic Degree | |

2. Roles in this Project

3. Research Career and Experience

Support from the Research Institution(s)

Please describe the following points in no more than 1 page.

- Specific support from the research institution(s) of the applicants for conducting the international joint research (e.g., support for overseas travel, for concluding agreements between/among research organizations, for establishing a research environment such as research space/facilities). Describe the expected positive effects that this support will have on the research project.
- Measures for feeding back experiences gained from implementing the large-scale, long-term international joint research and from fostering early-career researchers to the research institution(s).

Notes to observe when preparing the Research Proposal Document

*Delete this entire text box when completing this form.

- 1. Read the “Procedures for Preparing and Entering a Research Proposal Document” when preparing this form.*
- 2. Complete the form using font size 10-point or larger.*
- 3. The title and instructions on the upper part of each page should be left intact.*
- 4. This form is to be written in 2 pages. Therefore, if there are any blank page(s), leave them as they are (do not delete any pages).*

Issues Relevant to the Protection of Human Right and Compliance with Laws and Regulations (no more than 1 page)

If the proposed research involves such issues that require obtaining the consent and/or cooperation of third parties, consideration in handling of personal information, or actions related bioethics and/or biosafety, including the laws, regulations and guidelines in the country/region(s) where the joint international research is to be conducted, describe the measures and actions planned to be taken in responding to these issues.

This provision applies to research activities that would require approval by an internal or external ethical jury, such as research involving handling of personal information from questionnaire surveys, interviews and/or behavioral surveys, including personal histories and images, handling of donated specimens, human genome analyses, recombinant DNA, and experiments with animals.

If the activities of the proposed research do not fall under such categories, enter "N/A (not applicable)."

Letter of Intent

I hereby agree to be an “International Joint Researcher” in the following titled research project to be conducted under the “Fund for the Promotion of Joint International Research (International Leading Research)” category of the Grants-in-Aid for Scientific Research (KAKENHI), provided that the project is selected. I give my consent for this letter to be used as material in conducting the project’s application review.

Title of Research Project: _____

Name of Principal Investigator: _____

Name of Signee (International Joint Researcher): _____

Research Institution: _____

Position: _____

Signature: _____ Date: _____

Describe the following in 3 pages.

- The outline of the proposed International Joint Research, your role in it as an international collaborator, and the details of your role.
- Your motivation to participate in the proposed research project with the applicants.
- The state of preparation toward implementing the proposed joint research project, such as securing research grants or a budget, research space and/or facilities for the proposed project, your plan for receiving (dispatching) researchers from (to) the Japan side, and support available for accepted researchers (e.g. providing access to research facilities in your institution).
