

Purpose of the Research

The applicant shall indicate the general nature of the research and the specific purpose of the research, after succinctly summarizing it and providing an outline at the beginning, and with the existing academic literature referred to where necessary. In particular, details shall be given clearly with a focus on the following points. [Refer to the rules relating to the screening and evaluation for grants-in-aid for scientific research.]

- 1) Scientific background for the research (e.g., domestic and overseas trends related to the research and positioning of the research; how the applicant has reached the concept based on his or her achievements in earlier research work; and details of achievements in past research work where the purpose of this project is to attain a greater level of knowledge in a similar area)
- 2) What will be elucidated and to what extent will it be pursued during the research period
- 3) Scientific characteristics, originality and expected results and significance of the research in the area
- 4) Differences in goals if you have applied for a grant for another research project falling into Scientific Research (A) that is associated with the present research; or differences in details of the research if you have applied for a grant for another research project falling into Scientific Research (A) that is not associated with the present research

Purpose of the Research (Outline) * Concerning the Purpose of the Research Project, the applicant should succinctly summarize and describe in detail.

Name of the research institution		Name of the Principal Investigator	
----------------------------------	--	------------------------------------	--

Purpose of the Research (continued)

Research Plan and Method

The applicant should provide details of the research plan and the method for achieving the objectives of the research in a clear and specific manner, after succinctly summarizing it and providing an outline at the beginning. The plan should be divided into one for FY2010 and one for FY2011. The literature should be referred to as needed and main points should be highlighted. The plan and methods should indicate achievements through a discussion from different angles, such as action to be taken in the event that the research does not progress as originally planned. Where the research plan is being implemented by a group, indicate the specific roles of the Principal Investigator and the Co-investigator (*kenkyu-buntansha*) of the research team (using figures, tables and other visual aids) In case the research plan is being implemented together with Co-Investigators (*kenkyu-buntansha*), include the necessity and rationality of the project members, and the relationship to the purpose of the research from the scientific viewpoint. In addition, in order to clearly indicate the general view of the research team, state the roles of Co-Investigators (*renkei-kenkyusha*) and Research Collaborators [overseas co-researchers, company-employed researchers not eligible to apply for the grants-in-aid for scientific research, graduate students and others (the names and the number of members may be stated)].

Research Plan and Method (Outline) * Concerning the Research Plan and Method to accomplish the Purpose of the Research, the applicant should succinctly summarize and describe in detail.

State of Preparations for the Research Plan

The following points should be highlighted and stated in a clear and specific manner:

- 1) The current state of research environment, such as research facilities, equipment and materials that are to be used in conducting the research
- 2) The state of preparation for starting the research, such as coordination and contact with project members, in case there are Co-Investigator(s) (*kenkyu-buntansha*) (This should also be stated if appropriate in the case that there are Co-Investigators (*renkei-kenkyusha*) and/or Research Collaborators.)
- 3) How the research achievements will be disseminated to society and members of the public

Entries when Applying for a Grant for the Final Year of a Research Plan

[It is essential that this is filled in by the relevant applicants. (see procedures for application)]

The applicant should indicate the initial research plan of a continued research project having FY2010 as the final year in which the applicant participates as the Principal Investigator. The applicant should also state new findings in the research and other research achievements and reasons for the new application based on a reconstruction (e.g., the degree to which the research has been developed and a justification of the cost). (Do not include the research achievements of the continued research project stated here in *Research funding received and the achievements* on Scientific Research S - 7.)

Research Category	Screening Division	Project Number	Title of Research Project	Research Period
				From FY _____ to FY2010

Initial Research Plan and Results

Reasons for Applying

Research Funding Received and Achievements

State the achievements of funded research that is being used for planning the current research from the grants that the Principal Investigator / Co-Investigator (*kenkyu-buntansha*) has received (including grants-in-aid for scientific research, research funding provided by his or her research institution, research funding paid by any ministry/office, local public organization, research promotion corporation, private corporation and any current research funding). Classify the grants into grants-in-aid for scientific research and others. The following should be taken into account:

- 1) For each research funding, state the research category (name of the system for research funding other than grants-in-aid for scientific research), period (fiscal year), title of the research project, whether the applicant is the Principal Investigator or Co-Investigator (*kenkyu-buntansha*), eligible costs of the research. Also give a clear statement of the research achievements and interim and after-the-fact assessment results (only to be made by the funding organizations). (If there are research progress assessment results for the grant-in-aid for scientific research for FY2008 or in FY2009, they should be described in the section “Connection between the Research Plan and the Research Project which received a Research Progress Assessment” on Scientific Research S-9.)
- 2) Distinguish between grants-in-aid for scientific research from other research funding.

Name of
the research institution

Name of
the Principal Investigator

Research Funding Received and Achievements (continued)

--

Connection between the Research Plan and the Research Project which received a Research Progress Assessment

- If the Principal Investigator of the current application received a research progress assessment in FY2008 or in FY2009, as a Principal Investigator of “Specially Promoted Research”, “Scientific Research (S)”, or “Grant-in-Aid for Creative Scientific Research”, he or she should describe it in this section.
- The researcher should describe the connection between the research plan and the research project which received a research progress assessment in this section (e.g. what kind of connection is there, how the researcher will advance the research which received a research progress assessment in concrete terms, etc.).

Protection of Human Rights and Compliance with Laws and Regulations (see procedures for application.)

Describe the measures and actions that you will take if your research involves compliance with the related laws and regulations (e.g. research requiring the consent and the cooperation of the other party when implementing the research plan, research requiring consideration for the handling of personal information and research requiring efforts regarding bioethics and safety measures). This applies to surveys, research, experiments which require an approval procedure in an ethics committee inside and outside the research institution, such as for example questionnaire surveys in which personal information is involved, interview surveys, the use of samples provided by patients, analysis study of human genome, recombinant DNA experiments, experiments on animals, etc. Please indicate where this is not applicable.

Rationality and Justification of the Research Costs

The applicant should explain the rationality, necessity and grounds for calculating the research costs to be stated on the following page and thereafter, based on the scale and organization of the research given in *Research Plan and Methods*. Indicate the necessity of the cost (e.g. breakdown) if, in any fiscal year of the research project, any of the costs (equipment, travel expenses and personnel (technical assistant, labor cost, etc.) and suchlike) exceeds 90% of the entire research funding, or if there is any other predominant cost.

Proposal of the Researcher Conducting Scientific Research (S) for FY2010

Researcher	Name				Date of Birth (age)	(_ years old)
	Institution, Academic Unit, Position		Academic Degree		Field of Specialization	
Recent Research Activities						
<p>The applicant shall enter his or her key research papers/articles, books (excluding textbooks, abstracts of academic meetings and summaries of lectures), industrial property rights and invited lectures in the sequence of publication from new to old with serial numbers assigned. <u>Forthcoming research papers/articles in academic journals may be included, if they have been accepted for publication.</u></p>						
Titles of Published Research Papers/articles, Titles of Books and Other Publications						
<p>(For published research papers/articles, state the title, the names of authors, name of the journal, referee reading (or not), volume, page numbers of the first and last pages and year of publication.)(The above mentioned sequence of such items is not compulsory as long as all of the items are included.) <u>Only include some authors omitting others, if there are many authors (if any authors' names are omitted, state the number of the authors and the order on the author list for the related researchers).</u> The Principal Investigator should be marked with a double underline, Co-Investigator(s) (<i>kenkyu-buntansha</i>) with a single underline, and the Co-Investigator(s) (<i>renkei-kenkyusha</i>) with a dotted underline.</p>

To be filled in and attached to the proposal for grant-in-aid for each Principal Investigator and Co-Investigator (*kenkyu-buntansha*)

Scientific Research S-15

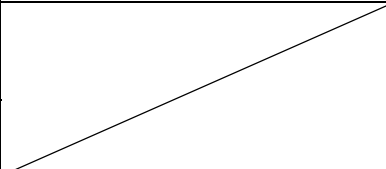

Name of researcher					
<p>Application for Research Funding, the Current State of Funding and Effort</p> <p>(Since examiners will refer to the information stated here in the collegial screening when they discuss whether a research project will be able to be sufficiently implemented without causing unreasonable duplication or excessive concentration of research funding. It is necessary that the applicant correctly states the budget for the proposed research project that he or she receives and uses. The applicant should take into account the following: (1) research funding under application, (2) research funding to be granted and (3) other activities at the time of application by the Principal Investigator. Distinguish between sources of research funding, if there is more than one. For the exact method for filling in the necessary data, the applicant should verify the procedures for preparing and entering the proposal for grant-in-aid for Scientific Research S.</p> <p>1) Fill in <i>Effort</i> with a percentage of time allocation (%) necessary for the implementation of the research where the entire yearly working time is set at 100%.</p> <p>2) State the title of the research project at the beginning of <i>Research Funding Applied for</i>.</p> <p>3) In the case of a grant-in-aid for scientific research for “Scientific Research on Innovative Areas (Research in a proposed research area)” or “Scientific Research on Priority Areas”, the applicant should state whether it is “planned research” or “invited research”.</p> <p>4) Include research funding to be competitively provided by the research institution to which the researcher belongs.</p>					
(1) Research Funding Applied for					
Funding system, name of research funding and research period (e.g., name of the funding institution)	Title of the research project (name of the Principal Investigator)	Role (Principal Investigator or Co-Investigator (<i>kenkyu-buntansha</i>))	Budget for FY2010 (throughout the period) (thousands of yen)	Effort (%)	Differences in details of research and reasons for additional application for a grant for the current research project
Research project for which a grant is applied Scientific Research (S) (2010-____)					
Name of the research institution			Name of the Principal Investigator
