

Part1

Please let us know how you evaluate this seminar so that we can improve our seminars in the future. Circle the letter from A to E that matches closest your opinion.

The letters stand for the following:

- A = strongly agree
- B = agree
- C = neutral
- D = disagree
- E = completely disagree

	A = strongly agree	B = agree	C = neutral	D = disagree	E = completely disagree
Organization of the seminar					
-The time allotted to each part of The program was appropriate	8	12	0	2	0
-The lecture and laboratory components were effectively linked	1	12	4	2	0
-The size of the classes was optimal	10	9	2	0	0
Lectures					
-Sufficient time was allocated for the lectures	8	12	1	0	0
-The lectures were useful in my research (interesting, stimulating and practical)	6	8	6	1	0
-The level of the lectures relative to my educational background and experience was optimal	7	10	4	0	0
Laboratory Work					
-Sufficient time was allocated for the laboratory work	4	7	9	1	0
-The laboratory work were useful in my research (interesting, stimulating andpractical)	3	6	11	1	0
-The level of The laboratory work relative to my educational background and experience was optimal	3	8	9	1	0
Discussions					
-Sufficient time was allocated for the discussions	6	7	3	5	0
-The discussions were useful in my research (interesting, stimulating and practical)	5	9	5	2	0
Excursion (if applicable)					
-The excursion(s) was well organized	5	9	5	2	0
Lecturers					
-Lecturers gave equal treatment to all the participants	8	9	3	1	0
-Lecturers respected the ideas, opinions and comments of the participants	13	4	3	1	0
Overall					
-I found my participation in the seminar to be meaningful	10	9	2	0	0
-I was able to create and expand working networks with other researchers byparticipating in the semina	13	5	3	0	0

Part2**Please write your comments.****-The most successful aspect of this seminar:**

some researches are related to physical industrial

poster section and many lectures on kind of fields

Thank you preparing this useful symposium. In my opinion, this seminar gave me good chance such as understanding various research papers, making friends as well as enjoying India.

friendship, exchange knowledge

Meeting and exchanging ideas with many Indian graduate students and researchers. Mind-opening about manufacturing engineering of India (which I had no idea before). Expanding Indian culture and lifestyle.

Communicate with other Ph.D. Students.

Get more knowledge about Bombay and Indian living style. Expand working networks with other researchers.

Interesting to students from India to other countries

The sharing of diverse ideas and viewpoints through interesting lectures and useful topics for discussion.

Transportation for all the participants Volunteers contributions to the seminar

Interaction with Japanese and other Asian researchers to know about their research technologies.

Create working network.

Beautiful integration of national and international research works. Wonderful lecture series from national and international professors. Mingling of researchers.

I had good time. Meet many researchers holding my area. Especially, Dr. Dhande, Karunakaran, and team.

Lecture from experts in various fields. Expand to new ideas & technologies. Informative seminar topics discussed.

A conference sans boundaries where we got to know of the technologies of various countries. It helped us to increase our knowledge of the latest know-how of our genre of work and most importantly provide some food-for-thought, even beyond our domain of research. The environment was suitably stimulating, energising and enriching. Accommodation could have been much better.

Networking.

Good students (India)

-The least successful aspect of this seminar (if possible, suggestion for improvements):

group activity

less time is allocated for the section

preparations(hotels, foods, leisure activities)

Pay attention to my health. Present my research well.

No internet access in hotel

Difficulty in getting internet access – may be provide guest accounts in future

Overall seminar was very good and we have learned many things. Hospitality was average for Indians.

Accommodation would have been much better.

-Other comments:

None. Great experience in Mumbai/Bombay. Impressive and unforgettable.

I feel this seminar is useful and so good for understanding many things. However, I hope you have cleared display and more high temperature in seminar room due to little cold for me.

very good and eye-opening for new students who study about machining process

Air condition is very cold. Bus is not comfortable and warm.

Accommodation should have been more decent. The first day I was shocked but from the next day onwards I got used to it.

Please I request you people provide good hospitality for Indians

Thank you for this informative & useful seminar I have attended.
