Purpose of the Research
The applicant shall indicate the general nature of the research and the specific purpose of the research, after succinctly summarizing it an
providing an outline at the beginning, and with the existing academic literature referred to where necessary. In particular, details shall be give
clearly with a focus on the following points. [Refer to the rules relating to the screening and evaluation for grants-in-aid for scientific research.
1) Scientific background for the research (e.g., domestic and overseas trends related to the research and positioning of the research; how th
applicant has reached the concept based on his or her achievements in earlier research work; and details of achievements of past research
work where the purpose of this project is to attain a greater level of knowledge in a similar area)

2) What will be elucidated and to what extent will it be pursued during the research period

Purpose of the Research (continued)	

Research Plan and Method

The applicant should provide details of the research plan and the methods for achieving the objectives of the research in a clear and specific manner, after succinctly summarizing it and providing an outline at the beginning. The plan should be divided into one for FY2010 and one for FY2011. The literature should be referred to as needed and main points focused on. The plan and methods should indicate achievements through a discussion from different angles, such as the action in the event that the research does not progress as originally planned. Where the research plan is being implemented by a group, indicate the specific roles of the Principal Investigator and Co-Investigator (kenkyu-buntansha) of the research team (using figures, tables and other visual aids) In case the research plan is being implemented together with Co-Investigators (kenkyu-buntansha), include the necessity and rationality of the research group, and the relationship to the purpose of the research from the scientific viewpoint.

In addition, in order to clearly indicate the general view of the research team, state the roles of Co-Investigators (*kenkyu-buntansha*) and Research Collaborators [overseas co-researchers, company-employed researchers not eligible to apply for the grants-in-aid for scientific research, graduate students and others (the names and the number of members may be stated)].

Research Plan and Method (Outline) *Concerning the Research Plan and Method to accomplish the Purpose of the Research, the applicant should succinctly summarize and describe in detail.

Recent Research Activities

The applicant should fill in the important research papers/articles, books, industrial property rights and invited lectures relating to the research in the sequence of publication from new to old with serial numbers assigned. Lines should be drawn between groups of research papers and others published in the same calendar year to separate them. Forthcoming research papers/articles in academic journals may be included, only if they have been accepted for publication.

Moreover, if the need arises, it is also possible to fill in the recent research activities of the Co-Investigators (*renkei-kenkyusha*). If the recent research activities are filled in, double lines should be drawn to distinguish between them. (The double lines can be moved.) They should be filled in per researcher in the sequence of publication from new to old. (It is not necessary to draw lines between every year.)

Research Funding Received and Achievements
State the achievements of funded research that is being effectively used for planning the current research from the grants that the Principal
Investigator/Co-Investigator (kenkyu-buntansha) has received (including grants-in-aid for scientific research, research funding provided by his
or her research institution, research funding paid by any ministry/office, local public organization, research promotion corporation, private
corporation and any current research funding). Classify the grants into grants-in-aid for scientific research and others. The following should be
taken into consideration:
1) For each research funding, state the research category (name of the system for research funding other than grants-in-aid for scientific research), period (fiscal year), title of the research project, whether the applicant is the Principal Investigator or Co-Investigator
(kenkyu-buntansha) eligible costs of the research. Also give a clear statement of the research achievements and interim and after-the-fact
assessment results (only to be made by the funding organizations). (If there are research progress assessment results for the grant-in-aid for
scientific research for FY2008 or in FY2009, they should be described in the section "Connection between the Research Plan and the
Research Project which received a Research Progress Assessment" on Scientific Research A/B (General) -11.)
2) Distinguish between grants-in-aid for scientific research from other research funding.

Application for Research Funding, Current State of Funding and Effort

Since examiners will refer to the information stated here in the second screening (collegial screening) when they discuss whether a research project will be able to be sufficiently implemented without causing unreasonable duplication or excessive concentration of research funding. It is necessary that the applicant correctly states the budget for the proposed research project that he or she receives and uses. The applicant should take into account the following: (1) research funding under application, (2) research funding to be granted and (3) other activities at the time of application by the Principal Investigator. Distinguish between sources of research funding, if there is more than one. For the exact method for filling in the necessary data, the applicant should verify the procedures for preparing and entering the proposal for grant-in-aid for Scientific Research A/B (General).

- 1) Fill in *Effort* with a percentage of time allocation (%) necessary for the implementation of the research where the entire yearly working time is set at 100%.
- 2) State the title of the research project at the beginning of *Research funding applied for*.
- 3) In the case of a grant-in-aid for scientific research for "Scientific Research on Innovative Areas (Research in a proposed research area)" or "Scientific Research on Priority Areas", the applicant should state whether it is "planned research" or "invited research".
- 4) Include research funding to be competitively provided by the research institution to which the researcher belongs.

(1) Research funding applied for Funding system, name of Title of the research project Role (Principal FY2010 Effort Differences in details of research and
