- Lecture summary (講義概要): Please summarize your lecture within 200-500 words.  
In this lecture, I have talked about the country I come from, Canada, and drawn comparisons with Japan. Then, I have talked about my path to becoming a scientist. Using a timeline of my life, I have shown how my thinking has evolved over the years, leading me to Japan for a research position. I have talked about two phenomenon I find magical in physics and mathematics, with one of them being at the core of my current research. Finally, I have tried to convey the message that it's fine to not know where you will be in 10 years, so let's focus on making the best decisions for the near future.

It was a great pleasure to work with Kobori-sensei. She was very organized, the communication was clear, and she was very accommodating and welcoming on the day of the event (she drove me from the train station to school and back by herself).
