

Application Procedures for Grants-in-Aid for Scientific Research-KAKENHI-

FY2014

Specially Promoted Research,
Scientific Research (S/A/B/C),
Challenging Exploratory Research,
and
Grant-in-Aid for Young Scientists (A/B)

September 1, 2013

Japan Society for the Promotion of Science (http://www.jsps.go.jp/)

Introduction

The current round of call for proposals lists the necessary procedures and other matters for the Details of the Call for Proposals or Application of the Grants-in-Aid for Scientific Research-KAKENHI- for FY2014 "Specially Promoted Research, Scientific Research (S/A/B/C), Challenging Exploratory Research, Grant-in-Aid for Young Scientists (A/B)"

It consists of:

- I Outline of the Grants-in-Aid for Scientific Research
- **■** Details of the Call for Proposals
- **III** Instructions & Procedures for those Intending to Apply
- IV Instructions & Procedures for those Who Have Already Been Accepted
- V Instructions & Procedures for Staff of the Research Institution

Among these, are listed in the "I Details of the Call for Proposals": Eligible Candidates for the Research Categories for which a Call for Proposals is Organized; Total budget provided and Research period and other matters; and Schedule from Application to Receipt of Funding and other issues.

In addition, in "III Instructions & Procedures for those Intending to Apply", "IV Instructions & Procedures for those Who Have Already Been Accepted" and "V Instructions & Procedures for Staff of the Research Institution" are listed: "Conditions for Applying", "Necessary Procedures", and other matters, for those who are eligible to apply. Individuals to whom it may concern are requested to make sure that they verify the relevant parts of the text.

The current round of call for proposals opens before the finalization of the budget for FY2014 in order to enable researchers to proceed with their preparations for the screening early, so that they can start their research as soon as possible.

Therefore, please be aware in advance that, depending on the situation regarding the overall budget, details like resources to be allocated and other matters may be subject to change at a later stage.

- .

Moreover, the major changes for FY2014 are as follows.

<The major changes for FY2014>

①"Generative Research Fields" has been newly established as a screening division for Scientific Research (B) and Scientific Research (C).

"Generative Research Fields" is a screening division that is newly and separately established from the "List of Categories, Areas, Disciplines and Research Fields" (included in the Attached Tables), which is the classification table of the desired areas for screening.

Important areas that have been left unexplored, areas that arise due to the rapid progress of technology, and areas that are expected to emerge from cross-sectoral research are eligible. Based on the demands of the scientific community, the newest scientific trends, and other matters, the Research Center for Science Systems of JSPS proposes candidate areas. These areas are established in the Research Grant Screening Section of the Section Meeting for Science of the Academic Deliberation Council for Science and Technology of the Ministry of Education, Culture, Sports, Science and Technology (MEXT).

In the call for proposals of FY2014, the following three areas have been established.

- Neo-Gerontology
- Mathematical Sciences in Search of New Cooperation
- · Food Cycle Research

② The "List of Categories, Areas, Disciplines and Research Fields" has been partially revised.

As a result of deliberation in the Research Grant Screening Section of the Section Meeting for Science of the Academic Deliberation Council for Science and Technology of the Ministry of Education, Culture, Sports, Science and Technology (MEXT), the list has been revised as follows.

- .

- 1) The "Integrated Humanities and Social Sciences" Area
- The discipline "Tourism Studies", research field "Tourism Studies" has been added.
- 2) The "Medicine, Dentistry, and Pharmacy" Area
- The discipline "Boundary Medicine", research field "Medical Physics and Radiation Technology" has been added.
- * Besides the addition of the above-mentioned research fields, a revision of keywords and a division based on keywords have been carried out.

③The restrictions regarding application for KAKENHI by JSPS Fellows (SPD, PD, or RPD) have been relaxed.

JSPS Research Fellows (SPD, PD, or RPD) cannot apply for KAKENHI research categories other than Grant-in-Aid for JSPS Fellows. However, this issue has been discussed in the KAKENHI Section of the Section Meeting for Science of the Academic Deliberation Council for Science and Technology of the Ministry of Education, Culture, Sports, Science and Technology (MEXT). In the case where JSPS Research Fellows (SPD, PD, or RPD) have become eligible in their host research institution, it is possible for them to apply for the research categories listed below from FY2014 on.

- Publicly invited research of Scientific Research on Innovative Areas (Research in a proposed research area)
- Scientific Research (B/C)
- Challenging Exploratory Research
- Grant-in-Aid for Young Scientists (A/B)

I. Outline of the Grants-in-Aid for Scientific Research KAKENHI

1. Purpose and Character of Grants-in-Aid for Scientific Research - KAKENHI

Grants-in-Aid for Scientific Research are competitive funds that are intended to significantly develop all scientific research (research based on the free ideas of the researcher), from basic to applied research in all fields, ranging from the humanities and the social sciences to the natural sciences. The grants provide financial support for creative and pioneering research projects that will become the foundation of social development. The research projects are selected using a peer-review screening process (screening by multiple researchers whose field of specialization is close to that of the applicant).

The position of "KAKENHI" in the policy on the promotion of science, technology and scientific research in Japan

2. Research Categories

Depending on the content and the scale of the research, different research categories have been established.

Research categories, etc.	Purposes and description of the research category	
Grants-in-Aid for Scientific Research		
Grant-in-Aid for Specially Promoted Research	Highly regarded research in the international arena that is likely to yield highly acclaimed research achievements and is done by one researcher or by a relatively small group of researchers. (The period is three to five years. As a general indicator, the upper limit of the total budget provided is set around 500 million yen per research project. However, no upper and lower limits have been established.)	
Scientific Research on Innovative Areas	(Research in a proposed research area) New research areas that will lead to the upgrading and enhancement of scientific research in Japan. The new research areas are proposed by one researcher or by a group of researchers, and will develop through the effort to cultivate collective research, research personnel, etc. (The period is five years. In principle, the budget is set at around 10 million to 300 million yen per fiscal year per field.)	
Scientific Research	(S) Creative/pioneering research done by one researcher or a relatively small group of researchers (The period is five years. The budget ranges from 50 million yen to around 200 million yen per project.) (A)(B)(C) Creative/pioneering research done by one researcher or jointly by multiple researchers (The period is three to five years.) (A) From 20 million to 50 million yen (Classified in A, B or C, depending on the total budget provided) (B) From 5 million yen to 20 million yen ★(C) 5 million yen or less	
Challenging Exploratory Research	Early-stage research that has a research plan organized by one or multiple researchers, that is based on a unique concept, that is challenging, and that sets a high goal (The period is one to three years. The budget is up to 5 million yen per project.)	
Grant-in-Aid for Young Scientists	(S) Research done by one researcher aged 42 or less (The period is five years. The budget ranges roughly from 30 million yen to 100 million yen per project.) (A)(B) Research done by one researcher aged 39 or less (The period is two to four years. Classified in A or B, depending on the total budget provided.) ⊚(A) from 5 million yen to 30 million yen ★(B) 5 million yen or less	
Grant-in-Aid for Research Activity Start-up	Research done by one researcher who has just been employed by the research institution, by one researcher who returns from childcare leave or other kinds of leave, or other researchers. (The period is up to two years. The budget is up to 1.5 million per fiscal year.)	
Encouragement of Scientists	Research done by one person who is an employee of an educational/research institution, a company employee, or others (The period is up to one year. The budget is up to 1 million yen per project.)	
Grant-in-Aid for Special Purposes	Funding of urgent and important research projects.	
Grant-in-Aid for Publication of Scientific Research Results		
Publication of Research Results	Funding for publication or international dissemination of research achievements of a scientific society with high academic value	

	Enhancement of International Dissemination of Information	Funding of an effort to further enhance international dissemination of information, in order for academic societies, such as scientific associations, to contribute to international academic exchange.
	Scientific Periodicals	Funding of academic journals that are periodically published by a scientific society, an association constituting a cooperative framework of a number of scientific societies, or other bodies, in order to contribute to international academic exchange
Scientific Literature Funding of Scientific Literature issued by an individual or a group of resear achievements		Funding of Scientific Literature issued by an individual or a group of researchers to disclose scientific research achievements
	Databases	Funding of databases created by an individual or a group of researchers for public availability
1	ant-in-Aid for JSPS llows	Funding of research done by JSPS Fellows, including Foreign JSPS Fellows (for a period of up to three years)

* As of September 2013

*No new invitation for applications is conducted for "Grant-in-Aid for Young Scientists (S)" and "Scientific Periodicals".

% Among the research categories marked with the sign ★ (Scientific Research (C), Challenging Exploratory Research and Grant-in-Aid for Young Scientists (B)), research projects that are newly adopted in from FY2011 onward (hereinafter called "KAKENHI (Multi-year Fund)") or later will be implemented using KAKENHI (Multi-year Fund).

X Among the research categories marked with the sign ⊚ (Scientific Research (B) and Grant-in-Aid for Young Scientists (A)), a part of the research projects that are from FY2012 onward (hereinafter called "KAKENHI (Partial Multi-year Fund)") will be implemented using KAKENHI (Multi-year Fund) (up to 5 million yen out of the total research budget).

* For Specially Promoted Research, a Grants-in-Aid for Scientific Research based on Acts Incurring Liabilities on the Treasury will be granted.

3. The Relationship between MEXT and JSPS

The Ministry of Education (currently, the Ministry of Education, Culture, Sports, Science and Technology) publicly recruited, screened applications and delivered grants in all of the research categories up to FY1998. From FY1999 on, these tasks were transferred to the Japan Society for the Promotion of Science (JSPS). In FY2013, the delivery of grants for "Scientific Research on Innovative Areas" and the call for proposals, the screening and delivery of grants for "Grant-in-Aid for Publication of Scientific Research Results (Publication of Research Results (B/C))" have been transferred. The call for proposals, screening and funding are currently being conducted as indicated below.

Research category	Call for proposals, screening	Delivery of grants
	Main body in the preparation of the procedures for lodging applications and the location where the applications should be submitted.	Main body handling informal decisions to grant the funding, and notices of the decision, and the location where the application forms for grants and the various other necessary documents should be submitted
Grant-in-Aid for Special Purposes	MEXT	MEXT
Scientific Research on Innovative Areas	MEXT	JSPS
Specially Promoted Research, Scientific Research, Challenging Exploratory Research, Grant-in-Aid for Young Scientists, Grant-in-Aid for Research Activity Start-up, Encouragement of Scientists, Grant-in-Aid for Publication of Scientific Research Results, Grant-in-Aid for JSPS Fellows	JSPS	JSPS

❖ As of September 2013

4. Rules Relating to KAKENHI

<u>KAKENHI</u> (Series of Single-year Grants) are governed by the Law on Optimizing Implementation of Budgets Relating to Subsidies (Law No. 179, 1955), Procedures on the Handling of Grants-in-Aid for Scientific Research (Announcement of the MEXT), Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research (KAKENHI (Series of Single-year Grants)) (Regulations No. 17, 2003), and Others.

<u>The KAKENHI (Multi-year Fund)</u> are governed by the "Basic Policy on the Management of the KAKENHI (Multi-year Fund)", Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research (KAKENHI (Multi-year Fund)) (Rule No. 19, 2011) and others.

<u>The KAKENHI (Partial Multi-year Fund)</u> are governed by the Law on Optimizing Implementation of Budgets Relating to Subsidies (Law No. 179, 1955), Procedures on the Handling of Grants-in-Aid for Scientific Research (Announcement of the MEXT), the "Basic Policy on the Management of the KAKENHI (Multi-year Fund)", Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research (KAKENHI (Series of Single-year Grants)) (Regulations No. 17, 2003), Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research (KAKENHI (Multi-year Fund)) (Rule No. 19, 2011) and others.

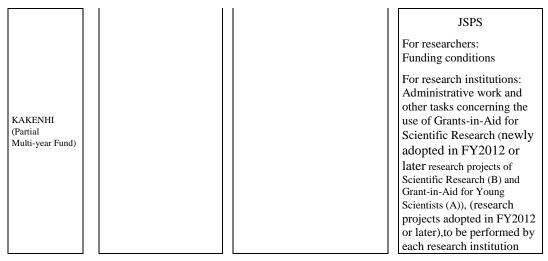

(1) Three types of rules for KAKENHI

There are three types of rules for KAKENHI, as follows:

- 1) Application rules: rules concerning the applications
- 2) Assessment rules: rules concerning the preliminary assessment (screening), the interim assessment, the ex-post assessment, and the research project progress assessment
- 3) Utilization rules: rules concerning the use of KAKENHI

Moreover, these three sets of rules apply as follows.

	Application rules	Assessment rules	Utilization rules
KAKENHI (Series of Single-year Grants)	MEXT Procedures on the call for proposals	MEXT Rules concerning the assessment for Grants-in-Aid for Scientific Research Screening Outline for Grants-in-Aid for Scientific Research, category "Scientific Research on Innovative Areas" Assessment Outline for Grants-in-Aid for Scientific Research, category "Scientific Research, category "Scientific Research on Innovative Areas"	MEXT For researchers: Supplementary conditions For research institutions: Administrative work and other tasks concerning the use of Grants-in-Aid for Scientific Research (KAKENHI (Series of Single-year Grants)), to be performed by each research institution
KAKENHI (Series of Single-year Grants)	JSPS Procedures on the call for proposals	JSPS Rules concerning the screening and assessment for Grants-in-Aid for Scientific Research **The screening and assessment rules for FY2014 are scheduled to be made public in early October.	JSPS For researchers: Supplementary conditions For research institutions: Administrative work and other tasks concerning the use of Grants-in-Aid for Scientific Research (KAKENHI (Series of Single-year Grants)), to be performed by each research institution
KAKENHI (Multi-year Fund)			JSPS For researchers: Funding conditions For research institutions: Administrative work and other tasks concerning the use of Grants-in-Aid for Scientific Research (KA KENHI (Multi-year Fund)), to be performed by each research institution

❖ As of September 2013

(2) Appropriate use of KAKENHI

KAKENHI are funded by the tax of citizens and other sources. Researchers receiving KAKENHI have a duty to comply with the related laws, regulations and utilization rules by researchers (subsidiary conditions or funding conditions), and also to use such grants appropriately. To ensure recipients comply with this requirement, we check whether no inappropriate use of KAKENHI will be made, when an application is made. (See note below.)

To facilitate the appropriate use of KAKENHI, research institutions to which the researchers belong are responsible for the management of the KAKENHI. The Administrative work that each research institution is required to carry out (rules for use for institutions) is determined.

Among other things, the research institution has the duty to secure the appropriate use of KAKENHI, for example, by setting up a system for the management and audit of the budget, and, for the expenditure of expenses for goods, by properly implementing inspections of delivered goods. In order to prevent fraudulent accounting through fictitious business transactions (so-called "azukekin"), it is important, in addition to appropriate inspection of delivered goods, to widely inform traders about the rules and to obtain the understanding and cooperation of traders in the prevention of this kind of fraudulent accounting. Researchers need to strictly respond to traders who have been involved in fraudulent accounting through fictitious business transactions, for example by stopping doing business with such traders.

Researchers and persons in charge in the research institution should fully understand prior to the application that these rules will apply after the application is approved.

(3) Important points on the use of KAKENHI

For KAKENHI (Series of Single-year Grants) a package plan throughout the research period should

be prepared and submitted upon application. However, after the research project is adopted, it will be handled as a project which is funded for each fiscal year during the research period in question. For example, KAKENHI (Series of Single-year Grants) cannot be used to pay costs in a fiscal year which falls outside the fiscal year(s) in which the funded project should be carried out.

Furthermore, for "Specially Promoted Research", KAKENHI (Series of Single-year Grants) based on "Acts Incurring Liabilities on the Treasury" will be funded. Since the decision to grant the funding over multiple fiscal years will be made, part of the handling will be different.

Moreover, when it can be expected that the funded project will remain unfinished within the fiscal year, due to reasons beyond the control of the applicant(s), which could not be foreseen at the time it was decided to grant the funding, the costs in question can be carried over to the next fiscal year, provided that the Minister of Education, Culture, Sports, Science and Technology (MEXT) submits a request for approval for the carry-over to the Finance Minister through JSPS, and the approval from the Finance Minister is obtained.

<u>For KAKENHI (Multi-year Fund)</u>, the research activity after the adoption of the grant will be handled as a single funded project throughout the whole research period. Therefore, it is possible to use the grant for paying costs in a fiscal year that is different from the fiscal year of receipt of the grant, if this happens within the research period.

Moreover, if within the research period an amount of money remains unused by the end of each fiscal year, except for the final fiscal year, costs can be carried over to the next fiscal year, without researchers having to go through prior authorization procedures. In addition, if an amount of money remains unused by the end of the final fiscal year, costs can be carried over to the next fiscal year, by obtaining prior approval for extension of the research period.

<u>For KAKENHI (Partial Multi-year Fund)</u>, a package plan throughout the research period should be prepared and submitted upon application. However, after the research project is adopted, the period of the funded project consists of one single fiscal year for non-fund based grants, and multiple fiscal years for fund based grants. Based on this, researchers should appropriately conduct their funded project. Moreover, basically non-fund based grants follow the handling of KAKENHI (Series of Single-year Grants), and fund based grants follow the handling of KAKENHI (Multi-year Fund).

- (4) The handling of a case in which the report on the research achievements has not been submitted
 - 1) The report on the research achievements plays the important role of making the achievements of the research funded with a KAKENHI widely known to the citizens. It is an important tool in order to widely return the achievements of the research funded with a KAKENHI, which in

turn has the tax of citizens and other sources as its resources, to society.

Therefore, researchers should submit the report on the research achievements at the end of the research. The content of the research will be widely disclosed to the public via Database (KAKEN) of the National Institute of Informatics and other tools. Moreover, the research institution to which the researchers belong has to collect and submit the reports on the research achievements.

2) No funding of KAKENHI will be conducted for researchers who do not submit the report on the research achievements at the end of the research, without any reason. Moreover, it may happen that the decision to KAKENHI to the researcher in question is cancelled, or that an order to return the grant is issued. It may also happen that information, such as the name of the research institution to which the researcher in question belongs and other data, is made public.

Furthermore, if researchers have failed, without good reason, to submit the scheduled report on the research achievements, then implementation of other KAKENHI due to be implemented in the same fiscal year will be suspended. Therefore, it is the responsibility of the representative of the research institution to ensure that the report on the research achievements is submitted without fail.

(5) Treatment in case of infringement of related laws

When a research project has been implemented, by violating related laws, guidelines, etc., for example when the content which is entered in the application documents is false, it is possible that the provision of KAKENHI is not carried out or cancelled.

(Note) Examples of recent fraudulent use, fraudulent receiving of grants or fraudulent acts committed during the research.

O Fraudulent use

- Someone instructed a trader to complete a fictitious transaction, pretended to have purchased consumables, had KAKENHI expended by the university, and then had it managed as money deposited to the trader.
- Someone instructed a trader to complete a fictitious transaction, had a false invoice issued on which the name of a good that is different from the good that had actually been purchased and delivered was stated, and then had KAKENHI expended by the university.
- Someone had a work attendance sheet for work that was actually not carried out drawn up for a graduate student, charged the payment of remuneration, and then managed the money himself, as a pooled fund.
- Someone stayed in a destination different from the scheduled travel plan, in order to have a meeting on collective research unrelated to the purpose of the research project, and then put the costs under travel expenses associated with overseas travel.
- (Note) The expenditure of KAKENHI for fictitious and other transactions, like the ones mentioned in the examples, are all considered fraudulent use, even if the expenditure of KAKENHI was intended for the research project related to the Grant-in-Aid for Scientific Research in question.

O Fraudulent receiving of grants

- A researcher who was not eligible to apply or receive grants applied for a KAKENHI and for funding of it, and then fraudulently received the subsidy.
- O Fraudulent acts committed during the research
- Someone manipulated or forged experimental data or a chart in a research paper published as the achievements of research funded with a KAKENHI.
- Someone translated an original English-language research paper without obtaining prior consent from the author(s), incorporated this translation into a book or report on the research achievements published as the achievements of research funded with a KAKENHI, and made it public as the research achievements of the research project in question, without clearly mentioning that it was being quoted.

5. "Guidelines on the Proper Implementation of Competitive Funding" and Other Matters

The "Guidelines on the Proper Implementation of Competitive Funding" (agreement of the liaison meeting of related offices and ministries on competitive funding, dated September 9, 2005) agree on the rules in the field of competitive funding on the elimination of unreasonable reduplication and excessive concentration, fraudulent receiving, of grants, fraudulent use and research-related fraudulent acts in research papers, and other matters in the related offices and ministries.

During the implementation of the competitive funding, including KAKENHI, these matters will be dealt with appropriately, based on these Guidelines and other matters. Therefore, the applicant should consider carefully the following points.

(1) Eliminate Unreasonable Reduplication and Excessive Concentration

1) In order to avoid "Unreasonable Reduplication or Excessive Concentration" (*) of competitive funds, we may, to the extent necessary, share information on a part of the project description of

the application between other divisions in charge of competitive funds, including other offices and ministries, independent administrative legal entities, etc, making use of the Cross-ministerial Research and Development management system (e-Rad).

Therefore, in the case of an application for more than one competitive funding (including in the case of an application for more than one Research Categories for KAKENHI), and other matters, the applicant should be careful when preparing the Proposal for Grant-in-Aid so that, for example, he or she fills in the Title of the Proposed Project in a way that makes it clear that it does not entail unreasonable reduplication.

If unreasonable reduplication or excessive concentration is found, KAKENHI may not be delivered.

2) Concerning the completed information on the condition of applications and receiving of other Competitive Funding and other matters, including from other offices and ministries, when preparing the Proposal for Grant-in-Aid (name of Research Funds, Title of Proposed Project, Research period, Effort, etc.), if the stated information turns out to be different from the facts, the Research Project will not be adopted, the adoption will cancelled, or the allotted research budget will be reduced.

Moreover, concerning the "Effort", and other matters, necessary for the activity to build a center in the program called "World Premier International Research Center Initiative", it is necessary to fill in the Proposal for Grant-in-Aid. Therefore, when completing this document, the applicant should verify the "Procedures for Preparing and Entering a Proposal".

(2) Dealing with Fraudulent Use, Fraudulently Received Grants or Fraudulent Acts Committed During the Research

1) No KAKENHI will be offered, for a fixed period of time, when the researcher has made fraudulent use of KAKENHI, has fraudulently received KAKENHI, or has committed fraudulent acts. (For details see "(Reference 2) Procedures on the Handling of Grants-in-Aid for Scientific Research", "(Reference 3) Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research — KAKENHI (KAKENHI (KAKENHI (Series of Single-year Grants))" and "(Reference 4) Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research — KAKENHI (KAKENHI (Multi-year Fund))".) Moreover, for research projects of which it has been established that fraudulent use, fraudulent receipt of grants or fraudulent acts have taken place, researchers may be requested to completely or partially return the KAKENHI in question.

Furthermore, an outline of the inappropriate use of grants, the inappropriate receiving of grants and/or the inappropriate acts in question of the researcher who falls in those categories (containing an outline of the research achievements in the research institution,

the names of the people involved, the name of the system, the institution they belong to, the research project, the budget, the fiscal year of the research, the inappropriate content, details of the measures taken, etc.) will be made public.

Also researchers who fraudulently use or receive competitive funds other than KAKENHI (including funds under the control of other ministries), or who commit fraudulent acts by means of these competitive funds, and therefore are excluded from receiving these funds in question, for a fixed period of time, will not receive KAKENHI for a fixed period of time.

Moreover, the researcher who falls in those categories may experience difficulties when applying for other competitive funds, since an outline of the inappropriate case in question will be provided to other bodies in charge of competitive funds, starting with the other ministries, including independent administrative legal entities and other institutions allocating grants.

Moreover, the researcher who falls in those categories may experience difficulties when applying for other competitive funds, since an outline of the inappropriate use of grants, the inappropriate receiving of grants and/or the inappropriate acts in question (containing an outline of the research achievements in the research institution, the names of the people involved, the institution they belong to, the research project, the budget, the fiscal year of the research, the inappropriate content, details of the measures taken, etc.) will be provided to other bodies in charge of competitive funds, starting with the other ministries, including independent administrative legal entities and other institutions allocating grants.

2) If it has been established that fraudulent acts have taken place in a research paper, a report, or other research output funded by KAKENHI, the researcher will be treated in the same way as stated in the above-mentioned 1). The severity of the fraudulent acts and other matters will be taken into consideration.

Moreover, a person who is determined to have a certain responsibility, because, for example, he or she neglected his/her duty of care as a person in charge of the paper, report, etc. in question, will be treated in the same way, even if it has not been established that he or she was directly involved in the fraudulent acts.

(*) Eliminate Unreasonable Reduplication and Excessive Concentration

"Guidelines on the Proper Implementation of Competitive Funding" -Extract-

(Agreement of the Liaison Meeting of Related Offices and Ministries on Competitive Funding, Dated September 9, 2005 (Revision: October 17, 2012))

- 2. Eliminate Unreasonable Reduplication and Excessive Concentration
- (1) Basic Policy of the Unreasonable Reduplication and Excessive Concentration
 - ① In these guidelines, "Unreasonable Reduplication" is a situation in which more than one competitive funding is needlessly and repeatedly allotted to one and the same research project (i.e. the title and the content of the research to which competitive funding is being allotted; the same applies below) carried out by one and the same researcher. Either of the following cases fall under "Unreasonable Reduplication".
 - O Cases where applications have been made at the same time for more than one competitive funding for substantively the same research project (including research projects that overlap to a considerable degree; the same applies below), and where these research projects are redundantly adopted.
 - OCases where an application has been made again for substantively the same research project as another project that has already been adopted, and for which the allotment of competitive funding has already been completed.
 - OCases where there is a reduplication of the use research funds among more than one research project.
 - OOther cases corresponding to the cases mentioned above.
 - ② In these guidelines, "Excessive Concentration" is a situation in which the entire research funds that are allotted to one and the same researcher or research group (hereinafter called "researcher, etc.") in the fiscal year in question exceeds the limit within which they can be used effectively and efficiently, and in which the research funds cannot be used within the research period. Either of the following cases fall under "Excessive Concentration".
 - OCases where, in the light of the abilities of the researcher, etc. and the research methods, etc., excessive research funds are allotted.
 - OCases where, in comparison with the effort (the time allocation rate (%) of time necessary for the implementation of the research activities with the entire working time of researcher) that is being allotted to the research project in question, excessive research funds are allotted.
 - OCases where the purchase of unnecessarily expensive equipment is carried out.
 - Other cases corresponding to the cases mentioned above.

6. On the Promotion of the 'Dialogue on Science and Technology with Citizens' (A Basic Course of Action)

For KAKENHI, it has, until now, clearly been mentioned in the utilization rules by researchers (subsidiary conditions or funding conditions), the Handbook for KAKENHI, and other materials, that the expenses for the creation of a homepage for the publication of the research achievements, the expenses for the creation of a pamphlet publicizing research achievements, the expenses associated with outreach activities, such as, for example, activities publicizing the research achievements among the general public, can be paid as direct costs. Moreover, researchers must endeavor to positively disseminate the achievements produced through KAKENHI to society and

citizens. For example, it is requested that researchers mention information concerning outreach activities in the report on the research achievements they are requested to prepare after the completion of the research period.

Furthermore, JSPS has implemented the program "HIRAMEKI & TOKIMEKI SCIENCE" in order to introduce the newest research achievements to elementary school, junior high-school and senior high-school pupils, in an easy-to-understand form, through experiences, experiments and lectures. Researchers are invited to make use of this program.

Moreover, in "On the Promotion of the 'Dialogue on Science and Technology with Citizens' (A Basic Course of Action)" (June 19, 2010, the Minister of State for Science and Technology Policy and the Experts of the Council for Science and Technology Policy) which has been compiled in June 2010, the activity in which researchers explain the content and achievements of their research activities to society and citizens in an easy-to-understand form is placed in the above-mentioned 'Dialogue on Science and Technology with Citizens'. Researchers and other persons who have received an allotment of public research funds amounting more than 30,000,000 yen per year per case are requested to positively work on the 'Dialogue on Science and Technology with Citizens'. Universities and other research institutions are also requested to make positive efforts in order to enable the proper implementation of the Dialogue on Science and Technology between Citizens, on the one hand, and researchers and other persons who have received public research funds, on the other hand, for example, by setting up support systems.

For KAKENHI, there is the question "Are you positively trying to publicize and disseminate the research content and research achievements?", especially in the research progress assessment of, for example, Specially Promoted Research, for which researchers receive a relatively high amount of research funds, and the interim assessment of, for example, Scientific Research on Innovative Areas (Research in a proposed research area). Therefore, based on the above-mentioned Basic Course of Action, researchers should disseminate the achievements of research funded with KAKENHI to society and citizens in an even more positive way.

7. Cooperation with the National Bioscience Database Center

The National Bioscience Database Center (http://biosciencedbc.jp/) has been established in the Japan Science and Technology Agency (JST, an independent administrative legal entity) in April 2011, in order to promote the integrated use of databases in the area of life science that have been created by various research institutions and other institutions.

This Center spurs the active participation of related institutions, and based on four pillars, namely (1)

the planning of strategies, (2) creation and operation of portal websites, (3) research on and

development of core technology for the integration of databases and (4) the promotion of the

integration of biotechnology-related databases, it is promoting projects aiming at the integration of

databases in the area of life science. In this way, through wide sharing and utilization in the

researchers community of the research achievements in the area of life science produced in Japan,

the Center aims at invigorating overall research in the area of life science, including research and

development connected to basic research and industrial applied research.

JSPS would like to request researchers to cooperate by providing to the Center copies of raw data

related to achievements published in research papers and other output in the area of life science, or

copies of created open databases.

Moreover, the copies provided will be able to be utilized on a non-exclusive basis as reproductions,

alterations, or in other necessary forms. Furthermore, JSPS would like researchers to understand in

advance that, in response to requests of the institutions that received copies, it would also like

request researchers to cooperate by providing all the information necessary for utilizing the copies.

Furthermore, the National Bioscience Database Center has developed guidelines for data on humans,

in order to promote the sharing and use of data related to research in the area of life science, with

due considerations to the protection of personal information.

NBDC human data sharing guidelines

8. On the Inter-University Bio-Backup Project

The purpose of the Inter-University Bio-Backup Project is to "back up" biological genetic resources,

which are indispensable research resources in various research areas, and to avoid damage or loss of

biological genetic resources due to unforeseen accidents, disasters, etc. The project newly

commenced from 2012.

In the National Institute for Basic Biology of the Inter-University Research Institute Corporation

National Institutes of Natural Sciences, which is the core of this project, the IBBP Center

(Inter-University Bio-Backup Project for Basic Biology) (http://www.nibb.ac.jp/ibbp/) has been

- 14 -

established as a backup center for biological genetic resources. It is equipped with the newest equipment necessary for the backup of biological genetic resources.

Any researcher who belongs to a university or a research institution may apply for storage. Biological genetic resources that can be stored in IBBP are samples that can be proliferated (amplified) or cryopreserved (for vegetable seeds, the refrigeration or deep-freezing preservation condition needs to be definite), and being not pathogenic is also a condition. Since backup is provided free of charge, researchers should make use of IBBP.

Any researcher who belongs to a university or a research institution may apply for storage. Biological genetic resources that can be stored in IBBP are samples that can be proliferated (amplified) or cryopreserved (for vegetable seeds, the refrigeration or deep-freezing preservation condition needs to be definite), and being not pathogenic is also a condition. II. Details of the Call for Proposals

A call for proposals for "Grants-in-Aid for Scientific Research KAKENHI" will be conducted together for hitherto known Grants-in-Aid for Scientific Research (hereinafter called "KAKENHI (Series of Single-year Grants)") and Multi-year Fund Scientific Research Grants (hereinafter called "KAKENHI (Multi-year Fund)").

The current round of call for proposals opens before the finalization of the budget for FY2014 in order to enable researchers to proceed with their preparations for the screening early, so that they can start their research as soon as possible.

Therefore, please be aware in advance that, depending on the situation regarding the overall budget, details like resources to be allocated and other matters may be subject to change at a later stage.

1. Research Categories for which a Call for Proposals is Organized

The following shows the research categories for which the Japan Society for the Promotion of Science is organizing a call for proposals:

Specially Promoted Research, Scientific Research (S/A/B/C), Challenging Exploratory Research, Grant-in-Aid for Young Scientists (A/B)

* For Grant-in-Aid for Young Scientists (S) no call for proposals will be conducted.

2. Schedule from Application to Receipt of Funding

(1) Procedures that need to be completed prior to the deadline for the submission of the application documents

Principal Investigator should sufficiently cooperate with the research institution, and should adequately respond to its requests.

The Date and Time	Procedures to be Performed by the	Procedures to be Performed by the
The Dute and Time	Principal Investigator (See "III Instructions & Procedures for	Research Institution (See "V Instructions & Procedures
	those Intending to Apply" and "IV	for Staff of the Research Institution")
	Instructions & Procedures for those	ŕ
E G . 1 1 2014	Who Have Already Been Accepted")	
From September 1, 2014		Procedures to be completed, if the need arises
Start of the Call for Proposals	①Preparing the Application [Investigators should access the Electronic Application System using the ID and the e-Rad Password which has been provided by the research institution and preparing the application. ② Submission (Sending) of the Application Documents The Principal Investigator should submit (send) the application documents to the research institution he/she belongs to, by the deadline decided the research	1) The Research Institution obtains an ID and Password for e-Rad from the person in charge of the operation of e-Rad (This does not apply if the research institution already obtained them.) **The issue of the ID and the Password takes about 2 weeks. 2) Registration of the Researcher Information in e-Rad and other matters 3) Research institutions issue an ID and password to the Principal Investigators. (This does not apply if the researcher already obtained an ID and a password.) 4) Submission of Submission of the "Self-assessment Checklist on the Implementation of the System", based on the Guidelines. (Deadline for submission: October 4 (Fri.))
	institution.	5) <u>Submission (Sending) of the Application Documents</u>
November 8 (Fri) 4:30 pm		
Deadline for the Submission		,

Notes:

- 1. After the Principal Investigator submit (Sending) to the application to the research institution (mentioned in "Procedures to be Performed by the Principal Investigator" ②), the research institution should submit (Sending) to the JSPS the application the application by the deadline for the submission (mentioned in "Procedures to be Performed by the Research Institution" 5)).
 - Next, he or she should verify the section "Preparing the Application and Submitting the Application" (pages 43-54), etc., as well as verify the procedures designated by the research institution, etc. (deadline for the submission of the application, etc., in the research institution), with the office worker in charge in the research institution.
- 2. When the researcher is applying for KAKENHI, he or she should register the researcher information beforehand in e-Rad. The research institution should perform the registration in e-Rad. Therefore, the researcher who is planning to apply should verify the state of the registration with the office worker in charge in the research institution.
- 3. The research institution should submit a "Self-assessment Checklist on the Implementation of the System", based on the "Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards)" (section 4 in "Procedures to Be Completed by the Research Institution"). If it has not

been submitted, the applications of researchers belonging to the research institution in question will not be accepted in the Electronic Application System.

(2) Schedule after the Submission of the Application Documents (plan)

Specially Promoted Research	Scientific Research (S)	Scientific Research (A/B/C), %2 Challenging Exploratory Research, Grant-in-Aid for Young Scientists (A/B)

Scientific Research (/B/C) (Generative
Research Fields),
December 2013 to June 2014:
Screening
Late July 2014:
Informal decision to
grant the funding
Middle of August:
Application for funding
Late September:
Decision concerning
the granting of the funding

^{%1} From FY2012 on, the amount requested for funding or the amount requested for payment (direct costs) will be remitted separately in two installments, i.e. one during the first term (from April until September) and the other during the second term (from October until March), if this amount for the fiscal year in question is 3 million yen or more, and it will be remitted in a lump sum during the first term, if it is less than 3 million yen.

 $[\]frak{2}$ This does not apply to Scientific Research (B/C) (Generative Research Fields).

3. Details of Each Research Category

1) Specially Promoted Research: KAKENHI (Series of Single-year Grants)

- A) Intended for: Research project carried out <u>by one researcher or by a relatively small group</u>

 of researchers that is likely to yield highly acclaimed research achievements through intensive funding. The goal of the funding is the increased promotion of research which is highly regarded in the international arena.
- B) Total budget provided (total budget throughout the research period the same applies below):

As a general indicator, the upper limit of the total budget provided per research project is fixed at around 500 million yen. However, if it is deemed necessary, applications exceeding this amount are also possible. Moreover, no lower limit has been established.

- ※ Handling of research projects with a total budget exceeding 500 million yen. If the total budget exceeds 500 million yen, the reason why such a budget is needed should be stated in detail in the appropriate section of the proposal for grant-in-aid. Especially rigorous screening on the appropriateness of the budget will be conducted.
- * On the lower limit of total budget

No lower limit of the total budget has been established for research categories that further promote research which is highly regarded in the international arena and that are likely to yield highly acclaimed research achievements.

- C) Research period: Three to five years
- D) Number of research projects scheduled to be selected: Around 10 (subject to strict selection)
- E) Research funding: <u>KAKENHI (Series of Single-year Grants) based on Acts Incurring Liabilities on the Treasury</u> are granted.
- F) Important points: For research projects that have been adopted, a research progress assessment will be conducted in the fiscal year before the final fiscal year of the research period. Moreover, based on the results of this research progress assessment, an increase or a reduction of the research budget, cancellation of the research, or other measures may subsequently be implemented, if the need arises. Moreover, a follow-up assessment will be conducted 5 years after the completion of the research.
 - * On Acts Incurring Liabilities on the Treasury

For Specially Promoted Research, "Acts Incurring Liabilities on the Treasury" have been introduced, and a decision to grant the funding over

multiple fiscal years will be made.

2) Scientific Research (S): KAKENHI (Series of Single-year Grants)

- A) Intended for: Research project performed by one researcher or by a relatively small group of researchers, with the purpose of achieving a major development in creative and pioneering research, based on past research achievements
- B) Total budget provided: From 50 million yen to around 200 million yen
- C) Research period: Five years as a general rule
 - *As an exception, the research period may be set at three or four years, in case any of the researchers are expected to leave the research institution, due to reaching retirement age, or for any other reason.
- D) Research funding: **KAKENHI** (Series of Single-year Grants) are granted.
- E) Important points: For research projects that have been adopted, a research progress assessment will be conducted in the fiscal year before the final fiscal year of the research period. Moreover, based on the results of this research progress assessment, an increase or a reduction of the research budget, cancellation of the research, or other measures may subsequently be implemented, if the need arises.

3) Scientific Research (A/B/C)

Scientific Research (A): KAKENHI (Series of Single-year Grants)

Scientific Research (B): KAKENHI (Series of Single-year Grants) and KAKENHI (Multi-year Fund)

Scientific Research (C): KAKENHI (Multi-year Fund)

A) Intended for: Research project done by one or by multiple researchers, with the purpose of achieving a major development in creative and pioneering research

B) Total budget provided: Applications are to be divided into the following three divisions, according to the total budget provided.

Division	Total budget provided	Screening division
Scientific Research (A)	between 20 million and 50 million yen	General / Overseas Academic
		Research

Scientific Research (B)	between 5 million and 20 million yen	General / Overseas Academic
		Research/ Generative Research
		Fields
Scientific Research (C)	5 million yen or less	
		General/ Generative Research
		Fields

C) Research period:

Screening division: "General" and "Overseas Academic Research": Three to five years

Screening division: "Generative Research Fields": Three to five years (Depending on the fiscal year of the application, the research period is different.)

D) Screening division: When applying, select one of the following screening divisions.

Screening division: "General"

The screening division accepts applications relating to **Scientific Research** (A/B/C). It is intended for projects which will develop innovative research.

All applications should be made for this screening division, except for research projects which are classified as "Overseas Academic Research" and "Generative Research Fields".

Screening division: "Overseas Academic Research"

This screening division only accepts applications for <u>Scientific Research (A/B)</u>. It is intended for research projects having as their <u>major purpose</u> in terms of research subject and research methods <u>conducting a field survey</u>, <u>observation</u>, <u>or collecting data at a specific location overseas</u>.

If a field survey, or a similar survey, is not the main purpose of the project, please apply for the "General" screening division. As far as equipment is concerned, the use of grants in the "Overseas Academic Research" screening division is limited to equipment that is directly used for surveys, observation or collection of data overseas, such as inexpensive personal computers.

Screening division: "Generative Research Fields"

This screening division only accepts applications for <u>Scientific Research (B/C)</u>. For FY2014 the three areas "Neo-Gerontology", "Mathematical Sciences in Search

of New Cooperation" and "Food Cycle Research" have been established.

Attached Table 2 Please avoid applying for "Generative Research Fields" in the case of research projects where it is possible to select an appropriate research field from Attached Table 2 "Grants-in-Aid for Scientific Research FY2014 List of Categories, Areas, Disciplines and Research Fields".

- (*) The set period for each area is five years and the period of the invitation for applications is fixed from the fiscal year of the establishment of the area until the third fiscal year. In the first fiscal year of the set period, the research period for which it is possible to apply is three to five years, in the second fiscal year of the set period, it is three to four years, and in the third fiscal year of the set period, it is three years.
 - Number of research projects scheduled to be selected: <u>30 for each area</u> (subject to careful selection).
 - Please note that, during the stage of the screening of "Generative Research Fields", Principal Investigators may be requested to submit additional materials, if the need arises.
 - Research exchange meetings are scheduled to be held for researchers whose projects have been adopted.
- E) Research funding: For Scientific Research (A), KAKENHI (Series of Single-year Grants) are granted. For Scientific Research (B), KAKENHI (Multi-year Fund) are granted. For Scientific Research (C), KAKENHI (Multi-year Fund) are granted.

4) Challenging Exploratory Research: KAKENHI (Multi-year Fund)

- A) Intended for: A Research project at an exploratory stage, done by one or multiple researchers, that is based on a unique concept, that is challenging, and that sets an ambitious goal.
- B) Total budget provided: 5 million yen or less
- C) Research period: One to three years
- D) Research funding: KAKENHI (Multi-year Fund) are granted.

5) Grant-in-Aid for Young Scientists (A/B)

Grant-in-Aid for Young Scientists (A): KAKENHI (Series of Single-year Grants) and KAKENHI (Multi-year Fund)

Grant-in-Aid for Young Scientists (B): KAKENHI (Multi-year Fund)

A) Intended for: A research project conducted by <u>one researcher aged 39 or less as of April 1,</u>

2014 (a person born on April 2, 1974, or thereafter) with an original idea that is

expected to bring forth a major development in the future

B) Total budget provided: Applications are to be divided into the following two divisions, depending on the total budget provided

Division	Total budget provided
Grant-in-Aid for Young Scientists (A)	From 5 million yen to 30 million yen
Grant-in-Aid for Young Scientists (B)	5 million yen or less

C) Research period: Two to four years

D) Research funding: For Grant-in-Aid for Young Scientists (A), **KAKENHI (Series of Single-year**

Grants) and KAKENHI (Multi-year Fund) are granted. For Grant-in-Aid for

Young Scientists (B), KAKENHI (Multi-year Fund) are granted.

E) Important points: On the "Restriction on the Number of Times of Receiving a Grant(*)".

From the call for proposals of FY2010 on, JSPS decided to introduce a limitation on the number of times applicants can receive grants through Grant-in-Aid for Young Scientists (S/A/B). <u>JSPS has decided that applicants can only receive grants twice for any of the research categories, through Grant-in-Aid for Young Scientists (S/A/B).</u>

(*) "Receiving a grant" means being selected as a Grant-in-Aid for Young Scientists (S/A/B) "Receiving a decision concerning the granting of the funding" here.

In addition, even if a research project of which the research period goes over more than one fiscal year received a decision concerning the granting of the funding, under one and the same project number, the "Number of Times of Receiving a Grant" will be considered as "one time".

Therefore, if, for example, researcher A conducted research from FY2003 to FY2004 with a "Grant-in-Aid for Young Scientists (B) (project number: 15*****)", and is conducting research from FY2006 to FY2009 with a "Grant-in-Aid for Young Scientists (A) (project

number: 18*****)", the "Number of Times of Receiving a Grant" will be considered as "two times".

Moreover, in both the following cases, the "Number of Times of Receiving a Grant" will be considered as "one time".

- Cases where the researcher declined the application for funding in the middle of the research period, or where he or she discontinued the research, after he or she received a decision concerning the granting of the funding.
- Cases where the researcher applied during Grants-in-Aid for Scientific Research FY2006 for a "Grant-in-Aid for Special Purposes (Trial of Multiple Applications per Year)" with a research plan suitable for a "Grant-in-Aid for Young Scientists", where that application was adopted, and where the researcher received the decision concerning the granting of the funding.

(Reference) Please note that the following cases do not contain a "Number of Times of Receiving a Grant".

- In cases where, after the researcher received an informal decision to grant the funding for new research projects, he or she refused the application for funding, and did not receive the decision concerning the granting of the funding, there is no "Number of Times of Receiving a Grant". (This also includes cases where the researcher declines the grant, after he or she suspended the application for funding.)
- For Continued Research Projects of the category "Grant-in-Aid for Young Scientists (B)" in FY2002 (projects that have been newly approved in FY2001 as "Encouragement of Scientists (A)" with project number "13******") there is no "Number of Times of Receiving a Grant", even if the researcher would have received the decision concerning the granting of the funding.

III. Instructions & Procedures for those Intending to Apply

A call for proposals for "Grants-in-Aid for Scientific Research KAKENHI" will be conducted together for hitherto known Grants-in-Aid for Scientific Research (hereinafter called "KAKENHI (Series of Single-year Grants)") and Multi-year Fund Scientific Research Grants (hereinafter called "KAKENHI (Multi-year Fund)").

1. Procedures to be Completed Prior to the Application

Three matters need to be completed before the application: (1) Verification of the Eligibility to Apply, (2) Verification of the Registration of the Researcher Information, (3) Obtaining an ID and Password to Use the Electronic Application System.

(1) Verification of the Eligibility to Apply

A qualified person should apply for a Grant-in-Aid for Scientific Research as a Principal Investigator.

Applicants should meet the requirements 1) and 2) below.

From FY2014 on, if JSPS Research Fellows (SPD, PD, or RPD) meet the following application requirements in their host research institutions, they can also apply for a part of the research categories other than "Grant-in-Aid for JSPS Fellows". Cf. "Table of Restrictions on Duplication".

Moreover, if a qualified applicant belongs to more than one research institution, he or she can apply simultaneously from each of these research institutions. However, in that case, it is necessary to consider the rules on duplicate applications (see page 29).

In addition, JSPS Research Fellows (DC) and Foreign JSPS Fellows cannot apply for "Grant-in-Aid for Scientific Research".

Students, such as, for example, graduate students, cannot apply for Grants-in-Aid for Scientific Research. (See note.) Therefore, applicants should bear in mind that, students cannot apply, even if they hold a position in which they conduct research activities in the research institution to which they belong or in another research institution.

(Note) Persons who have a position consisting of conducting research activities in the research institution to which they belong, as their main work (e.g., university teaching staff, researchers from companies, etc.), and who also have a student status are not included in the term "student".

① At the time of the application, a person needs to be recognized by the research institution (Note) to which he or she belongs to be a researcher who meets the requirements 1), 2) and 3) below, and needs to be a researcher whose Researcher Information has been registered in e-Rad as "Eligible to Apply for Grants-in-Aid for Research".

Requirements

- 1) The researcher should belong to the research institution as a person who has *inter alia* the duty to perform research activities within the research institution in question (irrespective of whether the work is paid or unpaid, full-time of part-time. Moreover, it is not necessary for the researcher to perform these research activities as such as his or her main duty.)
- 2) The researcher should actually be engaged in research activities at the research institution in question(This does not apply to cases where he or she is only engaged as a research assistant.)
- 3) The researcher is not a graduate student or any other category of student. (However, this does not apply to persons who have a position consisting of conducting research activities in the research institution to which they belong, as their main work (e.g., university teaching staff, researchers from companies, etc.), and who also have a student status.)

Note: Research institutions as prescribed in Article 2 of the Rules for the Handling of Grants-in-Aid for Scientific Research (announced by the Ministry of Education)

(Reference) Requirements that need to be met by the research institution (see page 104)

Requirements

- If a KAKENHI is given, the research activity should be conducted as an activity of the research institution in question.
- If a KAKENHI is given, the research institution should carry out the management of the KAKENHI.
- ② A person should not fall under "Not eligible for receipt of funding" in FY2014, because he or she committed fraudulent use, fraudulent receiving of grants or fraudulent acts of/with Grants-in-Aid for Scientific Research or other competitive funding.

Persons who are employed through KAKENHI (hereinafter called "research grant employees"), as a rule, need to concentrate on work related to a KAKENHI at their place of employment (hereinafter called "employment related work") according to their employment contracts. Therefore, considering the working hours they need to allot to the employment related work, they cannot apply for KAKENHI themselves.

However, if they provide a clear explanation on the time they can spend besides their employment related work, and if during this time they themselves attempt to conduct research using a KAKENHI, on their own initiative, it is possible for them to apply for KAKENHI, on condition that the following points have been verified in the research institution.

- It has been determined in the employment contract that research grant employees themselves can conduct research on their own initiative, besides the employment related work.
- The employment related work and the work devoted to research that they conduct themselves on their own initiative has clearly been divided in the working hours and the effort.
- Time that can be allotted to research which they attempt to conduct themselves on their own initiative has sufficiently been secured, besides the time spent for employment related work.

In addition, it may happen to researchers that they are treated as indicated below, even if their researcher information has been registered in e-Rad as "Eligible to Apply for KAKENHI".

- If it is judged in the research institution to which researchers belong that it is not appropriate to let them conduct their research activities as activities of the research institution in question, it may happen that the research institution does not recognize the application. It may also happen that the application for funding by these researchers in question is not recognized and that the application for funding of the KAKENHI is rejected.
- No KAKENHI will be funded, if there is a new application for Grants-in-Aid for Scientific Research from researchers who do not submit the report on the research achievements at the end of the research, without any reason, even if their research has been adopted after screening. Moreover, if researchers have failed, without good reason, to submit the scheduled report on the research achievements, then implementation of other Grants-in-Aid for Scientific Research due to be implemented in the same fiscal year will be suspended.

(2) Verification of the Registration of the Researcher Information in e-Rad

A Principal Investigator who tries to apply for research categories for which a call for proposals is organized this time should be a person who is eligible to apply at the time of the deadline for the submission of the application documents, and should be a person whose researcher information is registered in e-Rad as "Eligible to Apply for KAKENHI".

Therefore, when applying, it is necessary to first perform a verification of the content of the registration in e-Rad.

Regarding the registration in e-Rad, in order for <u>the research institution</u> to which the Principal Investigator belongs to conduct the procedures in e-Rad, he or she should verify concerning the

registration procedures to be conducted by the research institution to which he or she belongs (registration deadline within the research institution, methods of verification of the current state of the registration, etc.) with the research institution to which he or she belongs. (If there is any item (such as "the institution", "the position", or others) that needs to be corrected, even though he or she has already been included in e-Rad of the research institution, the applicant needs to register the correct information on e-Rad.)

(3) Obtaining an ID and a Password to Use the Electronic Application System

When applying, it is necessary to access the Electronic Application System using the ID and password for e-Rad and to prepare the application documents. Therefore, if the applicant has not obtained an ID and password, he or she should first be **provided with an ID and a password for e-Rad** by the research institution to which he or she belongs.

Moreover, once the ID and the password have been provided they can be used, even if the research institution the applicant belongs to changes.

(Reference) On "Grant-in-Aid for Research Activity Start-up"

The "Grant-in-Aid for Research Activity Start-up" is aimed at supporting persons who cannot apply for the call for proposals this time, such as researchers who have just been employed by their research institutions, researchers who return from childcare leave or other kinds of leave, or other researchers.

The FY2014 call for proposals for this research category is scheduled for March 2014, and the eligibility to apply is scheduled to be as follows.

- ① Persons who could not apply for a research category, because they became eligible to apply for KAKENHI on the day after the application deadline (November 8, 2013) for the research categories (*) for which the Ministry of Education, Culture, Sports, Science and Technology (MEXT) and the Japan Society for the Promotion of Science (JSPS) organized a call for proposals in September 2013.
- ② Persons who could not apply for the research categories (*) for which the Ministry of Education, Culture, Sports, Science and Technology (MEXT) and the Japan Society for the Promotion of Science (JSPS) organized a call for proposals in September 2013, because they took up maternity leave or childcare leave in FY2013.

(Applicants should verify the details in the Application Procedures of March 2014.)

The research institution is responsible for conducting the registration of the researcher information and other matters in e-Rad. Therefore, researchers who may come to fall under the above-mentioned point ①, should respond appropriately and, for example, contact the office worker in charge in the research institution.

(*) Among the Grants-in-Aid for Scientific Research for FY2014 there are "Scientific Research on Innovative Areas", "Specially Promoted Research", "Scientific Research", "Challenging Exploratory Research" and "Grant-in-Aid for Young Scientists".

(Note) Even if JSPS Research Fellows (SPD, PD, or RPD) have become eligible in their host research institutions, they cannot apply for "Grant-in-Aid for Research Activity Start-up".

2. Verification of the Restrictions on Duplication

Before preparing the application forms, researchers who would like to apply for KAKENHI need to sufficiently verify the rules for "restrictions on duplication" in order to find out whether it is possible to apply for the research category they would like to apply for.

(1) Restrictions on Duplication in the Basic Policy

In the KAKENHI different "Research Categories" and "Screening Divisions" have been made, based on the scale of the research, the content, and other factors. This makes it possible to apply for research projects that meet the demands of various research forms.

On the other hand, taking into consideration the necessity to support many excellent researchers with limited resources, the danger of negatively affecting the operation of proper reviewing by an increase in the number of applications, and other elements, "Rules for Restrictions on Duplication" have been set up, based on the following fundamental principles.

- ① Making sure that as many excellent researchers as possible are supported with limited resources.
- ② Making sure that the number of applications does not increase dramatically, based on the reviewing system of each research category.
- When setting up restrictions, primarily making the Principal Investigator who bears all responsibility eligible for the implementation of research projects, but also making the Co-Investigator (kenkyū-buntansha) eligible in some cases, for example, if the amount of funds in a research category is large.
- ④ Based on the fundamental principles outlined above, taking into consideration the purpose, character, and other elements of the "Research Categories" of the Grants-in-Aid for Scientific Research, and setting up restrictions on duplication separately, by making a distinction between the restrictions on application or restrictions on receiving of funds.

Restrictions on duplication have also been established in the research categories for which a call for proposals is organized this time. Therefore, when applying, the applicant should sufficiently verify the description below and the "Table of Restrictions on Duplication" showed on pp.37-42.

Moreover, if a research project falls under the concept "unreasonable reduplication" as shown in the "Guidelines on the Proper Implementation of Competitive Funding" (cf. p. 12), it is likely to be judged to be "unreasonable reduplication" in the stage of the screening. Therefore, when preparing the Proposal for Grant-in-Aid, the applicant should take this into account.

(2) Restrictions on Duplicate Applications

① Cases where a researcher tries to apply as the "Principal Investigator" for two research projects.

[Type "Principal Investigator→Principal Investigator"] (see page 37)

Consequently, he or she cannot make more than one application for one and the same research category (screening division) at the same time (In case he or she has a continued research project, he or she cannot apply for a new research project in one and the same research category (screening division)).

(cases that fall under "-" in the table)

In case one researcher tries to make a duplicate application for two research projects, as the Principal Investigator for both, the following restrictions on duplicate applications of the type from A to D below apply.

However, this does not apply in case a researcher extended the research period for a KAKENHI (Multi-year Fund) and KAKENHI (Partial Multi-year Fund) in the final fiscal year (except in cases where she also obtained maternity leave or childcare leave) and in case of an "Application for a grant for the fiscal year before the final fiscal year of a research project" (See "Special cases in the restrictions on duplicate applications", page 35).

A Cases where a researcher can only apply for one research project.

(cases that fall under "×" in the table)

B Cases where a researcher cannot apply for a new research project, because he or she is implementing a continued research project.

(cases that fall under "▲" in the table)

C Cases where a researcher can apply for both research projects, but, if both are adopted, he or she can only implement the research of one research project, as laid down in the rules.

For "■" in the table, the research categories in the section A are given priority
For "□", the research categories in the section B are given priority

- D Cases where, as a general rule, duplicate applicants are not recognized, but where a researcher can apply for both research projects, only if the conditions added below are met.
 - If a researcher applies as a Principal Investigator for "Scientific Research", screening division "Overseas Academic Research", as a general rule, he or she cannot apply as a Principal Investigator for "Scientific Research", screening division "General" However, except in cases where it is necessary to conduct individually two research projects which clearly differ in objective, plan or methodology within the same fiscal year.

(cases that fall under "★" in the table)

② Cases where a researcher who applies as the Principal Investigator tries to participate as the Co-Investigator (*kenkyū-buntansha*) of another research project.

[Type "Principal Investigator→Co-Investigator (kenkyū-buntansha)"] (see page 39)

In case one researcher applies as the Principal Investigator for a certain research project and at the same time also tries to participate as the Co-Investigator (*kenkyū-buntansha*) of another research project, or, in case a researcher who has already become the Principal Investigator of a research project the continuation of which is scheduled in FY2014 (continued research project) also tries to participate as the Co-Investigator (*kenkyū-buntansha*) of another research project, he or she can normally apply for both projects.

However, for a part of the research categories, mainly Specially Promoted Research, Scientific Research on Innovative Areas (Research in a Proposed Research Project), Challenging Exploratory Research, etc., there are restrictions on duplicate applications of the type from A to C below.

A Cases where a researcher can only apply for one research project.

(cases that fall under "×" in the table)

B Cases where a researcher cannot apply for a new research project, because he or she is implementing a continued research project.

(cases that fall under "▲" in the table)

C Cases where a researcher can apply for both research projects, but, if both are adopted, he or she can only implement the research of one research project, as laid down in the rules.

For "■" in the table, the research categories in the section A are given priority

③ Cases where a researcher who participates in research as the Co-Investigator (*kenkyū-buntansha*) tries to apply as the Principal Investigator of another research project.

【Type "Co-Investigator (*kenkyū-buntansha*)→Principal Investigator"】 (see page 41)

In case one researcher tries to participate as the Co-Investigator (*kenkyū-buntansha*) in a certain research project and at the same time also applies as the Principal Investigator of another research project, or, in case a researcher who has already become the Co-Investigator (*kenkyū-buntansha*) of a research project the continuation of which is scheduled in FY2014 (continued research project) also applies as the Principal Investigator of another research project, he or she can normally apply for both projects.

However, for a part of the research categories, mainly Specially Promoted Research, or other projects, there are the same restrictions on duplicate applications as in point ②).

For "□"in the table, the research categories in the section B are given priority

④ Cases where a researcher who participates as the Co-Investigator (*kenkyū-buntansha*) of a research project also tries to participate as the Co-Investigator (*kenkyū-buntansha*) of another research project.

[Type "Co-Investigator (kenkyū-buntansha)→Co-Investigator (kenkyū-buntansha)"]

In case one researcher tries to participate as the Co-Investigator (*kenkyū-buntansha*) in a certain research project and at the same time also tries to participate as the Co-Investigator (*kenkyū-buntansha*) of another research project, or, in case a researcher who has already become the Co-Investigator (*kenkyū-buntansha*) of a research project the continuation of which is scheduled in FY2014 (continued research project) also tries to participate as the Co-Investigator (*kenkyū-buntansha*) of another research project, he or she can normally apply for both projects.

However, for Specially Promoted Research, a researcher cannot participate in two research projects as the Co-Investigator (*kenkyū-buntansha*). In addition, in case a researcher has already become the Co-Investigator (*kenkyū-buntansha*) of Specially Promoted Research, he or she cannot participate as the Co-Investigator (*kenkyū-buntansha*) of other Specially Promoted Research either.

(3) Restriction Rules on the Receiving of Grants

Among the Restrictions on Duplication, the handling of cases that fall under the category "A researcher can apply for both research projects. However, in case both are adopted, he or she can only implement the research of one research project" (restrictions on receiving of grants) is as follows.

On the handling in case both applications that fall under "■" or "□" are adopted

- A In cases of "Principal Investigator" and "Principal Investigator" (cases of Principal Investigator of Specially Promoted Research and Principal Investigator of other research categories, etc.), as a result of the restrictions on duplication, a researcher should abandon (or should decline to accept) the research project that he or she cannot implement, if he or she can only implement the research category mentioned in section A or section B, as laid down in the rules.
- B As a result of the Restrictions on Duplication of Principal Investigators of Specially Promoted Research and Co-Investigators (*kenkyū-buntansha*) of other research categories, a researcher should cease being a "Co-Investigator (*kenkyū-buntansha*)" for research projects other than Specially Promoted Research, if he or she can only implement a research project of Specially Promoted Research (as the Principal Investigator).

Moreover, if he or she ceases being the "Co-Investigator (*kenkyū-buntansha*)", he or she should abandon (or should decline to accept) research projects of which he or she cannot continue the research.

(4) Other Important Points

- 1) Even if duplicate application, etc. is possible according to the rules on restriction of duplication, the researcher should consider the restrictions in case of "Situations where the applicant cannot carry out his/her responsibility as a Principal Investigator or a Co-Investigator (*kenkyū-buntansha*), due to participation in multiple research projects". Altogether, he or she should consider the content of "Elimination of Unreasonable Reduplication and Excessive Concentration" mentioned on page 12.
- 2) Even if the application has been accepted in the Electronic Application System, it may happen in some cases that afterwards it is not accepted for reviewing, due to the Restrictions on Duplicate Applications. This may happen, for example, in case a change has taken place in the project members of continued research projects. The researcher should sufficiently verify this before the submission of the application documents.
- 3) Even when a researcher who is eligible to make applications in multiple research institutions applies at the same time from multiple research institutions separately, the restrictions on duplicated applications apply to that researcher in question (Principal Investigator or Co-Investigator (*kenkyū-bentansha*)).
- 4) When verifying the "Table of Restrictions on Duplication", the participation form to "Summarizing Group Research Projects" in Scientific Research on Innovative Areas (Research in a Proposed Research Area)" is special (see "Application Procedures for Grants-in-Aid for Scientific Research KAKENHI FY2014 (MEXT)"). Therefore, applicants should take note of the following points.
 - A The "Principal Investigator of Summarizing Group Research Projects in Scientific Research on Innovative Areas (Research in a Proposed Research Area)" should verify the relation with "Principal Investigators or Co-Investigators (*kenkyū-buntansha*) of research projects who try to make a duplicate application" in the relevant section of the "Table of Restrictions on Duplication".
 - B The "Co-Investigator (kenkyū-buntansha) of Summarizing Group Research Projects in Scientific Research on Innovative Areas (Research in a Proposed Research Area)" should verify the <u>relation with "Participation Form to General Planned Research (Planned Research Other than Summarizing Group Research Projects) (Principal Investigators and Co-Investigators (kenkyū-buntansha))" and with "Principal Investigators or Co-Investigators (kenkyū-buntansha) of research projects who try to make a duplicate</u>

application" in the "Table of Restrictions on Duplication".

- 5) In case the continued research project which needs to be abandoned according to the restriction on the receiving of grants ① has FY2014 as the final fiscal year, and ② has been selected before FY2012, the Principal Investigator should submit a report on the research achievements (a working paper) and other matters related to the research project in question between June 20 and June 30, 2015.
- 6) For research categories for which the Ministry of Education, Culture, Sports, Science and Technology (MEXT) organizes a call for proposals, applicants should verify Attached Table 1 for restrictions on duplicate applications related to "a person who tries to apply as Principal Investigator or Co-Investigator (kenkyū-buntansha)" or "a person who has already become Principal Investigator or Co-Investigator (kenkyū-buntansha) of a research project that is scheduled to be continued in FY2014 (continued research project)".
- 7) From FY2014 on, in the case where JSPS Research Fellows (SPD, PD, or RPD) have become eligible in their host research institution, it is possible for them to apply for the research categories "publicly invited research of Scientific Research on Innovative Areas (Research in a Proposed Research Area)", "Scientific Research (B/C), "Challenging Exploratory Research" and "Grant-in-Aid for Young Scientists (A/B)".

 Even if applicants do not receive a Grant-in-Aid for JSPS Fellows, they should verify the section "Grant-in-Aid for JSPS Fellows (Fellow)" in the "Table of Restrictions on Duplication" for restrictions on duplicate applications.
- 8) If applicants applied for research categories to which the restrictions on duplicate applications apply ("Specially Promoted Research", "Summarizing Group, Research Projects in Scientific Research on Innovative Areas (Research in a Proposed Research Area)", "Scientific Research (S/A)" and "Grant-in-Aid for Research Activity Start-up"), and subsequently they are employed as JSPS Fellows, and the research category for which they applied is also adopted, they have to select one of the two projects.

 Moreover, during the period of their employment, JSPS Research Fellows (SPD, PD, or

Moreover, during the period of their employment, JSPS Research Fellows (SPD, PD, or RPD) cannot apply for research categories to which the restrictions on duplicate applications apply.

Therefore, if the application has been accepted in the Electronic Application System, it may happen, in some cases, that afterwards it is not accepted for review, due to the Restrictions on Duplicate Applications. The researcher should sufficiently verify this before the submission of the application documents.

(5) Special cases in the restrictions on duplicate applications(Application for a grant for the fiscal year before the final fiscal year of a research project)

1) When a Principal Investigator of a research project wishes to restructure the research project in the light of developments in the research in question, and the research project (continued research project) belongs to the type "Specially Promoted Research", "Scientific Research" (except "Scientific Research (B/C)" screening division "Generative Research Fields") or "Grant-in-Aid for Young Scientists", the research period is 4 years or more, and FY2014 is the last fiscal year of the research period, then he or she may apply for an "Application for a grant for the fiscal year before the final fiscal year of a research project".

Moreover, in accordance with these special cases, the number of projects for which a new application can be made, based on one continued research project, is limited to **one project**.

- 2) The research categories for which new applications may be made, as "Application for a grant for the fiscal year before the final fiscal year of a research project", are "Specially Promoted Research", and "Scientific Research" (except "Scientific Research (B/C)" screening division "Generative Research Fields"). However, the only research category for which a new application can be made, based on research projects of the category "Grant-in-Aid for Young Scientists (S/A/B)", is "Scientific Research".
- 3) It is not possible to make a new application for "Scientific Research (B/C)" screening division "Generative Research Fields", as "Application for a grant for the fiscal year before the final fiscal year of a research project". Moreover, it is not possible to make a new application based on "Scientific Research (B/C)" screening division "Generative Research Fields".
- 4) The restrictions on duplicate applications do not apply to cases where there is, on the one hand, a new application for a research project of the type "Application for a grant for the fiscal year before the final fiscal year of a research project" and, on the other hand, a continued research project on which the new application is based.

However, the restrictions on duplicate applications do apply to cases where there are, on the one hand, these projects and, on the other hand, other research projects under the supervision of the same Principal Investigator for which an application has been made (including continued research projects).

5) When the research project for which a new application has been made is selected, the KAKENHI of FY2014 for the continued research project on which the new application is

based will, as a general rule, not be paid. Even in case when the grand has been paid, the full amount of the grant should be refunded. For this reason, the proposal for grant-in-aid for a research project for which a new application is made should include a part of the budget necessary for the implementation of the continued research project for FY2014.

Moreover, in this case, the Principal Investigator should submit a report on the research achievements (a working paper) and other matters related to the continued research project in question between June 20 and June 30, 2014 Therefore, he or she should include the budget for the report, etc. in question, when completing the preparations.

(Handling of Restrictions on Duplicate Applications Brought About by an Extension of the Research Period)

- 1) For KAKENHI (Multi-year Fund) and KAKENHI (<u>Partial Multi-year Fund</u>), <u>the restrictions on duplicate applications do not apply</u> to cases where there is, on the one hand, a research project of which the research period has been extended and, on the other hand, a new research project for which the researcher tries to apply, on condition he or she extend the research period in the final fiscal year (except in cases where the researcher obtained maternity leave or childcare leave).
- 2) However, the restrictions on duplicate applications do apply to cases where there is, on the one hand, a new research project for which the researcher tries to apply and, on the other hand, another research project for which the same Principal Investigator applies (including continued research projects).

Attached Table 1 Table of Restrictions on Duplication

1−1) Type "Principal Investigator (New/Continued) (Section A) → Principal Investigator (Section B)"

This table shows the restrictions on duplication in case of "a person who tries to apply as Principal Investigator for a research project mentioned in section A (research categories for which JSPS organizes a call for proposals), or a person who has already become Principal Investigator of a research project that is scheduled to be continued in FY2013 (continued research project) mentioned in section A" applies as Principal Investigator for mentioned in section B.

Blank cell:The researcher can apply for both research projects.

^{-:} A researcher can only apply for one research project in one and the same research category (screening division) (In case he or she has a continued research project mentioned in section A, he or she cannot apply for a research project mentioned in section B)

^{×:} The researcher can only apply for one research project (in case he or she applied for a research project mentioned in section A, he or she cannot apply for a research project mentioned in section B)

^{▲:}The researcher cannot apply for a research project mentioned in section B (He or she only implements the research of a continued research project mentioned in section A).

^{■:}The researcher can apply for both research projects. However, in case both are adopted, he or she only implements the research of the research project in A.

^{☐:}The researcher can apply for both research projects. However, in case both are adopted, he or she only implements the research of the research project in B.

^{★:}As a rule duplicate applications are not accepted. (This does not apply to cases where it is necessary to conduct two clearly different research projects within the same fiscal year.)

1−2) Type "Principal Investigator (New/Continued) (Section A) → Principal Investigator (Section B)"

This table shows the restrictions on duplication in case of "a person who tries to apply as Principal Investigator for a research project mentioned in section A (research categories for which MEXT organizes a call for proposals), or a person who has already become Principal Investigator of a research project that is scheduled to be continued in FY2014 (continued research project) mentioned in section A" applies as Principal Investigator for mentioned in section B.

3. Preparing the Application (Proposal for Grant-in-Aid) and Submitting the Application (Proposal for Grant-in-Aid)

The document necessary for the application is the Proposal for Grant-in-Aid. The Proposal for Grant-in-Aid consists of two parts: the Application Information (Items to be filled in on the form on the website), which is the first part, and the Project Description File (Items to be entered in the attached file), which is the second part.

The Principal Investigator should prepare the Proposal for Grant-in-Aid (PDF file) by entering the application information (Items to be filled in on the form on the website), and by uploading the separately prepared Project Description File (Items to be entered in the attached file) to the Electronic Application System. Then he or she should submit (send) the Proposal for Grant-in-Aid to the research institution he or she belongs to, by the deadline set by the research institution.

Details on the preparation of the Proposal for Grant-in-Aid and the way how to apply are as follows. The applicant should verify this information.

(1) Preparing the Proposal for Grant-in-Aid

When applying, the applicant should access the Electronic Application System using the e-Rad ID and Password that is provided by the research institution and prepare the Proposal for Grant-in-Aid.

On the Proposal for Grant-in-Aid

A proposal for grant-in-aid consists of the following two parts:

First part: Enter the application information (to be entered in the website) (*1) in the electronic application system.

(*1) Information to be entered by the Principal Investigator in the website via the electronic application system includes the title of proposed project, basic data on the proposed project, like the budget for which the application is made, basic data on the project members, etc.

Second part: Download the project description file (*2) from the section "Grants-in-Aid for Scientific Research - KAKENHI" of the JSPS website (http://www.jsps.go.jp/j-grantsinaid/index.html), and prepare the proposal for grant-in-aid (PDF file) by uploading it to the "electronic application system". (Paper-based applications will not be accepted.)

(*2) Details on the research project including the purpose of the research, the research plan and research methods should be entered.

	Proposal for G	rant-in-Aid
Passagrah aatagawa	First part	Second part
Research category	Application information (to be entered in the website)	Project Description File
Specially Promoted Research (New) (English Version)		S-1-1 (1)
Specially Promoted Research (New) (Japanese Version)		S-1-1 (2)
Specially Promoted Research (Continued)		S-1-2
Scientific Research (S)		S-1-6
Scientific Research (A) Research related to the screening panel for "General"		S-1-7
Research related to the screening panel for "Overseas Academic Research"		S-1-9
Scientific Research (B) Research related to the screening panel for "General"	To be entered in the	S-1-7
Research related to the screening panel for "Overseas Academic Research"	electronic application system	S-1-9
Research related to the screening panel for "Generative Research Fields"		T-1-1
Scientific Research (C) Research related to the screening panel for "General"		S-1-8
Research related to the screening panel for "Generative Research Fields"		T-1-2
Challenging Exploratory Research		S-1-10
Grant-in-Aid for Young Scientists (A)		S-1-12
Grant-in-Aid for Young Scientists (B)		S-1-13

** The form for the Project Description File (Items to be entered in the attached file) can be downloaded from the section "Grants-in-Aid for Scientific Research - KAKENHI" of the JSPS website (http://www.jsps.go.jp/j-grantsinaid/index.html) even before the obtaining of the e-Rad ID and password.

(2) Application via the Electronic Application System

- 1) For "Specially Promoted Research", researchers who apply as Principal Investigators should prepare the Proposal for Grant-in-Aid (PDF file) by entering the Application Information (Items to be filled in on the form on the website), and by uploading the separately prepared Project Description File (Items to be entered in the attached file) to the Electronic Application System, based on the "Procedures for Preparing and Entering a Proposal for Grant-in-Aid for Specially Promoted Research (New/Continued)".
- 2) For the other research categories, they should prepare the Proposal for Grant-in-Aid (PDF file) by entering the Application Information (Items to be filled in on the form on the website), based on the "FY2014 Procedures for Preparing and Entering Application Information (to be entered in the Website) (Scientific Research (S/A/B/C), Challenging Exploratory Research, and Grant-in-Aid for Young Scientists (A/B))", and by uploading the separately prepared Project Description File (Items to be entered in the attached file) to the Electronic Application System, based on the "Procedures for Preparing and Entering a Proposal for Grant-in-Aid" for the specific research category (screening division) they are applying for.
- 3) A copy of the proposal for grant-in-aid <u>in black-and-white (gray scale) print</u> is sent to the screening committee. Therefore, when preparing the proposal for grant-in-aid, the applicant should pay attention not to make a version of which the content becomes unclear when copied.
- 4) The research institution to which the Principal Investigator belongs collects and submits the Proposals for Grant-in-Aid.
 - Therefore, Principal Investigators should submit (send) their application forms to the research institution to which they belong by the deadline set by the research institution in question. (It is not possible to submit (send) the application forms directly to JSPS.)

Moreover, when submitting (sending) the forms, applicants should sufficiently verify the contents of the Proposal for Grant-in-Aid (PDF file) that they prepared, and subsequently perform the "check completed and submission" process. (This means that they should submit the Proposal for Grant-in-Aid (PDF file) to the research institution to which they belong.) Furthermore, it is not possible to make corrections or other modifications to the Proposal for Grant-in-Aid (PDF file) of each planned research for which the research institution has already performed the "approval" process.

5) The personal information included in the Proposal for Grant-in-Aid will be used to eliminate unreasonable reduplication and excessive concentration of competitive funds and to carry out service on KAKENHI. (This also includes offering personal information to external private enterprises in charge of electronic processing and management of the data.) The personal information included in the application forms will also be provided to the e-Rad. (It may happen that information will be supplied to the Cabinet Office through e-Rad. Moreover, the applicant may be requested to cooperate in various kinds of work, the verification of information and other matters, in order to prepare this information.)

Moreover, information concerning adopted research projects (title of proposed project, name of the Principal Investigator, amount planned to be provided, etc.) is considered to be "information planned to be made public", as laid down in Article 5, paragraph 1, item 1 of the "Act on Access to Information Held by Independent Administrative Agencies" (Act No. 140 of 2001). This information will be disclosed through press release materials, the database of the National Institute of Informatics, and other means.

Information like professional affiliation, name, etc. of the Principal Investigator of the selected research project will be entered in the database of JSPS screening committee candidates, as the need arises. A request for updating the database will be made annually through the research institution to which the Principal Investigators belong (planned for April).

Issues that Need to Be Considered When Preparing the Proposal for Grant-in-Aid

When preparing the Proposal for KAKENHI, the applicant should check the following points and verify whether there no flaws in the content.

1. Whether or not it is an Ineligible Research Project

The following research projects are not eligible:

A) Research projects which merely aim at purchasing ready-made research equipment.

- B) Research projects which aim at producing large-size research equipment and similar things which should be funded by other budgets.
- C) Research projects which directly aim at developing and selling goods and services (including market trend surveys on the development and sale of goods and services).
- D) Funded research which is carried out as commercial business.
- E) Research projects with a budget of <u>less than 100,000 yen</u> in any of the fiscal years of the research period.

2. Whether the following requirements are met for the Project Members

When necessary, the Principal Investigator (See page 49 1)) can set up a team of project members together with a Co-Investigator (*kenkyū-buntansha*) (See page 50)), a Co-Investigator (*renkei-kenkyūsha*) (See page 50 3)), and/or a Research Collaborator (See page 51 4), according to the nature of the research project.

Moreover, <u>regarding the Co-Investigator</u> (*kenkyū-buntansha*) and the <u>Co-Investigator</u> (*renkei-kenkyūsha*), like in the case of the Principal Investigator, the research institution (^{Note}) needs to verify whether, at the time of the application, the following requirements are met.

However, Research Collaborators do not necessarily need to be registered in e-Rad.

Furthermore, if JSPS Research Fellows (SPD, PD or RPD) meet the following application requirements in their host research institutions, they can also participate in research projects as Co-Investigators (kenkyū-buntansha) or Co-Investigators (renkei-kenkyūsha). In such cases, there are no restrictions on the research categories in which they can participate.

Moreover, JSPS Research Fellows (DC), Foreign JSPS Fellows and students, such as, for example, graduate students cannot become Principal Investigators. They can neither become Co-Investigators (*kenkyū-buntansha*) and Co-Investigators (*renkei-kenkyūsha*).

Requirements

- 1) The researcher should belong to the research institution as a person who has inter alia the duty to perform research activities within the research institution in question (irrespective of whether the work is paid or unpaid, full-time of part-time. Moreover, it is not necessary for the researcher to perform these research activities as such as his or her main duty.)
- 2) The researcher should actually be engaged in research activities at the research institution in question (This does not apply to cases where he or she is only engaged as a research assistant.)
- 3) The researcher is not a graduate student or any other category of student. (However, this

does not apply to persons who have a position consisting of conducting research activities in the research institution to which they belong, as their main work (e.g., university teaching staff, researchers from companies, etc.), and who also have a student status.)

Note: Research institutions as prescribed in Article 2 of the Rules for the Handling of Grants-in-Aid for Scientific Research (announced by the Ministry of Education)

(References) Requirements that need to be met by the research institution(see page104) Requirements

- If a KAKENHI is given, the research activity should be conducted as an activity of the research institution in question.
- · If a KAKENHI is given, the research institution should carry out the management of the KAKENHI.

Research grant employees, as a rule, need to concentrate on their employment related work according to their employment contracts. Therefore, considering the working hours they need to allot to the employment related work, they cannot apply for Grants-in-Aid for Scientific Research themselves.

However, if they provide a clear explanation on the time they can spend besides their employment related work, and if during this time they themselves attempt to conduct research using a Grant-in-Aid for Scientific Research, on their own initiative, it is possible for them to apply for Grants-in-Aid for Scientific Research, on condition that the following points have been verified in the research institution. In this case, they can apply as Principal Investigator, and they can also become Co-Investigator (*kenkyū-buntansha*), Co-Investigator (*renkei-kenkyūsha*), or other project members.

- It has been determined in the employment contract that research grant employees themselves can conduct research on their own initiative, besides the employment related work.
- The employment related work and work devoted to research that they conduct themselves
 on their own initiative has clearly been divided in the working hours and the effort.
- Time that can be allotted to research which they attempt to conduct themselves on their own initiative has sufficiently been secured, besides the time spent for employment related work.

Principal Investigators and Co-Investigators (*kenkyū-buntansha*) are members of funded projects, as stipulated in the Law on the Improvement of the Administration of the Budget for Grants-in-Aid (1955, Law no. 179), and it has been decided that, in case they commit inappropriate use of the grants-in-aid or the like, no KAKENHI will be offered, for a fixed period of time.

In addition, it may happen that researchers are treated as indicated below, even if their researcher information has been registered in e-Rad as "Eligible to Apply for Grants-in-Aid for Research".

- If it is judged in the research institution to which researchers belong that it is not appropriate to let them conduct their research activities as activities of the research institution in question, it may happen that the research institution does not recognize the application, and it may happen that the application for funding by these researchers in question is not recognized and that the application for funding of the KAKENHI is rejected.
- No KAKENHI will be funded, if there is a new application for Grants-in-Aid for Scientific Research from researchers who do not submit the report on the research achievements at the end of the research, without any reason, even if their research has been adopted after screening. Moreover, if researchers have failed, without good reason, to submit the scheduled report on the research achievements, then implementation of other Grants-in-Aid for Scientific Research due to be implemented in the same fiscal year will be suspended.

1) Principal Investigator (The applicant)

- (A) The Principal Investigator is a member of a funded project and is the researcher who assumes full responsibility for the implementation of the research project (including the summarizing of the research achievements).
 - Moreover, persons who are expected to become unable to carry out their responsibility as a Principal Investigator, for example due to the loss of their applicant eligibility during the period of research, should avoid becoming a Principal Investigator. (See note.)
- (B) When setting up a team of project members, the Principal Investigator should without fail collect a "Written Consent of the Co-Investigator (kenkyū-buntansha) (for other institution)", in case the Co-Investigator (kenkyū-buntansha) in question belongs to a different research institution, or a "Written Consent of the Co-Investigator (kenkyū-buntansha) (for same institution)", in case the Co-Investigator (kenkyū-buntansha) belongs to the same institution, and retain it.

(Note) The Principal Investigator is the researcher who assumes full responsibility for the implementation of the research plan, and thus plays a central role. Persons who, at the time they apply, are expected to lose their eligibility to apply during the research period, due to retirement or other reasons, and thus become unable to carry out their responsibility, are requested to avoid becoming a Principal Investigator.

For this reason, replacements of Principal Investigators will not be accepted anymore.

However, for "Summarizing Group Research Projects" of "Scientific Research on Innovative Areas (Research in a proposed research area)", it may happen that, after completion of the necessary procedures, replacements of Principal Investigators (or Principal Investigator of Innovative Areas) are accepted.

(C) Apart from registration in e-Rad of the information on the researchers as "Eligible to Apply for KAKENHI", it is essential that Principal Investigators are not designated as ineligible for receipt of funding in FY2014, because they committed fraudulent use, fraudulent receipt of grants or fraudulent acts using KAKENHI or other competitive funding.

2) Co-Investigator (kenkyū-buntansha)

(A) The Co-Investigator (*kenkyū-buntansha*) is a member of the funded project, and engages in research activity, collaborating with the Principal Investigator in the implementation of the research project and sharing the responsibility for the implementation of the research as a funded project. He or she has to receive a share of the grant-in-aid. (Even when the Co-Investigator (*kenkyū-buntansha*) belongs to the same research institution as the Principal Investigator, he or she should be allotted a share of the expenses.)

Moreover, a person who is expected to become unable to carry out one's responsibility as a Co-Investigator (*kenkyū-buntansha*), for example due to the loss of one's applicant eligibility during the period of research, should avoid becoming a Co-Investigator (*kenkyū-buntansha*).

(B) Apart from registration in e-Rad of the information on the researchers as "Eligible to Apply for KAKENHI", it is essential, in the same manner as for Principal Investigators, that Co-Investigators (*kenkyū-buntansha*) are not designated as ineligible for receipt of funding in FY2014, because they committed fraudulent use, fraudulent receipt of grants or fraudulent acts using KAKENHI or other competitive funding.

3) Co-Investigator (renkei-kenkyūsha)

(A) The Co-Investigator (*renkei-kenkyūsha*) is a researcher who participates in the research project as a project member, under the responsibility of the Principal Investigator and the Co-Investigator(s) (*kenkyū-buntansha*).

Since the Co-Investigator (*renkei-kenkyūsha*) is not a member of the funded project, he or she cannot receive a share of the KAKENHI, and cannot use subsidies on his/her own initiative.

(B) It is essential that Co-Investigators (*renkei-kenkyūsha*) register the information on the researchers in e-Rad as "Eligible to Apply for KAKENHI", in the same manner as for Principal Investigators and Co-Investigators (*kenkyū-buntansha*).

** The difference between "Co-Investigator (*kenkyū-buntansha*)" and "Co-Investigator (*renkei-kenkyūsha*)" is a difference related to the positioning in the KAKENHI system. It does not refer to the relative importance of the researchers' relative roles in the research activity.

4) Research Collaborator

(A) A Research Collaborator is somebody who cooperates in the implementation of a research project other than the Principal Investigator, the Co-Investigator (*kenkyū-buntansha*) and the Co-Investigator (*renkei-kenkyūsha*).

(For example, a postdoctoral researcher, a research assistant (RA), a Fellow of the Japan Society for the Promotion of Science (JSPS Research Fellow) (a DC, or a SPD, PD or RPD who does not meet the application requirements in his or her host research institution), a researcher who belongs to an overseas research institution, a researcher who works for a corporation that is not recognized according to Article 2 of the Rules for the Handling of Grants-in-Aid for Scientific Research, other persons offering research support, such as technical experts and intellectual property specialists, etc.)

(B) It is not necessary for Research Collaborators to register the information on the researchers in e-Rad as "Eligible to Apply for KAKENHI".

3. Whether the following requirements are met for the Budget

1) Eligible costs (direct costs)

The budget necessary for the implementation of the research plan (including the budget necessary for summarizing the research achievements) is eligible.

* In case of research projects where in any of the fiscal years any of the costs like "equipment", "travel expenses" or "personnel expenditure and remuneration" exceeds 90%, the applicant should write down in the proposal for

grant-in-aid the reasons why these costs in question are necessary for the implantation of the research.

2) Ineligible costs

The following costs are not included in the funding:

- A Costs for buildings and other facilities (excluding the costs for minor installations which became necessary because of the introduction of goods that have been purchased by means of direct costs)
- B Costs for handling accidents or disasters that occurred during the implementation of funded project
- C Personnel expenditure and remuneration for the Principal Investigator or Co-Investigator(s) (kenkyū-buntansha)

D Other costs which fall under indirect costs*

* Indirect costs are costs necessary for the management of the research institution and other things that arise during the implementation of the research project (corresponding with 30% of the amount of the direct costs). The costs are used by the research institution.

This time, it is scheduled to set up indirect costs for the research categories for which a call for proposals is organized. However, the Principal Investigator does not need to state those indirect costs in the application documents.

4. When applying, the applicant should select a desired area for screening as follows

1) In the case of an application for "Specially Promoted Research"

When applying, please make sure to select, according to the content of the research project, one desired area for screening from "Humanities and Social Sciences", "Science and Engineering" or "Biological Sciences". Moreover, if you select "Science and Engineering", please select one screening division from the subcategories "Mathematics/Physics", "Chemistry", or "Engineering", which you think is the most closely related to your research project.

2) In case of an application for "Scientific Research" (screening division "General"), "Challenging Exploratory Research" and "Grant-in-Aid for Young Scientists (A)"

When applying, please make sure to <u>select</u>, according to the content of the research project, <u>one</u> <u>appropriate research field</u> from Attached Table 2 "List of Categories, Areas, Disciplines and Research Fields for FY2014 Grants-in-Aid for Scientific Research" (hereinafter called "List of Research Fields"; see pages 55-57), which is a classification table showing the desired areas for screening. In addition, please make sure to <u>select one keyword which the applicant thinks is the most closely related to the content of his/her research project within the selected research field from Attached Table 3 "Appendix Table of Keywords" (hereinafter called "Table of Keywords";</u>

see pages 62-98).

About the "List of Disciplines and Research Fields with a Time Limit" (special cases in "Scientific Research (C)")

In order to be able to react flexibly to trends in scientific research, a "List of Disciplines and Research Fields with a Time Limit" (see pages 58-61), has been set up, as a table separate from the "List of Research Fields". This list is operated in a flexible way, within the limits of a set period. Only for research projects that fall into the category of "Scientific Research (C) (General)", one area can be selected as a desired area for screening from this "List of Disciplines and Research Fields with a Time Limit". Moreover, the research period is 3 to 5 years, regardless of the set period of the research area.

3) In case of an application for "Grant-in-Aid for Young Scientists (B)"

When applying, please make sure to <u>select</u>, according to the content of the research project, <u>one or</u> (<u>if you desire screening in multiple areas for new and merged research plans</u>) two appropriate <u>research fields</u> from the "List of Research Fields", which is a classification table showing the desired areas for screening. In addition, please make sure to select from the "Table of Keywords" <u>one keyword which you think is the most closely related to the content of your research project within the selected research field, <u>if you selected one research field</u>, <u>OR one keyword for each research field</u>, one by one (i.e. two in total), <u>if you selected two research fields</u>.</u>

- Outline of the screening of research plans for which two research fields have been selected
 - In the same manner as for research plans for which one research field has been selected, two-stage screening will be carried out.
 - During the first stage of the screening, the first-stage screening committee members (judges) for "Grant-in-Aid for Young Scientists (B)" will carry out a document-based screening for each of the two selected research fields.
 - During the second stage of the screening, a collegial screening will be carried out, based on the screening results of the first stage, by screening committee members (judges) who are different from the first-stage screening committee members. This collegial screening will take place in committees that are different from the committees that screen the research plans for which one research field has been selected. More specifically, these committees are, first, a committee for each of the four categories (i.e. Comprehensive Fields, Humanities and Social Sciences, Science and Engineering, Biological Sciences) that only screens research plans for which two research fields have been selected and, or, secondly, a committee that screens research plans in which research fields that exceed the four categories have been selected.

4) In case of an application for "Scientific Research" (screening division "Overseas Academic Research")

When applying, please <u>make sure to select one area</u> you wish to have screened from the following 17 areas, and <u>one research field</u> which you think is the most closely related to your research project.

	Desired area for screening
	1) Humanities A (philosophy, literature, linguistics, the arts)
Humanities	2) Humanities B (history, archaeology)
and Social	3) Humanities C (human geography, cultural anthropology)
Sciences	4) Humanities D (Geography, Area studies, and others which do not fall under
	Humanities A, B, or C)
	5) Social Sciences A (law, Politics)
	6) Social Sciences B (economics, business administration)
	7) Social Sciences C (sociology)
	8) Social Sciences D (psychology, education)
	9) Mathematical and physical sciences A (earth and planetary science)
Science and	10) Mathematical and physical sciences B (mathematics, physics, and others which
Engineering	do not fall under Mathematical and physical sciences A)
	11) Chemistry
	12) Engineering
	13) Biology
Biological	14) Agricultural sciences A (plant production and environmental agriculture,
Sciences	agricultural chemistry, forest and forest products science, boundary agriculture)
	15) Agricultural sciences B (agricultural science in society and economy,
	agro-engineering, animal life science, applied aquatic science)
	16) Medicine, dentistry, and pharmacy A (pharmacy, basic medicine, boundary
	medicine, and society medicine)
	17) Medicine, dentistry, and pharmacy B (clinical medicine, dentistry, nursing, and
	others which do not fall under Medicine, dentistry, and pharmacy A)

5) In case of an application for "Scientific Research" (screening division "Generative Research Field")

When applying, please make sure to <u>select one area</u> you wish to have screened from the three areas in Attached Table 4. Moreover, the period of the invitation for applications for each area is fixed from the fiscal year of the establishment until the third fiscal year. The research period in the first fiscal year of the set period is three to five years, in the second fiscal year of the set period, it is three to four years, and in the third fiscal year of the set period, it is three years.

The first stage of the screening of the research fields that have the indication "A" or "B" in the remarks column is carried out in separate groups. The basis for this division in separate groups is the keywords that need to be selected within each research category. Make sure to select A or B based on the Attached Table "List of Categories, Areas, Disciplines and Research Fields", when applying for these research fields.

The first stage of the screening of the research fields that have the symbol "%" is carried out in separate groups. The basis for this division in separate groups is the keywords that need to be selected within "Scientific Research (C)". Make sure to select a division number from 1 to 5 based on the Attached Table "List of Categories, Areas, Disciplines and Research Fields", when applying for these research fields. For research fields that include A% or B%, choose either A or B and division number 1 or 2.

In the case of "Scientific Research (C)", 15 research fields carried in the "List of Disciplines and Research Fields with a Time Limit" have been set up as areas for screening, besides the main table.

(2) Grants-in-Aid for Scientific Research FY2014 List of Categories, Areas, Disciplines and Research Fields

O List of Disciplines and Research Fields with a Time Limit

Area	Detail	Item Number	Set Period
Integrated Nutrition Science	Nutrition science has contributed greatly to health promotion and improvement of physical strength/shape through the understandings of physiology, nutrients, and metabolism necessary for growth and maintenance of life. However, new issues such as overeating, food satiation, lifestyle-related diseases, stress, and aging, have been emerged. Recent advances in life science and analytical informatics technology enabled new approaches in this field: molecules, cells, laboratory animals to human population can now be included for research design. In order for such expansion in nutrition science to accelerate, establishment of a cross-sectoral research community beyond the existing frame, including eating habits studies, applied health science, food science, and clinical medicine is required. The goal of this new research field is to contribute toward maintaining/promoting health, preventing diseases, and potentiating therapeutic effects in the complex and diverse modern society. A broad range of studies with aim to build the platform of nutritional science and put the accomplishment into practice is encouraged. Nutrition science has contributed greatly to health promotion and improvement of physical strength/shape through the understandings of physiology, nutrients, and metabolism necessary for growth and maintenance of life. However, new issues such as overeating, food satiation, lifestyle-related diseases, stress, and aging, have been emerged. Recent advances in life science and analytical informatics technology enabled new approaches in this field: molecules, cells, laboratory animals to human population can now be included for research design. In order for such expansion in nutrition science to accelerate, establishment of a cross-sectoral research community beyond the existing frame, including eating habits studies, applied health science, food science, and clinical medicine is required. The goal of this new research field is to contribute toward maintaining/promoting health, preventing diseases, and potentia	9047	FY2011 — FY2014
Regenerative medicine	Human beings are composed of many organs and various types of cells within. These cells must self-renew themselves even after birth as well as during development, to maintain the homeostasis of the organ and to maintain their life against various environmental stresses. Regenerative medicine intends to repair and regenerate the damaged tissue/organ by manually controlling the self-renewing system, which resides endogenously in the organisms. Three-step approach, which includes in vitro, in vivo, and translational researches, is required for clinical application of the regenerative medicine. Identification of the cell-type specific differentiation factor and the establishment of the cell-type specific protocol for effective differentiation factor and the establishment of the cell-type specific protocol for effective differentiation and purification system using somatic stem cells, embryonic stem (ES) cells, and induced pluripotent stem (iPS) cells are the important goals of in vitro researches. Thereafter, in vivo approaches using laboratory animals is important to establish the method to deliver the cells and to keep them alive and functional at the damaged lesion, in order to re-organize the damaged organ within the living organisms. To reach the final goal toward the clinical application, in vitro and in vivo findings should be gathered and translated into clinical medicine. Immunologic problem, such as rejection, or the differences in the organ size between experimental animals and humans are the challenges that should be solved in translational researches. Development of tissue engineering technology is one of the helpful candidates for solving those problems. Regenerative medicine is expected to become a new hope for the patients of refractory disorders such as heart diseases and neurodegenerative diseases. Moreover, regenerative medicine could reduce the inflated healthcare cost, which is becoming a big economic issue in the advanced country, by improving the quality of life of the elderly in the graying	9048	

Area	Detail	Item Number	Set Period
Care Studies	The twenty-first century is expected to be a "century of care", faced with such problems as an aging society coupled with a declining birthrate, ethical issues in medical treatment and nursing, mental difficulties suffered by people of all ages, and other issues. The English word "care" has been translated into various Japanese words which refer to nursing, care-giving, care-taking, treatment, consideration, concern, etc., and these Japanese words had been used and discussed separately in diverse fields such like medical treatment, nursing, care-giving, welfare, psychology, education, ethics, philosophy, etc. Recently, however, the original word "care" came to be used in a broader sense, out of the necessity, for cross-field discussions, so as to avoid limiting the problems to a particular field by using a specific Japanese term. From the 1980s on, research on "cross-field" care emerged, and this trend rapidly developed after the enforcement of the Nursing Care Insurance in 2000. It is hoped that care studies will be established as an independent area of study through multi-disciplinary participation by researchers of various scholarly fields, which include not only clinical investigation and on-the-spot investigation, but also fundamental theoretical research based on investigation of the literature and international academic exchange. JSPS is expecting research that will contribute significantly to the development of this field.	9049	
Cultural Research	This category includes broad research areas in the humanities and social sciences with special reference to language and culture. These are interdisciplinary research fields such as research in culture, cultural studies, cultural history, comparative culture (comparative literature), cross-cultural understanding/international understanding,international exchange, history of cultural interexchange, nationalism,post-colonialism, identity, migration and so forth. This category does not exclude fields where sociological,economical and legal knowledge methodology and interest is involved, and encourages a broadened approach with the possibility of interdisciplinary research. For example, within research on nationalism, it may be necessary to include considerations of research on culture, sociology, politics and law, among others, but in addition to consideration of research results from other fields, this kind of research should increase the possibilities of interdisciplinary research while it absorbs the various results and outcomes of cultural research to contribute to the positive development of the field.	9050	FY2012
Land, Housing and Real Estate Study	In our modern society of aging and decrease of birthrate, the research on the land, housing and real estate is extending to cover the vitalization in city center, community development, vitalization in urban and regional area, property market, real estate finance, valuation of real estate, bad debt problem, real estate securitization. The land, housing and real estate, whose values are occupying large portion of our gross national wealth, need to be appropriately evaluated and efficiently used by households, firms, and public organizations for improving our quality of life. This subject expects the inter-disciplinary study of economics, urban planning/social engineering, law, social welfare, sociology, psychology, political science, architecture, and housing e.t.c.	9051	
Measurement Science and Technology in Omics	As a newly emerging area of study in natural sciences, "Measurement Science and Technology in Omics" deals with measurement principles and techniques in omics sciences, which include proteomics, metabolomics (biological and natural objects, cells and etc.), metabonomics (pharmacology), glycomics, lipidomics, metallomics, adductomics, genomics, transcriptomics and combined omics (e.g., glycoproteomics). The suffix -ome as used in molecular biology refers to a totality of some sort, and the related suffix -omics is used to address the objects of study of such fields. Hence, "Measurement Science and Technology in Omics" is based on identification and analyses of molecules in a wide range of scientific fields. Each omics has its own molecular characteristics and requires intrinsic measurement techniques. For example, sugar chains are different from chains of lipids and those of peptides/protein. Measurement techniques in this area include non-destructive measurement, visualization/imaging analyses, on-site measurement, spectroscopy, mass spectrometry, ion measurement, and laser measurement, including information processing of measured data. Mass spectrometry research in this area covers qualitative and quantitative analyses, structural analyses, functional analyses, molecule-based analyses, and their application research. We are looking forward to receiving many good proposals which will greatly contribute to this area of research.	9052	

Area	Area Detail			
Space life science	Space life science is a research field rich in originality and covering a wide range of sciences such as astrobiology which uses space environment for studies on the origin of life, gravity-and radiation-biology which aim to clarify adaptation and survival mechanisms of microbes, plants and animals, and human, by bringing them to the space environment definitely different from the earth, and engineering, medical and agricultural sciences necessary for experiment performance and human expeditions in the space. It is anticipated that experiments accomplished in the space environment will elucidate the fundamental mechanisms by which diverse organisms arose, adapted and evolved on the earth. Besides, space life science is the only current discipline that can deal the issues related to promotion of space development and utilization, environmental preservation from extraterrestrial view points, education for next generations of space ages. We are eager for the challenging proposals that would greatly contribute to the advancement of this field.	9053	FY2012	
Sleep Science	Sleep science comprises multidisciplinary research fields ranging from basic biology (physiology, pharmacology, molecular biology, psychology and behavioral science), clinical medicine (psychiatry, neurology, respiratory medicine, otolaryngology, oral surgery, dentistry), sociology, cultural science to engineering. Sleep science has become an important research subject and has been gaining more and more attention worldwide from scientific interests as well as from social needs, partly because big traffic accidents occurred due to sleep disorders. Sleep Science We expect many highly motivated research proposals from various fields including basic research (sleep, circadian rhythms, or biological clock), clinical research (the pathophysiology and/or treatment of sleep abnormalities, parasomnia, or sleep disorders), sociology, engineering and cultural science.			
Natural Disaster Issues and Humanities/Social Sciences	Large natural disasters, such as the Great East Japan Earthquake, cause immense human loss and material damage, posing various risks to Japanese society. To overcome these risks, research centered on civil engineering and construction is, of course, needed to get a grasp of the damage that can be caused to the physical environment and infrastructure and to devise measures for their restoration and reconstruction. Of concomitant importance is a need to advance systematic research on socio-economic damage and measures for its recovery and reconstruction as well. Required for this purpose are a diversified research approach with cross-disciplinarity, sustained research support, capability to respond to a wide expanse of affected areas and damage regionality, and an enhanced knowledge base for supporting restoration and mitigating damage in the future. To this end, thematic research on "earthquake disaster issues" will need to be advanced across a spectrum of humanities and social sciences fields. In this area, research will need to be undertaken in fields that do not fit neatly within existing research field categories. As research will need to be advanced from new perspective, an opportunity is accorded to systematically establish a new domain oriented to disaster issues within the humanities and social sciences. A strong demand to do this opens up opportunities for research that transcends topic setting within existing fields and enables research advancement and knowledge sharing across fields of the humanities and social sciences in ways that make it possible to gain a full-scope, cross-disciplinary grasp of earthquake damage and restoration.	9055	FY2013 _ FY2015	

Area	Item Number	Set Period	
Reconstruction Agriculture	The Great East Japan Earthquake left as teachings that the subdivided conventional agriculture research was not able to respond quickly and comprehensively to social needs on restoration and revival from an unexpected catastrophic natural disaster. We are anxious about not only catastrophic natural disasters, such as an earthquake, a volcanic eruption, and local severe rain but also the environmental degradation in the forest, arable-land, coastal region and sea areas used as the base of the agriculture, forestry and fisheries by a global weather change and community development. Furthermore we are anxious also about the infection damage caused by foot and mouth disease, BSE, avian flu, etc. In order to make environmental preservation and population support for human beings to develop, it is clearly important to maintain the continuous activity of agriculture, forestry and fishery. Therefore, it is necessary to restore and reproduce the agriculture, forestry and fishery environments where they were damaged and deteriorated and to develop production system based on the interaction between land area and hydrosphere. Furthermore, it is required to develop the consistent production technology in the limited resources and various unstable environments. An environmental indicator living thing also needs to be used for evaluation of environmental perturbation efficient. Moreover, it also becomes important approach to search for and use the various functions of the animals, plants and microbes in the ecosystem of the area. In the field of reconstruction agriculture, the proposals of the research task which can serve as an element to contribute for the sustainable development of agriculture, forestry and fisheries are expected from an interdisciplinary viewpoint. Furthermore, revival, reproduction, and development of agriculture, forestry and fisheries can be expected to execute an application subject in the future. The field of reconstruction agriculture includes following research subjects as example. Construction of	9056	FY2013 FY2015
Public Policy	Public policy research entails economic policy, urban planning and disaster-response policy on both the central and regional levels. A wide definition also includes policy, strategy, implementation and assessment stratums. Many of the research papers published in the reports, journals and bulletins of the Public Policy Studies Association JAPAN over the past 15 years can be attributed to the fields of law, political science and economics. What can also be seen in them is the emergence of a new research field called policy economics, created through collaboration and linkage among existing disciplines. One typical example of such merger is a field born out of collaboration between law and economics. Political economics became main stream for at least some period of time in the worldwide political science domain. Public economics advanced around the field of economics (by James M. Buchanan and others) has become a required component of high-level political-science education. In public policy literature, its formation process is the object of political-science analysis. Regarding policy concepts, results of public policy has been produced in various research areas, including, economics, welfare, the environment and urban planning. In actuating these results, only when various policies, laws, ordinance and rules are established on the central and local government levels, they give it generality. Furthermore, when the validity of public policy comes into question, judicial precedents in the courts are analyzed. A trend can be seen in an expansion of the social sciences under the name of public policy, which merges existing disciplines with disciples in a variety of other research domains. Collaboration and linkage among the fields of social sciences can elevate the standard of research in each of them, and potentially lead to the creation of new research fields. The key words in the public policy domain include law and economics, political economics, policy assessment, urban planning, welfare policy, environmental p	9057	

(Note 1)
This table, in combination with the main table, applies only to "Scientific Research (C)", screening division "General".
(Note 2)
The set period is the fiscal year when the call for proposals is organized. Notwithstanding the set period, research projects of 3 to 5 years are being

sought.

Attached Table 3 Appendix Table of Keywords

"Categories, Areas, Disciplines and Research Fields"

1) The first stage of the screening of the research fields followed by A or B in each category of the division column is carried out in two separate groups. The basis for this division in two groups is the keywords shown in all the research categories (except for "Overseas Academic Research"). Make sure to select A or B based on the keyword, when applying for the research fields in the list.

2) The first stage of the screening of the research fields followed by the numbers 1 to 5 in each category of the division column is carried out in separate groups. The basis for this division in separate groups is the keywords shown in "Scientific Research (C)". Make sure to select a number from 1 to 5 based on the keyword, when applying for the research fields in the list for "Scientific Research (C)". For research fields that include ※A or ※B, choose either A or B and division number 1 or 2.

Attached Table 4 Generative Research Fields

OFields Designated for FY2014 Recruitment

Area	Detail	Area Number	Set Period
Neo- Gerontology	The percentage of the population aged 65 or older in Japan exceeds 23%, the highest in the world. Japan's "aging society" is about to enter a new stage that mankind has never experienced, so many of the problems that Japan is likely to face are at the world's forefront. Up until recently, research on issues related to aging has been conducted in the field of gerontology. It has been pointed out, however, that studies that treat the over-65 as a homogenous group with declining conditions have limitations. Certainly, there are frail people who need social support and care, but there are also healthy elderly who are physically fit, maintain economic independence, and continue to exhibit leadership and cultural vigor. Thus, the elderly are not monolithic but rather a diverse group of people, so basic scientific research must be advanced that is premised on recognition of important variations among them. Such research should explore, in a detailed and precise manner, whether apparent correlations between various aging attributes and indicators are merely pseudo-correlations, cause-and-effect related, or individual phenomena. With this background in mind, we have established a new research field, "Neo-Gerontology," which works to capture evolving academic trends that point to heterogeneity among the elderly. To adapt to the reality of an aging society, we will need to redefine the role of older people and reexamine how they are situated within the structure of society. The transformation of the society, in which the elderly are of course part, should itself be readdressed. It will also be necessary to question, from a philosophical point of view, what aging is/means. We, thus, welcome challenging research proposals from all areas. They would include, for example, historical, philosophical, or comparative studies on values and richness associated with aging; folkloric and cultural-anthropological analyses of tacit knowledge as a product of accumulated life-experiences; comparative studies of aging among various coun	N001	FY2014 — FY2016
Mathematical Sciences in Search of New Cooperation	Mathematics has long been used as an indispensable descriptive language in many science fields such as physics. Even in research fields where a firm relationship with mathematics has not been established yet, a new mathematical concept might emerge in the future. In this program, we call ambitious proposals intending to find out new mathematical structures possibly hidden under complex phenomena and functions in nature, life, society, human's feelings and mind, etc. Discovery of such new mathematical concepts might link different research subjects so far thought to be unrelated, and will eventually contribute to establish a new research field. Numerous possibilities would exist in such studies. Toward this goal, we believe it essential to set up new possible targets based on bottom-up collaborations between researchers of mathematics and of other fields. In the course of these efforts, many unexpected results are expected to emerge. Because of this reason, we recommend the proposal made by a collaborative team consisting of researchers of mathematics and of other fields, no matter who is a principal investigator. Ambitious proposals from researchers in established fields intending to step forward toward an entirely new direction in collaboration with researcher of mathematics are also encouraged. We enthusiastically welcome new, inventive, and unexpected proposals from all academic areas, which may be regarded as being out of consideration in the scheme of current academic fields.	N002

Food Cycle Research	Stable, secure and sustainable food production and supply form the basis of human existence and prosperity. Naturally, food production depends on the quality and availability of sun, water and arable land. So far, humanity has maintained food production by means of circulating natural resources. Currently, Japan can consider itself blessed with sufficient sun, water and arable land. However, we must address concerns about increasing risks associated with global climate change, natural catastrophes, the depletion of water resources, damages to the marine environment and depletion of fisheries. In addition, the rapid rise of the global human population also carries the danger of overwhelming the food supply. Furthermore, social factors, including agricultural policy, land and water use, energy consumption of food generation and transportation, as well as national food security are cause for concern. Food production relies on sustainable use of "immovable" arable land and water. The emerging problems threatening sustainable food production make research into maintenance of natural resources necessary. Projects should cover a comprehensive area of related issues, pertaining to the current picture of food production, including animal feed and exploration of potential productivity increases. To name a few, investigations into the water cycle across forests, arable land, rivers, lakes and the sea, the organic and inorganic material cycles to secure soil quality, as well as the role of plants and animals, insects and microorganisms in food production would be of importance. Studies should also provide methodologies for sustainable use of fertilizer and fieldwork into agrochemicals and other means of severing natural circulation. This is of special importance as natural nitrogen circulation remains insufficient for agricultural production. In addition, experimental approaches in laboratories or at research farms to allow proof of concept testing obtained from combined survey studies should be investigated. Beyond scien	N003	FY2014 FY2016

(Note 1)
This table applies only to the screening division "Generative Research Fields" within the categories "Scientific Research (B)" and "Scientific Research (C)."
(Note 2)

For each field, applications may be submitted during the first three years of the established application period. Applications selected in the first year are given a project duration of 3-5 years; in the second year, a duration of 3-4 years; and in the third year, a duration of 3 years.

IV. Instructions & Procedures for Those Who Have Already Been Accepted

1. On the handling of research projects that are scheduled to be continued in FY2014 (hereinafter called "continued research projects").

It is not necessary to submit application forms for continued research projects. (However, in order to receive KAKENHI, it is necessary to prepare and to submit the necessary documents, like the grant application form, after receiving a notification of the informal decision to grant the funding.) Moreover, as a general rule, it is not possible to decline a continued research project and to apply for a new research project. However, the applicant should verify that, depending of the research category, the handling of research projects will be as mentioned below.

(1) Specially Promoted Research

1) If the applicant would like to make significant changes in the research project.

If the applicant would like to make significant changes in the research project, he/she needs to submit the application forms. Because the application procedure is the same as for "Preparing the Application (Proposal for Grant-in-Aid) and Submitting the Application (Proposal for Grant-in-Aid)" (see page 43), the applicant should verify it. Furthermore, when preparing the Proposal for Grant-in-Aid, he or she should select the same area as when he or she was accepted for the Desired Area for Screening.

Moreover, since, in this case, the application needs to be screened again, it may happen that the change will not be recognized and that the amount of the budget to be granted will not be granted from FY2014 on.

Moreover, a significant change to the research project can be, concretely speaking, (1) a change to the purpose of the research or a change to the title of the proposed project, (2) a change to the annual plan of the budget that is scheduled to be funded from FY2014 (except a change to the annual plan of the budget making use of the Adjustment Funds), (3) an increase or a reduction of the budget, and a shortening of the research period, etc. Please consult in advance with the Scientific Research Aid Division No. 2 of the Department of Research Projects of the Japan Society for the Promotion of Science (JSPS), in order to know whether the change the applicant wants to make falls under these categories (see "Inquiries").

(2) Research categories except Specially Promoted Research

1) If the applicant would like to make significant changes in the research project.

If the applicant would like to make significant changes in the research project, he/she needs to submit the application forms. Because the application procedure is the same as for "Preparing the Application (Proposal for KAKENHI) and Submitting the Application (Proposal for KAKENHI)" (see page 43), the applicant should verify it. Moreover, as a general rule, applications for an increase of the budget for continued research projects are not accepted. In addition, for KAKENHI (Multi-year Fund), KAKENHI (Partial Multi-year Fund) (adjustment funds) and KAKENHI (Series of Single-year Grants) using KAKENHI (Partial Multi-year Fund) grants and the Adjustment Funds, applicants can make changes to the annual plan of the research budget, depending on the needs of the research. Therefore, changes to the annual plan of the research budget that is scheduled to be granted from FY2014, do not fall under the category of significant changes in the research project.

Moreover, since, in this case, the application needs to be screened again, it may happen that the change will not be recognized and that the amount of the budget to be granted will not be granted from FY2014 on. Therefore, the applicant should consult in advance with the Scientific Research Aid Division No. 1 of the Department of Research Projects of the Japan Society for the Promotion of Science (JSPS), in order to know whether the change the applicant wants to make falls under these categories (see "Inquiries").

Moreover, even if the applicant makes significant changes in a continued research project, the KAKENHI granted will not change from the KAKENHI that was originally scheduled to be granted.

2) If the research proceeded beyond expectation, and the original attainment targets of the continued research project have already been reached

In case the applicant changes the research category and aims for a new research development (\divideontimes), because the research proceeded beyond expectation, and because the original attainment targets of the continued research project have already been reached, he or she can apply for a new research project, after submitting a Notice of Completion of Research Project and a Statement of Reason (cf. Supplementary Volume Application Forms and Data Entry)by October 24 (Thursday), 2013. (Documents that arrive later will not be accepted.)

Moreover, please note that, if the content of the Statement of Reason is deemed inappropriate by the screening panel for applications for new research projects, the research project for which a new application is made becomes ineligible for screening, and that, in this case, no funding of

- KAKENHI from FY2014 on can be requested for the continued research project that has already been completed.
- * "Cases where the applicant changes the research category and aims for a new research development" are cases where the applicant makes a change such as, for example, from "Scientific Research (C) (General)" to "Scientific Research (B) (General)". However, it also includes cases where the applicant only makes a change to the screening division, such as, for example, a change from "Scientific Research (A) (General)" to "Scientific Research (A) (Overseas Academic Research)".

2. On the Handling of Continued Research Projects in Which the Principal Investigator Has Failed to Submit the Report on the Research Achievements

In the same way as for new research projects, no KAKENHI will be funded to researchers who do not submit the report on the research achievements at the end of the research, without any reason. Moreover, it may happen that the decision to grant the funding to the researcher in question is cancelled, or that an order to return the grant is issued.

Furthermore, if researchers have failed, without good reason, to submit the scheduled report on the research achievements, then implementation of other KAKENHI due to be implemented in the same fiscal year will be suspended.

V. Instructions & Procedures for Staff of the Research Institution

A call for proposals for "Grants-in-Aid for Scientific Research KAKENHI" will be conducted together for hitherto known Grants-in-Aid for Scientific Research (hereinafter called "KAKENHI (Series of Single-year Grants)") and Multi-year Fund Scientific Research Grants (hereinafter called "KAKENHI (Multi-year Fund)").

1. Issues to Be Completed Beforehand by the "Research Institution"

(1) Requirements as a "Research Institution" and Procedures for Designation and Change In order to apply for KAKENHI, a researcher needs to belong to a "Research Institution"

Concerning the "Research Institution" cited here, the following four types of "Research Institution" have been designated as eligible in Article 2 of the Rules for the Handling of Grants-in-Aid for Scientific Research (announced by the Ministry of Education, Culture, Sports, Science and Technology).

- 1) Universities and inter-university research institutions
- 2) MEXT facilities and other institutions engaged in scientific research
- 3) Technical colleges
- 4) Institutions designated by the Minister of MEXT (See note.)

(Note) In order to become research institution, institutions not falling under 1) to 3) first need to receive the designation by the Minister of Education, Culture, Sports, Science and Technology (MEXT). Therefore, applicants should consult with the Scientific Research Aid Division of the Research Promotion Bureau of the Ministry of Education, Culture, Sports, Science and Technology (MEXT).

Moreover, if changes in one of the following items have been scheduled, institutions that have received the designation by the Minister of Education, Culture, Sports, Science and Technology (MEXT) and already have been recognized as research institution should promptly report the content of these changes to the Scientific Research Aid Division of the Research Promotion Bureau of the Ministry of Education, Culture, Sports, Science and Technology (MEXT).

- A) abolition or dissolution of the research institution,
- B) name and address of the research institution, and name of the representative,
- C) matters concerning laws, regulations, endowment acts and other rules that prescribe the purpose of establishment, the business content, and the internal organization of the research institution.

Moreover, researchers who belong to such institutions should consider that, in order to conduct research activities using KAKENHI, the research institution should meet the requirements mentioned below.

(Requirements)

- A) if a KAKENHI is given, the research activity should be conducted as an activity of the research institution in question,
- B) if a KAKENHI is given, the research institution should carry out the management of KAKENHI.

(2) Verification of the Eligibility to Apply of the Affiliated Researcher

Researchers who try to apply for KAKENHI, should meet the requirements 1) and 2) below. Therefore, they should sufficiently verify these requirements with the research institution.

From FY2014 on, if JSPS Research Fellows (SPD, PD, or RPD) meet the following application requirements in their host research institutions, they can also apply for a part of the research categories other than "Grant-in-Aid for JSPS Fellows". (Cf. "Table of Restrictions on Duplication".) In this case, the research institution should operate in a way that it recognizes applications where the research period exceeds the employment period as JSPS Research Fellow.

Moreover, JSPS Research Fellows (DC) and Foreign JSPS Fellows, graduate students or other students cannot apply, even if they hold a position in which they conduct research activities in the research institution to which they belong or in another research institution.

Researchers who try to apply for KAKENHI, should meet the Eligibility to Apply. (see page 26)

1) At the time of the application, a person needs to be recognized by the research institution to which he or she belongs to be a researcher who meets the requirements A), B) and C) below, and needs to be a researcher whose Researcher Information has been registered in e-Rad as "Eligible to Apply for KAKENHI".

(Requirements)

- A) The researcher should belong to the research institution as a person who has *inter alia* the duty to perform research activities within the research institution in question (irrespective of whether the work is paid or unpaid, full-time of part-time. Moreover, it is not necessary for the researcher to perform these research activities as his or her main duty.)
- B) The researcher should actually be engaged in research activities at the research institution in question (this does not apply to cases where he or she is only engaged as a research assistant.)
- C) The researcher is not a graduate student or any other category of student. (However, this does not apply to persons who hold a position consisting of conducting research activities in the research institution to which they belong, as their main work (e.g. university teaching staff, researchers from companies, etc.), and those who also have a student status.)

2) A person should not fall under "Not eligible for receipt of funding" in FY2014, because he or she committed fraudulent use, fraudulent receiving of grants or fraudulent acts of/with KAKENHI or other competitive funding.

Research grant employees, as a rule, need to concentrate on their employment related work according to their employment contract. Therefore, considering the working hours they need to allot to their employment related work, they cannot apply for KAKENHI themselves.

However, if they provide a clear explanation on the time they can spend besides their employment related work, and if during this time they themselves attempt to conduct research using KAKENHI on their own initiative, it is possible for them to apply for KAKENHI, on condition that the following points have been verified in the research institution. In this case, they can apply as a Principal Investigator, and they can also become Co-Investigators (*kenkyū-buntansha*), Co-Investigators (*renkei-kenkyūsha*), or other project members.

- It has been determined in the employment contract that research grant employees themselves can conduct research on their own initiative, besides their employment related work.
- The employment related work and the work devoted to research that they conduct themselves on their own initiative has clearly been divided in the working hours and the effort.
- Time that can be allotted to research which they attempt to conduct themselves on their own initiative has been secured, besides the time spent for employment related work.

(3) Registration of the Researcher Information in e-Rad

Individuals other than the Principal Investigator who try to apply, being the Co-Investigator(s) (*kenkyū-buntansha*) and the Co-Investigator(s) (*renkei-kenkyūsha*) who make up the Project Members should be individuals of whom the researcher information has been registered in e-Rad as "Eligible to Apply for KAKENHI".

Regarding the registration (renewal) of the researcher information necessary when applying, the person in charge in the research institution to which the researcher belongs should perform the procedures using e-Rad. (if there is any item, such as the institution, the position, or others, that needs to be corrected, even though he or she has already been included in the researcher list of the research institution, the applicant needs to register the correct information on the researcher list.)

For specifics on the method of registration, the research institution should verify the "Manual for Research Institutions to which the Researchers belong (for Research Institution Office Representatives and for Research Institution Office Workers)".

Moreover, concerning the registration of the researcher information in e-Rad, there is no registration

period (deadline). Therefore, registration is possible at any time.

Moreover, Since Proposals for Grant-in-Aid will not be accepted after the deadline for submission of application documents, applicants should complete the registration (the renewal) of the researcher information early, in order to have sufficient time to submit (send) them.

In order not to negatively affect the compilation of the applications within the research institution, when completing the applications, the research institution should perform the various procedures (including the procedures within the research institution), positioning this specific procedure as one of the important procedures to be performed by the research institution.

(Reference) On "Grant-in-Aid for Research Activity Start-up"

The "Grant-in-Aid for Research Activity Start-up" is aimed at supporting persons who cannot apply for the call for proposals this time, such as researchers who have just been employed by their research institutions, researchers who return from childcare leave or other kinds of leave, or other researchers.

The FY2014 call for proposals for this research category is scheduled to be issued in March 2014. Eligibility to apply is as follows:

- (1) Researchers who did not apply for this grant category because they became eligible to apply for a Grant-in-Aid after the 8 November 2013 deadline for applications under the below-listed (*) categories, openly solicited by MEXT and JSPS from September 2013.
- (2) Researchers who were unable to apply for the below-listed (*) grant categories openly solicited by MEXT and JSPS in September 2013 because they were on leave for child birth and/or infant raising in FY 2013.

(Applicants should verify the details in the Application Procedures of March 2014.)

The research institution is responsible for conducting the registration of the researcher information and other matters in e-Rad. Therefore, applicants should bear this in mind when registering researcher information that may come to fall under the above-mentioned point 1) or when carrying out other procedures.

(*) Among the Grants-in-Aid for Scientific Research for FY2014 there are "Scientific Research on Innovative Areas", "Specially Promoted Research", "Scientific Research", "Challenging Exploratory Research" and "Grant-in-Aid for Young Scientists".

(Note) Even if JSPS Research Fellows (SPD, PD, or RPD) have become eligible in their host research institutions, they cannot apply for "Grant-in-Aid for Research Activity Start-up".

(4) Verification of the ID and the Password of the Researcher Belonging to the Research Institution

In order to apply for KAKENHI, researchers should perform the procedures, by accessing the "Electronic Application System"), he or she should retain the ID and the Password for e-Rad.

For this reason, the research institution should verify whether researchers who are scheduling to apply have an ID and a Password, or not.

In the case where there is a researcher who has scheduled to apply and who has neither ID nor Password, the research institution should provide him or her with an ID or password in accordance with the following procedure.

1) In order to provide the researcher with an ID and a Password, the research institution needs to have an ID and a Password for use of the research institution. If the research institution has not yet obtained them, it should first of all download a registration form from the e-Rad Portal Site, conduct a registration application in writing.

It takes approximately two weeks for the "ID and Password for use of the research institution" to arrive after registration application the "Application for Use of the Electronic Application System".

- Note 1 Please refer to "Advance Preparation when Using the System"

 (http://www.e-rad.go.jp/shozoku/system/index.html) on the e-Rad website for information on downloading the ID and password for e-Rad.
- **Note 2** Research institutions that already obtained an ID and a password for e-Rad issued do not need to obtain it again.
- **Note 3** It is not necessary to obtain an ID and a password for e-Rad for each research category of the KAKENHI.
- 2) After obtaining an ID and a Password for use of the research institution, the people in the research institution should provide this ID and password to the researcher who is planning to apply as a Principal Investigator. The ID and password for each researcher is issued through registration of the researcher information in e-Rad. Please refer to the "Manual for Research Institutions to which the Researchers Belong (for Research Institution Office Representatives and for Research Institution Office Workers, section "2. Researcher Information Management")" for information on the concrete way how to provide them.
 - **Note 1** Once the ID and the password for the researcher have been provided they can be used, even if the research institution changes.
 - **Note 2** Please be sure to obtain and use the latest version of the Operation Manual.
- (5) Submission of a "Self-Assessment Checklist on the Improvement of the System and Other Matters", based on the "Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards)"

The Research Institution that is applying for KAKENHI should set up a system for the management and audit of public research funds, based on the "Guidelines on the Management and Audit of Public Research Funds at Research Institutions", and should report on its state of implementation.

Therefore, the Research Institution (including research institutions which are already engaged in a continued research project funded with a KAKENHI) that is applying for KAKENHI should <u>submit</u>

a "Self-Assessment Checklist on the Improvement of the System and Other Matters", based on the "Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards)" to the Office of Research Funding Administration of the Promotion Policy Division of the Research Promotion Bureau of the Ministry of Education, Culture, Sports, Science and Technology (MEXT) by October 4 (Friday), 2013, using e-Rad. Please be advised that, in case the report is not submitted, applications of researchers who belong to the research institution in question in the electronic system will not be considered.

Moreover, if the checklist has already been submitted in April 2013 or later through e-Rad when applying for competitive funding or other kinds of funding that is allotted by the Ministry of Education, Culture, Sports, Science and Technology (MEXT) or by independent administrative legal entities under the control of the Ministry of Education, Culture, Sports, Science and Technology (MEXT), it is not necessary to submit it again.

When using e-Rad, one needs, an ID and a Password for use of the research institution.

With regard to the checklist submission method, checklist forms and other matters using e-Rad, the research institution should verify the text "Concerning the Form Files 'Self-Assessment Checklist on the Improvement of the System and Other Matters', based on the 'Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards)'" on the webpage of the Ministry of Education, Culture, Sports, Science and Technology (MEXT) (http://www.mext.go.jp/a_menu/kansa/houkoku/1301688.htm).

Moreover, the Office of Research Funding Administration of the Promotion Policy Division of the Research Promotion Bureau of the Ministry of Education, Culture, Sports, Science and Technology (MEXT) separately sent a notification by e-mail addressed to each research institution on July 11, 2013 (i.e. to the e-mail address of the office representative that has been registered in e-Rad) concerning the submission method of the checklist using e-Rad, forms and other matters. (This notification has also been put on the web page for inquiries as mentioned below.)

Note: After submission of the check list, the research institution may be requested to cooperate in field surveys on the state of the improvement of the system and other matters, conducted by the Ministry of Education, Culture, Sports, Science and Technology (MEXT) (including institutions allocating grants), if the need arises.

Please direct inquiries to:

(for inquiries concerning forms of the guidelines and submission)

Office of Research Funding Administration

Promotion Policy Division

Research Promotion Bureau

Ministry of Education, Culture, Sports, Science and Technology (MEXT)

e-mail: kenkyuhi@mext.go.jp

URL: http://www.mext.go.jp/a_menu/kansa/houkoku/1301688.htm

(for inquiries concerning the registration of the research institution in e-Rad)

Helpdesk of the Cross-ministerial Research and Development management system of the Ministry of Education, Culture, Sports, Science and Technology (MEXT)

Tel. 0120-066-877

(office hours: 9:00-18:00, except on Saturdays, Sundays, National Holidays and the New Year

Holidays (from December 29 until January 3))

URL: http://www.e-rad.go.jp/shozoku/system/index.html

(Time period when e-Rad is available for use)

Every day of the week, from 0:00 until 24:00 (in operation 24 hours a day, 365 days a year)

However, even during the above-mentioned time period, it may happen that the operation of e-Rad is disrupted or suspended, when maintenance and inspection is being carried out. If the operation is scheduled to be disrupted or suspended, this will be announced beforehand on the Portal Site.

(6) On the Submission of the Report on the Research Achievements

The research institution to which researchers belong has to collect and submit the reports on the research achievements. If the research institution has failed, without good reason, to submit the reports on the research achievements at the end of the research, it may happen that it is treated as indicated below. Therefore, it is the responsibility of the representative of the research institution to ensure that the report on the research achievements is submitted without fail.

No KAKENHI will be funded to researchers who do not submit the report on the research achievements at the end of the research, without good reason. Moreover, it may happen that the decision to grant KAKENHI to the researcher in question is cancelled, or that an order to return the grant is issued. It may also happen that information, such as the name of the research institution to which the researcher in question belongs and other data, is made public.

Furthermore, if researchers have failed, without good reason, to submit the scheduled report on the research achievements, then implementation of other KAKENHI due to be implemented in the same fiscal year will be suspended.

(7) Obtaining Sufficient Knowledge about the Contents of the Application Procedures

The research institution should beforehand disseminate the contents of the Application Procedures to

all the researchers on the campus. JSPS would especially like to request the dispersion of information on the items listed in the Application Procedures and the submission deadlines of application documents, in order to avoid potential misunderstandings.

Moreover, the Application Procedures are available on the section Grants-in-Aid for Scientific Research of the JSPS website (http://www.jsps.go.jp/j-grantsinaid/index.html). The website should be used as a reference.

2. Issues that Need to Be Verified When Compiling the Application Forms (Preparing the Proposal for Grant-in-Aid)

The contents of the Proposals for Grant-in-Aid should be verified in each research institution, and all the Proposals for Grant-in-Aid should be submitted to JSPS together. When doing so, special attention should be paid to the following points.

(1) Verification of the Eligibility to Apply

It should be verified whether the Principal Investigator, the Co-Investigator(s) (*kenkyū-buntansha*) and the Co-Investigator(s) (*renkei-kenkyūsha*) listed in the Proposal for Grant-in-Aid are persons who meet the requirements that are stipulated in the Application Procedures (see page 25), and also whether the researcher information is registered in e-Rad as "Eligible to Apply for KAKENHI".

Moreover, on this occasion, it should certainly be verified whether the researchers who apply are not persons who have been excluded from receiving KAKENHI, due to an inappropriate use of KAKENHI.

(2) Verification of the Registration of the Researcher Information in e-Rad

Regarding the registration (renewal) of the researcher information necessary when applying, the person in charge in the research institution to which the researcher belongs should perform the procedures using e-Rad.

Moreover, if there is any item, such as the institution, the position, or others, that needs to be corrected, even though he or she has already been included in the researcher list of the research institution, the applicant needs to register the correct information on the researcher list. Therefore, this should be verified.

(3) Verification of the Principal Investigator

The research institution should verify whether the Principal Investigator, the Co-Investigator(s) (*kenkyū-buntansha*), the Co-Investigator(s) (*renkei-kenkyūsha*) who have been listed in the the

Proposal for Grant-in-Aid prepared the Proposal for Grant-in-Aid, after verifying the section "II. Details of the Call for Proposals", which are laid down in the Application Procedures.

(4) Verification of the Written Consent of the Co-Investigator (kenkyū-buntansha)

For each Co-Investigator (*kenkyū-buntansha*) who has been listed on the Proposal for Grant-in-Aid, that the Principal Investigator prepared, the research institution should check the Written Consent of the Co-Investigator (*kenkyū-buntansha*) that the Principal Investigator collected.

(5) Verification of the Application Forms

Applicants should verify whether the application forms for grants-in-aid are in conformity with the prescribed format.

Moreover, the format and other matters of the application forms for each research category are as follows.

	Proposal for Gr	ant-in-Aid				
December of the control	First part	Second part				
Research category	Application information (to be entered in the website)	Project Description File				
Specially Promoted Research (New) (English Version)		S-1-1 (1)				
Specially Promoted Research (New) (Japanese Version)		S-1-1 (2)				
Specially Promoted Research (Continued)		S-1-2				
Scientific Research (S)		S-1-6				
Scientific Research (A) Research related to the screening panel for "General"		S-1-7				
Research related to the screening panel for "Overseas Academic Research"		S-1-9				
Scientific Research (B) Research related to the screening panel for "General"	To be entered in the electronic application system	S-1-7				
Research related to the screening panel for "Overseas Academic Research"	oceaome appreadon system	S-1-9				
Research related to the screening panel for "Generative Research Fields"		T-1-1				
Scientific Research (C) Research related to the screening panel for "General"		S-1-8				
Research related to the screening panel for "Generative Research Fields"		T-1-2				
Challenging Exploratory Research		S-1-10				
Grant-in-Aid for Young Scientists (A)		S-1-12				
Grant-in-Aid for Young Scientists (B)		S-1-13				

Continued Research Project (in the case of a major change in the research project)	S-1-14
--	--------

3. Submission and other matters of the Application Forms (Preparing the Proposal for Grant-in-Aid) Outline of the Electronic Application Procedures

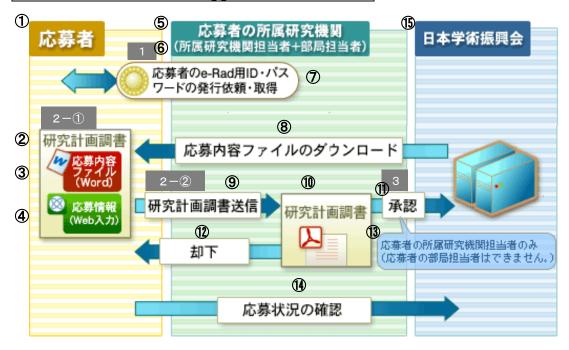

- (1) The research institution should access the "Electronic Application System", using the ID and the password for e-Rad, obtain the information of the Proposals for Grant-in-Aid (PDF files) that the Principal Investigators prepared, and verify their contents and other matters.
- (2) The research institution should perform the "approval" process on all the proposals for grant-in-aid (PDF files) that have no mistakes in their contents. (It should submit (send) the proposals for grant-in-aid (PDF files) to JSPS.) Moreover, it is not possible to make corrections or other modifications to the Proposal for Grant-in-Aid (PDF file) of each planned research for which the research institution has already performed the "approval" process.

The deadline for the submission (sending) of the proposals for grant-in-aid is:

November 8 (Friday), 2013, 4:30 pm (This deadline should be observed strictly.)

- **Note 1** Application documents that are submitted (sent) after this deadline will not be accepted. Therefore, the documents should be submitted (sent) well in advance.
- **Note 2** After the submission (sending) of the application documents, it is not possible to make corrections or to re-submit them.
- (3) The ID and the password which are used in the e-Rad are designed to verify the individual. Therefore, the handling and administration of them should be done carefully when carrying out the application procedures.
 - Moreover, an outline of the procedures for electronic application can be found below. However, for details on the "Electronic Application System", please refer to the "Operation Manual".

Outline of the Electronic Application Procedures

- 2 applicant
- 2 Proposal for Grant-in-Aid
- 3 Project Description File (Word)
- 4 application information (to be entered in the website)
- (5) the research institution to which the applicant belongs
- 6 person in charge in the research institution + person in charge in the department
- 7 request for issue and acquisition of the applicant's ID and password for e-Rad
- 8 downloading of the Project Description File
- 9 sending the Proposal for Grant-in-Aid
- 1 Proposal for Grant-in-Aid
- ① approval
- 12 rejection
- (3) only the person in charge of the research institution to which the applicant belongs (The person in charge of the department of the applicant cannot make an approval.)
- (14) confirmation of the state of the application
- (15) the Japan Society for the Promotion of Science (JSPS)

The person in charge of the research institution to which the applicant (Principal Investigator) belongs

The person in charge of the research institution to which the applicant belongs issues the ID and the password to the applicant.

The applicant (Principal Investigator)

2-(1) The applicant accesses the "Electronic Application System", -using the ID and the password

- he or she received, and prepares the Proposal for Grant-in-Aid (PDF file), by entering the application information (to be entered in the website) and by uploading the Project Description File (items in the attached file).
- 2-(2) If there are no mistakes in the Proposal for Grant-in-Aid (PDF file) the applicant prepared, he or she should submit (send) the Proposal for Grant-in-Aid (PDF file) to the person in charge of the research institution to which he or she belongs, by performing the "completed and submission" process.

The person in charge of the research institution to which the applicant (Principal Investigator) belongs

- By approving the Proposal for Grant-in-Aid (PDF file) the person in charge of the research institution to which the applicant belongs submits (sends) it to JSPS.
 - Moreover, if the Proposal for Grant-in-Aid (PDF file) that the applicant submitted is not approved due to mistakes or other reasons, it will be rejected and the applicant will be requested to make corrections.

(Reference 1) Screening Panels and Other Matters

1. Screening Methods, and Other Matters

The screening for KAKENHI is carried out by the Scientific Research Grant Committee of the Japan Society for the Promotion of Science (JSPS), and it is based on the application documents (Proposal for grant-in-aid).

The screening takes place behind closed doors. The submitted application documents are not returned to the applicants.

The "assessment rules" (Rules concerning the screening and assessment for Grants-in-Aid for Scientific Research, called "screening and assessment rules" below) are available on the section Grants-in-Aid for Scientific Research of the JSPS website (http://www.jsps.go.jp/j-grantsinaid/index.html).

(The "screening and assessment rules" for FY2013 will be posted on the JSPS website around early October.)

2. Notification of the Screening Results

(1) Specially Promoted Research

- 1) JSPS will issue a notification in writing on the results of the selection of the research projects for which an interview will be organized. (This is scheduled for March)
- 2) The Ministry of Education, Culture, Sports, Science and Technology (MEXT) will issue a notification in writing to the research institution on whether the research project has been selected or not, based on the results of the screening. (This is scheduled for early April.)
- 3) JSPS will issue a notification containing the opinions expressed in the screening results and a summary of the state of the screening to the Principal Investigator of the research project that has been selected. JSPS is also planning to make an outline of the opinions expressed in the screening results available to the general public. Moreover, to Principal Investigators who have not been selected a notification containing the approximate ranking among the research projects that have been screened, in addition to the opinions expressed in the screening results and a summary of the state of the screening, is planned to be issued.

(2) Research Categories Other than Specially Promoted Research

1) The results of the selection based on interviews on the proposed project for "Scientific Research (S)" will be notified to the research institution in writing (planned for March).

- 2) The results of the examination performed by the screening panels will be notified to the research institution in writing (planned for early April. for "Scientific Research (A/B/C) screening division "General" and "Overseas Academic Research" ", "Challenging Exploratory Research", "Grant-in-Aid for Young Scientists (A/B)", and for late May for "Scientific Research (S)" and "Grant-in-Aid for Young Scientists (S)" and for late July for "Scientific Research (B/C) screening division "Generative Research Fields"").
- 3) If researchers who applied for "Scientific Research", "Challenging Exploratory Research" or "Grant-in-Aid for Young Scientists (A/B)", and whose applications have not been accepted, wish to have the results of the first stage of the screening disclosed (document-based screening), the approximate ranking per research field (area) and the score (average score) and the "standard-format opinion" given by the judges of the screening committee for each element which is taken into account when rating will be disclosed through the electronic application system.

(Reference 2) Procedures on the Handling of Grants-in-Aid for Scientific Research(pre)

(Reference 3) Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research (KAKENHI (Series of Single-year Grants))(pre)

(Reference 4) Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research (KAKENHI (Multi-year Fund))(pre)

(Reference 5) State of Allocation of Grants-in-Aid for Scientific Research for FY2013 and Other Matters

1. State of Allocation of Grants-in-Aid for Scientific Research for FY2013

(1) New Projects As of April 2013

	Numbe	er of proposed p	projects		Amount alle	ocated per project
Research category	Applications	Applications approved	Approval rate	Amount allocated	Average	Maximum
Grants-in-aid for Scientific Research	# [86,874] 91,626	# [24,673] 25,151	% [28.4] 27.4	(1,000 yen) [56,640,420] 55,977,606 [16,686,450]	(1,000 yen) [2,296] 2,226	(1,000 yen) [34,400] 28,800

Publication of Scientific Research Results(*5)	[961] 1,031	[491] 437	[51.1] 42.4	[1,029,060] 939,600	[2,096] 2,150	[20,000] 12,700
Total	[87,835] 92,657	[25,164] 25,588	[28.6] 27.6	[57,669,480] 56,917,206 [16,686,450]	[2,292] 2,224	[34,400] 28,800

Notes:

- The figures in [] indicate the previous fiscal year.
 The figures in [] indicate indirect costs (excluded from the total).
- 3. (*1) No call issued in FY 2013 for projects in new or continuing areas. The only call issued is for projects that collate the results of research areas set to have ended in FY 2012.
- 4. (*2) Only new projects of continued area have been accounted for.
- 5. (*3) As a portion of these grants is covered under the multi-year Fund, the columns "Amount allocated" and "Amount allocated per project" are calculated based on the projects' initial plans for FY 2013.
- 6. (*4) As these grants are covered under the multi-year Fund, the columns "Amount allocated" and "Amount allocated per project" are calculated based on the projects' initial plans for FY 2013.
- 7.(*5) As applications under the categories "Strengthening International Dissemination of Information (A)" and "Open-Access Publication Support" are currently being screen these categories are not included within this amount, which covers only the categories "Publishing Scientific Research Results," "Strengthening International Dissemination of Information (B)," "Scientific Periodicals," Scientific Literature," and "Databases."
- 8. "Grant-in-Aid for Special Purposes" and "Special Grant-in-Aid for Encouragement of Scientists" are excluded.

- 1. This chart combines the figures for newly selected and continuing projects.
- 2. The figures in [] indicate the previous fiscal year.

 3. The figures in [] indicate the previous fiscal year.
- 4. (*1) Only continued projects have been accounted for.
- 5. (*2) Only new projects and continued projects of continued area have been accounted for.
- 6. (*3) No new projects are recruited in FY 2013.
- 7. (*4) Among these projects, there are new project that are partially covered under the multi-year Fund; their columns "Amount allocated" and "Amount allocated per project" are calculated based on the projects' initial plans for FY 2013.
- 8. (*5) Among these projects, there are new project covered under the multi-year Fund; their columns "Amount allocated" and "Amount allocated per project" are calculated based on the projects' initial plans for FY 2013.
- 9.(*6) As applications under the categories "Strengthening International Dissemination of Information (A)" and "Open-Access Publication Support" are currently being screened, these categories are not included within this amount, which covers only the categories "Publishing Scientific Research Results," "Strengthening International Dissemination of Information (B)," "Scientific Periodicals," Scientific Literature," and "Databases.
- 10. "Scientific Research on Innovative Areas (Research in a proposed research area) 'Support Activity in 3 Areas of Bioscience'", "Grant-in-Aid for Special Purposes" and "Special Grant-in-Aid for Encouragement of Scientists" are excluded.

Inquiries

- 1. Inquiries about the invitation of applications should be directed to the following divisions through the research institution.
 - (1) About the invitation of applications:

Research Aid Division I, Research Program Department, Japan Society for the Promotion of Science

Phone: 03-3263-4682, 4798, 1878,0964,4764,4796

KAKENHI (Series of Single-year Grants): Specially Promoted Research, Scientific research(S), Grant-in-Aid for Young Scientists (S)

Research Aid Division II, Research Program Department, Japan Society for the Promotion of Science

Phone: 03-3263-4254 (Specially Promoted Research)

03-3263-4388 (Scientific Research (S), Grant-in-Aid for Young Scientists (S))

KAKENHI (Series of Single-year Grants): Scientific research (A), all research projects, Scientific research (B), Grant-in-Aid for Young Scientists (A) projects adopted in FY2011 or before, Scientific research (C), Challenging Exploratory Research, Grant-in-Aid for Young Scientists (B) projects adopted in FY2010 or before

Research Aid Division I, Research Program Department, Japan Society for the Promotion of Science

Phone: 03-3263-1870, 4779,4758,0996,4724

KAKENHI (Multi-year Fund): Scientific research (C), Challenging Exploratory Research, Grant-in-Aid for Young Scientists (B) projects adopted from FY2011 onward

Research Aid Division I, Research Program Department, Japan Society for the Promotion of Science

Phone: 03-3263-1057, 1843,1845,1867,0992

KAKENHI (Partial Multi-year Fund): Scientific research (B), Grant-in-Aid for Young Scientists (A) projects adopted from FY2012 onward

Research Aid Division I, Research Program Department, Japan Society for the Promotion of Science

Phone: 03-3263-4758, 4779,0996,4724,1870

(2) For inquiries concerning the use of the JSPS electronic application system for projects funded by grants-in-aid for scientific research:

Call center: 0120-556-739 (toll-free)

* Available from 9:30 to 17:30 every day except Saturdays, Sundays and holidays and the New Year Holidays (from December 29 until January 3)

The following phone numbers are also available: 03-3263-1902, 1913

System Management Team, Policy Planning, Information and Systems Division, Administration Department, Japan Society for the Promotion of Science

(3) For inquiries concerning the use of the Cross-ministerial Research and Development management system (e-Rad):

e-Rad help desk: 0120-066-877 (toll-free)

- * Available from 9:00 to 18:00 except on Saturdays, Sundays, National Holidays and the New Year Holidays (from December 29 until January 3)
- * The following phone numbers are also available: 03-3455-8920

(4) For matters related to the "Self-Assessment Checklist on the Improvement of the System and Other Matters", based on the "Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards)":

Office of Research Funding Administration, Promotion Policy Division, Research Promotion Bureau, the Ministry of Education, Culture, Sports, Science and Technology (MEXT)

Phone: 03-6734-4014

(5) For matters related to "the Life Science Database":

National Bioscience Database Center, Japan Science and Technology Agency (JST)

Phone: 03-5214-5491

(6) For matters related to the "Inter-University Bio-Backup Project"

Inter-University Research Institute Corporation National Institutes of Natural Sciences, IBBP Center, Executive Office

Tel.0564-59-5930, 5931

2. The application guidelines can be viewed on the JSPS website.

Application forms can be downloaded from the following website.

JSPS's website on Grants-in-Aid for Scientific Research http://www.jsps.go.jp/j-grantsinaid/index.html [Japanese] http://www.jsps.go.jp/english/e-grants/index.html [English]
