Application Procedures for Grants-in-Aid for Scientific Research -KAKENHI-

FY2019

JSPS Research Fellows
【JSPS International Research Fellow】

January, 2019

Japan Society for the Promotion of Science
(https://www.jsps.go.jp/)
Introduction

This is the application procedure of “Grant-in-Aid” for Scientific Research-KAKENHI- for FY2019 “JSPS Research Fellows”[JSPS International Research Fellow] listing the necessary and other matters.

It consists of the following sections.

Ⅰ Details of the Call for Proposals
Ⅱ Preparation of the KAKENHI Application Form (Research Proposal Document)
Ⅲ Completion of Research Ethics Education Course and others
Ⅳ On the Handling of Research Projects Scheduled to be Continued in FY2019
Ⅴ Procedures to be Completed by the Research Institution
Ⅵ Other Relevant Issues

Section “Ⅰ. Details of the Call for Proposals” contains information on such aspects of the program as the Grant-in-Aid category, application eligibility, amount of grants, and research periods.
Sections “Ⅱ. Preparation of the KAKENHI Application Form (Research Proposal Document)”, “Ⅲ. Completion Research Ethics Education Course and others”, “Ⅳ. On the Handling of Research Projects Scheduled to be Continued in FY2019” and “Ⅴ. Procedures to be Completed by the Research Institution” contain information on the various procedures that must be carried out by JSPS International Research Fellows, their host researchers, and host research institutions.
This call for proposals opens before the finalization of the FY2019 budget so as to enable researchers to start their research as early as possible. Please be aware that, depending on the overall budget situation, details on the resources to be allocated and other matters may be subject to change at a later stage.

The major change in FY2019 program is described on the next page.
Major Changes for Call for Proposals in Fiscal Year 2019

(1) It is stipulated that publication of research achievements is the act of the researcher(s) themselves, as the research using the KAKENHI fund is conducted on the basis of the researcher(s)’ own initiative and responsibility. The output of KAKENHI research solely represents the researcher(s)’ view, and does not reflect that of the funding sector nor of the government. (see page 12)

(2) It is stipulated that the PI and Co-I(s) must understand and exercise the proper research practices in conducting their research, as well as to adhere to the “Code of Conduct for Scientists”. (see page 13)
# Table of Contents

I. Details of the Call for Proposals

1. Purpose
2. Recipients
3. Eligible Funding
4. Period of Grant
5. Application Eligibility (etc.)
6. Eligible Research Projects
7. Applying for Multiple Years
8. Budgets
9. Research Project and Plan
10. Submitting “Confirmation on the Application of the Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow) FY2019”
11. Restriction of Overlapping Applications
12. Appropriate use of KAKENHI (etc.)
13. “Guidelines on the Proper Implementation of Competitive Funding”
14. Dissemination of Research Achievements supported by KAKENHI
15. Code of Conduct for Scientists to Adhere

II. Preparation of the KAKENHI Application Form (Research Proposal Document)

1. Preparation of KAKENHI Research Proposal Documents
2. Points to Keep in Mind When Preparing the Grant-in-Aid Proposal
3. Application Method
4. Handling of Personal Information
5. Schedule after Submitting the Grant-in-Aid Proposal (plan)

III. Completion of Research Ethics Education Course and others

IV. On the Handling of Research Projects Scheduled to be Continued in FY2019

1. Handling of Research Projects Scheduled to Continue into FY 2019
2. Taking a Research Ethics Education Course

V. Procedures to be Completed by the Research Institution

1. Application-Related Procedures
3. Implementation of a Research Ethics Education Course based on the “Guidelines on Research Misconduct”
4. Others

VI. Other Relevant Issues

1. Concerning Support through Grant-in-Aid for Scientific Research on Innovative Areas - Platforms for Advanced Technologies and Research Resources
2. Concerning the Promotion of the Shared Use of Research Equipment
3. On the Promotion of the ‘Dialogue on Science and Technology with Citizens’ (A Basic Approach Policy)
4. Cooperation with the National Bioscience Database Center
5. On the Inter-University Bio-Backup Project
7. Registration of Researcher Information in Researchmap
8. Security Export Control Policy

The application forms (Research Proposal Document) and other application materials are contained in separate files. Please refer to “Supplementary Volume ‘Application Procedures for Grants-in-Aid for Scientific Research - KAKENHI - for FY2019 “JSPS Research Fellows” [JSPS International Research Fellow] (Forms / Procedures for Preparing and Entering a Research Proposal Document).”

* The application procedures, Research Proposal Document (output image) and other application materials can be downloaded from the JSPS website (cf. URL below).

1. Details of the Call for Proposals

1. Purpose
The Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow) comes under the Grants-in-Aid for Scientific Research (KAKENHI) Program. The grant supports excellent young researchers from other countries who have been selected for a JSPS Postdoctoral Fellowships for Overseas Researchers. It provides them with an opportunity to conduct joint research under the guidance of a Japanese host researcher at a Japanese university. While assisting the overseas researcher in advancing his/her own research, collaboration under this grant is also meant to contribute to the advancement of research in Japan and the Fellow’s country. The grant is issued to the host researcher.

2. Recipients
A research project that is carried out by host researcher who is eligible to apply for a Grant-in-Aid (KAKENHI) and who will carry out the project with a JSPS International Research Fellow. The research project is to employ an excellent concept expected to be advanced in the future.

3. Eligible Funding
The following six funding categories:

<table>
<thead>
<tr>
<th>Funding Category</th>
<th>Total Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Fellowship tenure: 24 months</td>
</tr>
<tr>
<td></td>
<td>Fellowship tenure: From 12 months to 24 months</td>
</tr>
<tr>
<td>Lab Research</td>
<td>Up to 2.4 million yen (Up to 1.2 million yen per each fiscal year)</td>
</tr>
<tr>
<td></td>
<td>Up to 1.2 million yen</td>
</tr>
<tr>
<td>Non-Lab Research</td>
<td>Up to 1.6 million yen (Up to 0.8 million yen per each fiscal year)</td>
</tr>
<tr>
<td></td>
<td>Up to 0.8 million yen</td>
</tr>
<tr>
<td>Special Research</td>
<td>Up to 3 million yen (Up to 1.5 million yen per each fiscal year)</td>
</tr>
<tr>
<td></td>
<td>Up to 1.5 million yen</td>
</tr>
</tbody>
</table>

* If JSPS International Research Fellows with less than a 24-month tenure extend their fellowship to 24 months, their host researcher is to prepare and submit a new research plan, applying for funding up to the per fiscal year amount stipulated in the subject funding category.

* The eligible amount applied of funding is ¥100,000 or more per one fiscal year.

* Application for this grant cannot be made if the Fellow’s tenure in the first fiscal year is four months or shorter, or if it is two months or less in the last fiscal year. Please refer to section 7. “Applying for Multiple Years” for details.
**“Lab Research” and “Non-Lab Research” are classified as follows.**

1. In the Panel Review Sections, “Humanities” and “Social Sciences” applications are, in principle, classified “Non-Lab Research.”

   However, if a Non-Lab project requires a budget that exceeds the allocated amount (e.g. for field work), the applicant is permitted to choose either “Lab-Research” or “Special Research.” (In such cases, the applicant must clearly describe the reason for choosing the other funding category.)

2. In the Panel Review Sections, “Mathematical and Physical Sciences,” “Chemistry,” “Engineering Sciences,” “Informatics,” “Biological Sciences,” “Agricultural and Environmental Sciences,” “Medicine Dental and Pharmacy” applications are, in principle, classified as “Lab-Research.”

### 4. Period of Grant

The period of the grant falls within the period of JSPS International Research Fellow’s JSPS Postdoctoral Fellowship tenure. Excluded, however, are tenures of four months or less in the first fiscal year of a newly applied for project or of two months or less in the last fiscal year of the project.

### 5. Application Eligibility (etc.)

#### (1) Applicant Eligibility

Persons applying under this application procedure must be the host researcher of a person selected for a JSPS Postdoctoral Fellowship for Research in Japan with more than four months of tenure in their fellowship’s first fiscal year. (Fellows under JSPS’s Short-term and Strategic programs are not eligible for this grant.)

#### (2) Research Team

In carrying out a research plan under the Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow) the host researcher becomes the Principle Investigator and the Fellow becomes the Co-Investigator. The Principle Investigator and Co-Investigator are stipulated as the members of funded project under the Law on the Improvement of Administration of the Budget for Grant-in-Aid (Law No.179, 1955).

1) **Principal Investigator (Host Researcher)**

   The Principal Investigator is a member of a funded project and is the researcher who assumes full responsibility for the implementation of the research project (including summarizing the research achievements).

   Under the KAKENHI program, it is not as a rule allowed to change Principal Investigators. In exceptional cases, if the host researcher of the JSPS International Research Fellow is changed, it is allowed to change the Principal Investigator in the Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow).

2) **Co-Investigator (JSPS International Research Fellow)**

   The Co-Investigator is a member of a funded research project, who engages in the research activity, collaborating with the Principal Investigator in carrying out the project, while sharing responsibility for its implementation as a KAKENHI-funded project.

   **KAKENHI funding is not provided to the Co-Investigator (JSPS International Research Fellow).**
6. Eligible Research Projects

The following projects are eligible for funding:

1) Research projects carried out jointly by a JSPS International Research Fellow who has received a provisional notice of selection in FY 2019 and his/her host researcher.

2) Research projects carried over from FY 2018 by a JSPS International Research Fellow within the period of his/her fellowship tenure and host researcher, but whose FY2019 Grant-in-Aid for JSPS Research Fellows has not for some reason been disbursed.

3) Research projects carried out by a JSPS International Research Fellow and his/her host researcher that started before FY 2018 and whose extension to 24 months was approved during the FY2018 or FY2019 fiscal year but whose KAKENHI grant for FY 2019 has not yet been provisionally approved.

Note: When the Grant-in-Aid for JSPS Research Fellow is disbursed in FY 2019, research funding cannot be increased during that fiscal year. When a fellowship extension to FY 2020 is approved but a provisional notice of grant disbursal is not received for FY 2020, please newly apply for the grant in the first FY2020 application call issued in January 2020.

* When applying for a project under 2) or 3) above, a new research plan must be submitted; therefore, it is necessary for the JSPS International Research Fellow to have a tenure of more than four months in FY 2019 (the first fiscal year).

7. Applying for Multiple Years

When the first fiscal year of a project will be more than four months and the second and/or following fiscal year more than two months, the total amount of funding applied for should be divided into fiscal-year periods.

However, when applying for multiple fiscal years, the sum of each fiscal year’s funding is not to exceed the “per fiscal year” amount stipulated in the above “3. Funding Categories.” The total amount for each fiscal year must be same as or smaller than that stipulated for the category in the “3. Funding Categories.”

(Ex.1) Fellowship tenure from October 1, 2019 to September 30, 2021 (Fellowship period: 24 months)

※ Application for funding cannot be made in FY 2021 because the period of tenure is 2 months or less.

8. Budgets

1) Eligible Costs (Direct Costs)

Eligible are the necessary costs for implementing the research plan (including for summarizing the research achievements). For concrete details, please refer to the Spending Rules, Section 2-2.

* In the case of a research plan that has in any fiscal year costs for such items as “Equipment costs,” “Travel expenses,” or “Personnel cost / Honoraria” that exceed 90% of the project budget, or in the case of “Miscellaneous expenses” costs in a research plan occupying a particularly large percentage of the budget in any single fiscal year, the applicant is to describe in his/her Proposals for Grant-in-Aid the reason why such costs are necessary for implementing the research project.

The use of direct funding should be thoroughly discussed between the Principal Investigator (host researcher) and Co-Investigator (International Research Fellow), bearing in mind that the purpose of the funding is to support the advancement of the Fellow’s research. It should be fully understood that this funding is allocated as necessary money for carrying out the Fellow’s research and, as such, is to be spent for things required by that research.

2) Ineligible Costs

The following costs are not included in the funding:

① Costs for buildings and other facilities (excluding the costs for minor installations that become necessary due to the introduction of articles purchased with direct funding)

② Costs for handling accidents or disasters that occur during the implementation of a funded project

③ Per diem in the domestic and overseas travel expenses of the Co-investigator (International Research Fellow)

④ Personnel expenditures and remunerations for the Principal Investigator and Co-Investigator

3) Important Points in the Use of KAKENHI Grants

The Grant-in-Aid for JSPS Research Fellows is funded under the KAKENHI Series of Single-year Grants. A research plan covering the entire research period is to be prepared and submitted along with the
grant application. After the research project is adopted, the project will be funded on a single-fiscal year basis during the research period, with the exception of the last fiscal year. This means, for example, that the grant may not be used to pay costs in a fiscal year outside the funded project’s current fiscal year.

When it is anticipated that the allocated grant money cannot be completely spent within a fiscal year owing to reason(s) unforeseeable at the time of grant disbursal, the money may be carried over into the next fiscal year by going through JSPS’s prescribed procedure. (The grant may only be carried over into the last fiscal year of a project when the fellowship continues into the following year and will be completed during that year.)

9. Research Project and Plan

The research project for which the Grant-in-Aid application is made must be the same as that in the application for the JSPS Postdoctoral Fellowship for Overseas Researchers or in the “Confirmation of Recommendation” (when nominated by an overseas nominating authority) (in Japanese).

The research plan for the Grant-in-Aid must coincide with the plan in the application form for the JSPS Postdoctoral Fellowship for Overseas Researchers. The purpose of each cost item is to be clearly articulated and rationally justified in the plan.

Also, a concrete annual plan needs to be prepared that includes each fiscal year of the project’s desired duration. It should be prepared in such a way that allows for the research results to be compiled and reported at the end of the project period.

10. Submitting “Confirmation on the Application of the Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow) FY2019”

After informing the JSPS International Research Fellow, who is the Co-Investigator, of the grant program’s purpose and system, the host researcher together with the Fellow is to prepare the research plan. After having the Research Fellow read and sign the “Confirmation on the application of the Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow) FY2019” (hereafter called the “Confirmation of Grant Application Form”), the host researcher submits the form to his/her affiliated research institution.

The research institution is to verify and maintain the Confirmation of Grant Application Form.

11. Restriction of Overlapping Applications

JSPS International Research Fellows are not eligible to apply for grants in other KAKENHI categories.

12. Appropriate use of KAKENHI (etc.)

(1) Rules pertaining to KAKENHI

KAKENHI (Series of Single-year Grants) are governed by the “Law on Optimizing Implementation of Budgets Relating to Subsidies” (Law No. 179, 1955), the “Procedures on the Handling of Grants-in-Aid for Scientific Research” (Announcement of the Ministry of Education, Culture, Sports, Science and Technology (hereafter called MEXT)), the “Procedures on the Handling of JSPS Grants-in-Aid for
(2) Appropriate use of KAKENHI

KAKENHI are funded by the tax of citizens and other sources, so please ensure that the KAKENHI is used efficiently and effectively, for example through planning for the communal use of purchased items. Researchers receiving the KAKENHI have a duty to comply with the related laws, regulations and utilization rules by researchers (subsidiary conditions or funding conditions), and also to use such grants appropriately. To ensure grantees comply with this requirement, we check whether no inappropriate use of KAKENHI will be made, when an application is made.

To facilitate the appropriate use of KAKENHI, research institutions to which the researchers belong are responsible for the management of KAKENHI. The Administrative work that each research institution is required to carry out (rules for use for institutions) is determined.

The research institutions are responsible for the appropriate accounting of KAKENHI. It is desirable, for example, to set up an accounting system for proper management of KAKENHI budget and expenditure, purchase order and delivery inspection, and internal auditing. To prevent improper business transactions, it is important, in addition to appropriate delivery inspections, to make all traders thoroughly informed of the KAKENHI rules and thus obtain cooperation of traders in the prevention of this kind of fraudulent accounting. Research institutions should take rigorous measures so as to eliminate business malpractice.

KAKENHI applicants and their institutions must have full understanding of the KAKENHI rules prior to the submission of their research proposals.

(3) Penalty for the case of infringement of related laws and regulations

If there have been serious falsehoods in the application documents, or violation of relevant laws, regulations and guidelines, the delivery of KAKENHI may be suspended or cancelled.

13. “Guidelines on the Proper Implementation of Competitive Funding”

The “Guidelines on the Proper Implementation of Competitive Funding” (agreement of the liaison meeting of related offices and ministries on competitive funding, dated September 9, 2005; amended June 22, 2017) states common understandings among the research-related ministries and offices in regard to allocation of competitive research funds, in terms of elimination of such inappropriate practices as unreasonable duplication and/or excessive overconcentration in the grant allocation, fraudulent acquisition and/or unlawful use of grants, and misconducts in research activities.

The implementation of the KAKENHI system as well as other competitive funding scheme follows the above-mentioned “Guidelines” and other related rules. Applicants are urged to take special notice of the following points.

(1) Elimination of Unreasonable Duplication and/or Excessive Overconcentration in the Grant Allocation

1) Towards elimination of “Unreasonable Duplication and/or Excessive Overconcentration” (*) of competitive funds, relevant information on funding applications are shared among the pertinent
ministries and funding agencies, making use of the Cross-ministerial Research and Development management system (e-Rad).

Therefore, applicants, when submitting more than one KAKENHI applications and/or other competitive grants, are urged to prepare their application documents with due care to clearly state the differences between the project to be submitted and his/her other projects so as to make it clear that they do not constitute unreasonable duplication.

In case a particular KAKENHI application is recognized as constituting a case of unreasonable duplication and/or excessive overconcentration, that application may not be granted.

2) Untruthful statement or misrepresentation of the status of applications and acquisitions of other KAKENHI grants and other competitive funds in the application form, may result in cancellation of grant or reduction of the research budget.

(*) Elimination of Unreasonable Duplication and Excessive Overconcentration in Grant Allocation

```
| Guidelines on the Proper Implementation of Competitive Funding | -Extract- (Agreement of the Liaison Meeting of Related Offices and Ministries on Competitive Funding, Dated September 9, 2005 (Revision: June 22, 2017)) |

2. Elimination of Unreasonable Duplication and/or Excessive Overconcentration in the Grant Allocation

(1) Basic Policy of the Unreasonable Reduplication and Excessive Overconcentration

① In the “Guidelines”, “Unreasonable Duplication” refers to a situation in which more than one competitive funds are unnecessarily and duplicative allotted to one and the same research project by one and the same researcher. Either of the following cases falls under “Unreasonable Duplication”.

○ Cases where simultaneous applications have been made to more than one competitive funds for substantially the same research project, and where these research projects are redundantly adopted.

○ Cases where an application has been made again for substantially the same research project as another project that has already been adopted, and for which the allotment of competitive funding has already been completed.

○ Cases where there is duplication in the use of research funds among more than one research projects.

○ Other cases corresponding to those above.

② In these guidelines, “Excessive Concentration” is a situation in which the entire research funds that are allotted to one and the same researcher or research group (hereinafter called “researcher, etc.”) in the fiscal year in question exceeds the limit within which they can be used effectively and efficiently, and in which the research funds cannot be used within the research period. Either of the following cases falls under “Excessive Concentration”.

○ Cases where, in the light of the abilities of the researcher, etc. and the research methods, etc., excessive research funds are allotted.

○ Cases where, in comparison with the effort (the time allocation rate (%) of time necessary for the implementation of the research activities with the entire working time of researcher) that is being allotted to the research project in question, excessive research funds are allotted.

○ Cases where the purchase of unnecessarily expensive equipment is carried out.

○ Other cases corresponding to the cases mentioned above.
```

(2) Dealing with “Improper Grant Spending”, “Fraudulent Grant Acquisition” or “Research Misconduct”

○ “Improper Grant Spending”, “Fraudulent Grant Acquisition” and “Research Misconduct” refer to the following type of acts respectively.

• “Improper Grant Spending”:
  Use of funds for other purposes, intentionally or by gross negligence, for example, by conducting fictitious business transactions (“azukekin”) with a trader through fictitious
order placements, or by charging costs higher than actually needed for personnel, travel expenses, etc., or use of funds in violation of the content of the funding decision or the conditions it implies

- **“Fraudulent Grant Acquisition”:** Receiving funds by deception or other fraudulent means, for example, by applying under the name of another researcher, or by making false entries in application documents

- **“Research Misconduct”:** Fabrication, Falsification, or Plagiarism of data, information, or findings published research achievements based on the intent of the researcher, or the failing of the researcher to fulfill the basic duty of care that he/she has.

1) **No KAKENHI will be offered, for a fixed period of time, when a researcher or related party has committed a improper grant spending of KAKENHI, has committed a fraudulent grant acquisition of KAKENHI, or has committed a research misconduct.** Moreover, for research projects for which it is established that an improper grant spending of grants, a fraudulent grant acquisition of grants or research misconduct has been committed, he/she may be required to return the given KAKENHI completely or partially.

Moreover, an outline of the improper grant spending of KAKENHI, the fraudulent grant acquisition of KAKENHI, and/or the research misconduct in question of the researcher who falls in those categories (containing an outline of the research achievements in the research institution, the names of the people involved, the name of the system, the institution they belong to, the research project, the budget, the fiscal year of the research, the fraudulent content, details of the measures taken, etc.) will be made public.

Also researchers who have committed a fraud, waste, abuse, or fraudulent grant acquisition of competitive funding other than the KAKENHI (including funds under the control of other ministries) etc., and/or has committed research misconduct by means of these competitive funds, and therefore are excluded from receiving these funds in question, for a fixed period of time, will not receive the KAKENHI for the fixed period of time.

Note: This applies to those schemes newly starting a call for proposals in FY2019 (and onward) for “competitive funding other than KAKENHI” as well. It also applies to those schemes that ended before FY2018. Refer to the website below for the schemes to which this specifically applies at present.

Period of KAKENHI suspension

Improper Grant Spending and Fraudulent Grant Acquisition of KAKENHI

<table>
<thead>
<tr>
<th>Extent of the improper grant spending</th>
<th>Period of KAKENHI suspension</th>
</tr>
</thead>
<tbody>
<tr>
<td>I. Researchers who committed improper grant spending of KAKENHI and researchers who conspired in such acts</td>
<td>1. Misappropriation of KAKENHI for personal gain</td>
</tr>
<tr>
<td>II. Researchers who committed improper grant spending of KAKENHI and researchers who conspired in such acts</td>
<td>2. Other than 1.</td>
</tr>
<tr>
<td></td>
<td>(1) Cases of major seriousness and maliciousness</td>
</tr>
<tr>
<td></td>
<td>(2) Cases other than (1) and (3)</td>
</tr>
<tr>
<td></td>
<td>(3) Cases of minor seriousness and maliciousness</td>
</tr>
<tr>
<td>III. Researchers who acquired KAKENHI by deception or other fraudulent means and researchers who conspired in such acts</td>
<td>-</td>
</tr>
<tr>
<td>IV. Researchers who were not directly involved in the improper grant spending of KAKENHI, but failed to exercise due care.</td>
<td>-</td>
</tr>
</tbody>
</table>

For cases judged as subcritical to the punitive suspension measures, sharp reprimand is administered to the individual(s) concerned.

The following cases are pertinent to the “sharp reprimand” penalty.

1. Among the cases II above, the researchers in case that the influence on society and the maliciousness of their conducts are judged to be insignificant and the amount of money involved is small.
2. Among the cases IV above, the researchers in case that the influence on society and the maliciousness of their conducts are judged to be insignificant.
“Research Misconduct”

<table>
<thead>
<tr>
<th>Individual Involvement in the Misconducts</th>
<th>Negative Impacts on Science and on Public at Large Degree of Maliciousness</th>
<th>Period of KAKENHI Suspension</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Particularly malicious individual(s) who, for example, had intention of research misconduct from the very beginning of the research</td>
<td>Cases where it is judged that the impact on the progress of the science in the field in question and the social impact are major, or the level of maliciousness involved in the acts is high</td>
<td>10 years</td>
</tr>
<tr>
<td>(b) Author(s) of paper(s), etc. related to the research in which research misconduct(s) have been identified (other than (a) above)</td>
<td>responsibly author(s) of the paper(s) in question (corresponding author, lead author or other authors bearing equivalent responsibilities)</td>
<td>5 to 7 years</td>
</tr>
<tr>
<td>(c) Individual(s) involved who are not the authors of the research paper(s) for which research misconduct(s) are identified.</td>
<td>Author(s) of the paper(s) in question other than the responsible author(s) described above</td>
<td>3 to 5 years</td>
</tr>
</tbody>
</table>

* In cases where specific issues for extenuation such as voluntary withdrawal of the paper in question may be taken into account, the suspension period can be shortened as judged fit.

2) The relevant information of each research misconduct case may be provided to the relevant offices and the office of research funding under the jurisdiction of Ministry of Education, Culture, Sports, Science and Technology (including independent administrative legal entities and other grant-allocating institutions) in charge of funding within such Offices and Ministries. Thereby the penalized researcher may be also subject to restriction in application of and/or participation to research projects in other competitive funds than the KAKENHI.

Note: “Applying and participating” means proposing new projects, applying, responding to call for proposals, newly participating to research as a person involved in collective research, etc. and participating as a Principal Investigator or a person involved in collective research, etc. in research projects in progress (continued projects).

3) If it is established that research misconduct has taken place in a research paper, report, or other research output funded by the KAKENHI, the researcher will be treated in the same way as stated in the above-mentioned 1) and 2). The severity of the research misconduct and other matters will be taken into consideration.

Moreover, a person who is determined to have a certain responsibility, because, for example, he or she neglected his/her duty of care as a person in charge of the paper, report, etc. in question, will be treated in the same way, even if it has not been established that he or she was directly involved in the research misconduct.
4) Research institutions are required to comply with the “Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards) (revised in February 2014), Ordered by the Minister of Education, Culture, Sports, Science and Technology” and “Guidelines for Responding to Research Misconduct (adopted August 26, 2014 by MEXT)”. Therefore, research institutions should pay adequate attention to these two sets of Guidelines when researchers implement their research activities.

- “Guidelines on the Management and Audit of Public Research Funds at Research Institutions”
  Cf. URL http://www.mext.go.jp/a_menu/kansa/houkoku/1343904.htm

- “Guidelines for Responding to Research Misconduct”
  Cf. URL http://www.mext.go.jp/a_menu/jinzai/fusei/index.htm

Note: Recent case examples of improper grant spending, fraudulent grant acquisition and research misconduct of KAKENHI.

- Improper grant spending
  • Someone instructed a trader to forge fictitious transaction pretending to have purchased expendables, made the university pay a KAKENHI for them, and then instructed the trader to keep the money as deposit for future use.
  • Someone instructed a trader to forge a fictitious transaction, obtaining a false invoice which carries item names different from those actually ordered and delivered, and then made the university pay a KAKENHI for them.
  • Someone instructed his/her students to submit false work attendance sheets, made the university pay a KAKENHI for them, and then kept the money as a pooled fund of his/her lab.
  • Someone visited destination not listed on the overseas travel itinerary, in order to have a meeting on cooperative research unrelated to the purpose of the KAKENHI research project.

(Note) The expenditure of the KAKENHI for fictitious and other transactions, like the ones mentioned in the case examples above, are all considered “misappropriation or misuse”, even if the expenditure was intended for the purpose of conducting the KAKENHI research project.

- Fraudulent grant acquisition
  • A researcher ineligible for the KAKENHI funding made application and acquired a KAKENHI grant.

- Research misconduct
  • Someone manipulated or forged experimental data or figures in a research paper published as research achievement supported by the KAKENHI.
  • Someone published in his/her KAKENHI achievement report an article which was a translation of an original research paper written in English with no prior consent from the author(s) nor proper quotation statement.

14. Dissemination of Research Achievements supported by KAKENHI

KAKENHI research achievements are made available to other researchers and to the general public, through posting of the “Research Outline” and the “Report on the Research Achievements” on the Grants-in-Aid for Scientific Research (KAKEN) database operated by the National Institute of Informatics.

To promote dissemination of research achievements, the KAKENHI can be used to cover such outreach-related expenses as preparation of website or printing of pamphlets. The KAKENHI grantees are urged to actively pursue public promotion of their research achievements through the aid of KAKENSO as so to make them widely known to the public at large.

In this connection, the KAKENHI grantees are encouraged to participate in the “HIRAMEKI ☆ TOKIMEKI SCIENCE” program run by JSPS, in which the latest science developments are presented to elementary, junior high and high school students in an easy-to-understand style.

In addition, please take note of the following issues as well.
(1) The acknowledgment for KAKENHI grant in research publications

When publishing research achievements of a KAKENHI project, researchers should be sure to express that the project has been supported by a KAKENHI grant, by stating in the “Acknowledgment” section of the paper the “JSPS KAKENHI Grant Number JP8 digits” in the case of English publication or “JSPS 科研費 JP8桁の課題番号” in the case of Japanese publication.

〈Example〉
【English】This work was supported by JSPS KAKENHI Grant Number JP18K45678.
【Japan】本研究は JSPS 科研費 JP18K45678 の助成を受けたものです。

(2) The implementation of the fair and conscientious research activities

The research using the KAKENHI should be carried out based on researcher’s own self-awareness and responsibility. Therefore the publication on the implementation of the research or research achievements, etc. should not come from the government request and the views and responsibilities on the research achievements should be attributed to the researchers themselves.

On the occasion such as researchers release the research achievements using the KAKENHI broadly to the public, the examples of the indication noting that the research achievements are based on the personal views are given below.

<Example>
【English】Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the author(s)’ organization, JSPS or MEXT.
【Japan】本研究の成果は著者自らの見解等に基づくものであり、所属研究機関、資金配分機関及び国の見解等を反映するものではありません。

(3) Promotion of “Open Access” to the research papers supported by KAKENHI grants

The Japan Society for the Promotion of Science (JSPS) endorses general policy of promotion of open access of publications of research results funded by public grants including KAKENHI. Note that open access is not mandatory if there are justifiable reasons for deferral such as copyright-related issues, or insufficient repository infrastructure at the research institution.

The open access implementation policy of JSPS is given on the following webpage:
URL: https://www.jsps.go.jp/data/Open_access.pdf

【Reference 1: What is “Open Access”】
Open access refers to the basic idea that research papers published in peer-reviewed journals, etc. should be made freely accessible by anyone.

【Reference 2: Different Routes to Open Access】
There are 3 main ways of open access implementation ((1) to (3) below)

(1) A way to make open the access to the article which is published in the conventional subscription fee type academic journal after a certain period (Embargo) (* 1) (for example 6 months later) by opening the final manuscript to an Institutional Repository ( * 2) established by the research institution to which the author belongs, or by opening the final manuscript to the website etc. established by the researchers (self-archiving) (* 3).
(2) A way to make the article open access by posting the article on the Web established by the research community or public institution

(3) A way to make the article open access immediately by paying the publication fee (APC: Article Processing Charge) by the author of the article

*1: “Embargo”
The predetermined period from the time of publication of an article in an academic journal to the time of release so that it can be posted on an online open access archiving system (repository).

*2: Institutional Repository
An online archiving system created by university or research institution for storage and dissemination of the intellectual products. Institutional repositories play important roles in the reform of academic information distribution by enabling the researchers register their own articles, such as the transmission of research and education achievements of the research institution, PR for both the research institution and the researcher, guaranteeing the accountability of research and education activities towards society, and the long-term conservation of intellectual products.

*3: Self-archiving
"Self-archiving” refers to online posting of articles published in academic journals, dissertations, or data by those other than the publisher, (the researcher or research institution) generally on their institutional repositories.

15. Code of Conduct for Scientists to Adhere
To ensure the quality of scientific knowledge and to gain trust of society on scientists and scientific communities, it is essential to exercise fair and conscientious research activities with the adherence to the code of conduct for scientists. Applicants must understand and practice the contents of both the statement “Code of Conduct for Scientists” (section I. “Responsibilities of Scientists”) by the Science Council of Japan and the booklet “For the Sound Development of Science - The Attitude of a Conscientious Scientist -” (especially section I “What Is a Responsible Research Activity?”) issued by the Japan Society for the Promotion of Science (JSPS). And also take note that upon the formal application for grant delivery, it shall be confirmed through the electric application system whether the Principal Investigator and Co-investigator(s) will have taken the research ethics education coursework, etc. (See page 17)
I Responsibilities of Scientists

(Basic Responsibilities of Scientists)

1 Scientists shall recognize that they are responsible for assuring the quality of the specialized knowledge and skills that they themselves create, and for using their expert knowledge, skills and experience to contribute to the health and welfare of humankind, the safety and security of society and the sustainability of the global environment.

(Attitude of Scientists)

2 Scientists shall always make judgments and act with honesty and integrity, endeavoring to maintain and improve their own expertise, abilities and skills, and shall make the utmost effort to scientifically and objectively demonstrate the accuracy and validity of the knowledge they create through scientific research.

(Scientists in Society)

3 Scientists shall recognize that scientific autonomy is upheld by public trust and the mandate of the people, understand the relationships between science, technology, society, and the natural environment from a wide-ranging perspective, and act in an appropriate manner.

(Research that Answers to Social Wishes)

4 Scientists shall recognize that they are responsible for answering to the wishes of society to investigate into truths and to achieve various issues. When using research funds that are to be provided for establishing the research environment and for conducting research scientists shall always recognize that such broad social expectations exist.

(Accountability and Disclosure)

5 Scientists shall strive to disclose and actively explain the roles and significance of their own research, evaluate the possible effects of their research on people, society and the environment as well as the changes that their research might engender, neutrally and objectively disclose the results of this evaluation, and build a constructive dialogue with society.

(Dual Use of Scientific Research Outcomes)

6 Scientists shall recognize that there exist possibilities that their research results, contrary to their own intentions, may be used for destructive actions, and shall select appropriate means and methods as allowed by society in conducting research and publicizing the results.

[“For the Sound Development of Science – The Attitude of a Conscientious Scientist –” by the Japan Society for the Promotion of Science (JSPS)]

(Japanese version (text version)) (“For the Sound Development of Science” Editorial Committee on JSPS)

* [https://www.jsps.go.jp/j-kousei/data/rinri.pdf](https://www.jsps.go.jp/j-kousei/data/rinri.pdf)
II. Preparation of the KAKENHI Application Form (Research Proposal Document)

1. Preparation of KAKENHI Research Proposal Documents

Grants-in-Aid for Scientific Research is a competitive funding intended to provide financial support for creative and pioneering research conducted by individual researchers. Therefore, the contents of the Research Proposal Document must be original planned by the applicant. In preparing Research Proposal Document, plagiarism and/or misappropriation of the research contents of others are strictly impermissible. Applicants must comply with research ethics.

The JSPS Electronic Application System is used to prepare and submit (transmit) Grant-in-Aid Proposals. (URL for Electronic Application System: http://www-shinsei.jsps.go.jp/kaken/index.html)

In preparing their Grant-in-Aid Proposals, Principal Investigators use the login ID and password for the e-Rad system issued by the host institution. The proposal should be prepared and sent (transmitted) to the host institution based on the “Supplement: FY2019 Application Procedures for Grants-in-Aid for JSPS Research Fellows (JSPS International Research Fellow) (Forms / Procedures for Preparing and Entering a Research Proposal Document).”

The research institution will compile all the Grant-in-Aid Proposals it received and send (transmit) them to JSPS. (Paper-based applications will not be accepted.)

Also, the Principal Investigator should have the Co-Investigator sign the “Confirmation of Grant Application Form” and then submit it to his/her affiliated research institution.

2. Points to Keep in Mind When Preparing the Grant-in-Aid Proposal

(1) The Grant-in-Aid Proposal may not be amended after the host institution has processed it and sent (transmitted) it to JSPS.

(2) Each year, errors are found in the entry of the requested grant amount. When entering the amount, be sure to do it in units of a thousand yen.

(3) For details regarding the use of the KAKENHI Electronic Application System, please refer to its Operation Manual (URL: http://www-shinsei.jsps.go.jp/kaken/index.html).

3. Application Method

The Principle Investigator must to submit (transmit) his/her Grant-in-Aid Proposal to his/her research institution by the deadline it sets. (The Grant-in-Aid Proposals may not be submitted (transmitted) directly to JSPS.)

After having the International Research Fellow sign the “Confirmation of Grant Application Form,” the host researcher is to submit the form to his/her affiliated research institution by the deadline it sets. If the Confirmation of Grant Application Form and the Grant-in-Aid Proposal cannot be submitted at the same time for such reasons as the Fellow not yet arriving in Japan, it will be okay to submit them to the host research institution as soon as the Fellow arrives.

Regarding the deadline for host institutions to submit their Grant-in-Aid Proposals to JSPS, please see page 24.
4. Handling of Personal Information

The personal information included in the Research Proposal Document will be used for the elimination of “unreasonable duplication and/or excessive concentration in the allocation of competitive funds” and for the appropriate funding of KAKENHI grants. (This includes providing the date to external contractor(s) in charge of electronic processing and management of the KAKENHI data.) The information included in the Research Proposal Document is to be provided to the e-Rad system. (The information will be supplied to the Cabinet Office through the e-Rad system. The applicant may be requested to cooperate in verification of the information and other related works.)

The information on the adopted KAKENHI projects (the title of research project, the name of PI, the grant money to be delivered, etc.) is categorized as “information planned to be made public”, as laid down in Article 5, paragraph 1, item 1 of the “Act on Access to Information Held by Independent Administrative Agencies” (Act No.140 of 2001). The information will be made public through press release materials, the database of Grants-in-Aid for Scientific Research (KAKEN) of the National Institute of Informatics, and other means.

5. Schedule after Submitting the Grant-in-Aid Proposal (plan)

The selection results for the Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow) will be notified by document to the host research institutions after the KAKENHI screening process is concluded. Grant amounts will be disbursed in units of ¥100,000.

The schedule (tentative) for issuing notifications of informal decision of grant disbursal is as follows:

Schedule for provisional grant decision (tentative):

First time: Late April, 2019(*)
Second time: Early July, 2019
Third time: Late July, 2019(*)
Fourth time: Early October, 2019
Fifth time: Mid October, 2019(*)
Sixth time: Mid November, 2019(*)
Seventh time: Early January, 2020

* Asterisks show times when provisional grant decisions are made for JSPS International Research Fellows. No-asterisk times (2, 4 and 7) are when provisional grant decisions are made for JSPS Research Fellows.
III. Completion of Research Ethics Education Course and others

Principal Investigators and Co-Investigators taking part in a research funded by the KAKENHI, are requested to have completed properly the following procedures including research ethics, by the time he/she submits the formal application for grant delivery of a newly adopted research project in the FY2019 Grants-in-Aid for Scientific Research, and upon the formal application for a grant delivery, it shall be confirmed through the electric application system whether they will have taken the research ethics education coursework, etc.

If a PI and Co-I completed the research ethics related procedures in the past, or has moved from the research institute at which he/she completed the procedure, he/she should check with the administrative section of his/her current institution for the validity of the procedure he/she conducted in the past.

[Actions to be taken by the Principal Investigator]

• The PI must either read through and learn the teaching materials by oneself concerning the research ethics education coursework such as “For the Sound Development of Science – The Attitude of a Conscientious Scientist” published by the Editorial Committee of the JSPS named “For the Sound Development of Science, the “e-Learning Course on Research Ethics [eL CoRE] or “APRIN e-learning program (eAPRIN)”, or attend a lecture on research ethics conducted by research institutes based on “Guidelines for Responding to Misconduct in Research (Adopted by the MEXT on August 26, 2014), by the time of the formal application for grant delivery.

• The PI must understand thoroughly and exercise the proper research practices in conducting their research, from amongst the contents of both the statement “Code of Conduct for Scientists-Revised Version-” by the Science Council of Japan and the booklet “For the Sound Development of Science -The Attitude of a Conscientious Scientist-” issued by the JSPS, by the time of the formal application for grant delivery.

• From each Co-Investigator-to-be, the PI must

① obtain a consent of participation in the research project as a Co-I through the electronic application system and also a consent expressing “the completion of a seminar attendance or other kinds of coursework relevant to research ethics by the time of the formal application for the grant delivery of the research project in question”, by the time of submitting (sending) the Research Proposal Document to the research institution which the PI belongs to, and;

② ascertain that the Co-I has actually completed the coursework such as an attendance at the lecture on research ethics by the time of the formal application for the grant delivery.

[Actions to be taken by the Co-Investigator]

• The Co-I must provide the PI with both a consent of the participation in the research project as a Co-Investigator via the electronic application system and a consent expressing “the completion of a seminar attendance or other kinds of coursework relevant to research ethics by the time of the formal application for the grant delivery of the research project in question”.
• The Co-I must either read through and learn the teaching materials by oneself concerning the research ethics education coursework such as “For the Sound Development of Science – The Attitude of a Conscientious Scientist” published by the Editorial Committee of the JSPS named “For the Sound Development of Science, the “e-Learning Course on Research Ethics [eL CoRE] or “APRIN e-learning program (eAPRIN)”, or attend a lecture on research ethics conducted by research institutes based on “Guidelines for Responding to Misconduct in Research (Adopted by the MEXT on August 26, 2014), and report the PI to the effect that he/she has done, by the time of the formal application for the grant delivery by the PI.

• The Co-I must understand thoroughly and exercise the proper research practices in conducting their research, from amongst the contents of both the statement “Code of Conduct for Scientists-Revised Version-” by the Science Council of Japan and the booklet “For the Sound Development of Science -The Attitude of a Conscientious Scientist-” issued by the JSPS, and report the PI to the effect that he/she has done, by the time of the formal application for the grant delivery by the PI.
IV. On the Handling of Research Projects Scheduled to be Continued in FY 2019

1. Handling of Research Projects Scheduled to Continue into FY 2019 (hereafter called “continuing research projects”)

For a continued research project, PI does not need to submit any application form afresh. However, he/she has to prepare and submit the necessary documents, including the form of the formal application for grant delivery, after receiving a notification of the provisional grant decision. However, for continuing projects under the Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow), there must, as a rule, be two months or more tenure left in the carried-over fiscal year for the principal investigator to be eligible to request a funding disbursal.

2. Taking a Research Ethics Education Course

Please check with your affiliated research institution for details on taking a research ethics education course.

When the Principal Investigator is changed in a FY2019 KAKENHI project, the new Principle Investigator is required to take a course in research ethics education before requesting funding disbursal. (When a funding disbursal decision has been made, the Principal Investigator should take the course before a "Notice of Change of the Host Researcher" is submitted to JSPS.) The course may be either reading the JSPS-edited book *For the Sound Development of Science—The Attitude of a Conscientious Scientist*, taking the “e-Learning Course on Research Ethics (eL CoRE),” completing the “APRIN e-leaning program (eAPRIN),” or participating in a session on Research Ethics Education based on the MEXT “Guidelines for Responding to Research Misconduct” at his/her host institution.
V. Procedures to be Completed by the Research Institution

1. Application-Related Procedures

The following procedures are to be carried out by the host research institution.

(1) Confirming applicants and Informing Them of the Application Guidelines

The research institution is to confirm the applicants for the Grant-in-Aid for JSPS Research Fellows (JSPS International Research Fellow) using the “List of Eligible Persons” on the menu of the JSPS Electronic Application System, and inform them of the contents of the application guidelines. (The List of Eligible Persons is updated in the morning of the first day of the period for submitting Grant-in-Aid Proposals (Please refer to page 24 “2. Submitting Application Documents, (2) Submittal (transmission) Periods”).

When carrying out applicant-related work, personal administering the JSPS International Research Fellow Program in each research institution must be careful to maintain confidentiality and prevent the leakage of any applicant information.

(2) Submission of a “Self-Assessment Checklist on the Improvement of the System” based on the “Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards)”

Because research institutions submitting KAKENHI applications must comply with the content of the “Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards)” (Revised on February 18, 2014) (hereinafter called “Guidelines”), they must set up a system of the management and audit for implementing the public research funds and report the state of implementation and other matters.

Therefore, “host research institutions which Principal Investigator applying for KAKENHI in FY 2019 belongs to” and “host research institutions which Principal Investigator of the continued research projects using KAKENHI are scheduled to belongs to in FY 2019” must submit a “Self-Assessment Checklist on the Improvement of the System and Other Matters,” prepared based on the Guidelines, to the Office of Research Funding Administration of the Promotion Policy Division of the Research Promotion Bureau of the MEXT by day before the deadline for submitting, using the proposal-Rad system.

Please be advised that, in case the report is not submitted, applications of researchers who belong to the research institution in question in the electronic system will not be considered. (Even if the “Self-Assessment Checklist on the Improvement of the System and Other Matters” based on the “Guidelines on public research expenses” or the “Checklist pertaining to the Current Status” based on “Guidelines for Responding Misconduct in Research” has been submitted, it takes approximately 2 weeks for researchers belonging to these research institutions before they are able to apply for KAKENHI.)

If the checklist has already been submitted in April 2018 or later through e-Rad when applying for competitive funding or other kind of funding that is allocated by the MEXT or by independent administrative legal entities under the control of the MEXT, it is not necessary to submit it again.
With regard to the checklist submission method, checklist forms and other matters using e-Rad, the research institution should verify over the text “Concerning the Form Files ‘Self-Assessment Checklist on the Improvement of the System and Other Matters’, based on the ‘Guidelines on the Management and Audit of Public Research Funds at Research Institutions (Implementation Standards)’” on the webpage of the MEXT.

(URL: http://www.mext.go.jp/a_menu/kansa/houkoku/1324571.htm)

Note 1: The final days of submittal periods are set based on the recruitment round. Please refer to page 24 “2. Submitting Application Documents, 2) Submittal Periods”

Note 2: When using e-Rad, ID and Password for the research institution are necessary

< Inquiries >

(Concerning forms of the guidelines and submission)
Office of Research Funding Administration, Promotion Policy Division, Research Promotion Bureau, the MEXT
e-mail: kenkyuhi@mext.go.jp
URL: http://www.mext.go.jp/a_menu/kansa/houkoku/1324571.htm

(Concerning the research institute e-Rad registration)
Helpdesk of the Cross-ministerial Research and Development management system of the MEXT
Telephone: 0570-066-877 (Navi Dial)
(Office hours: 9:00-18:00, except on Saturdays, Sundays, National Holidays and the New Year Holidays (from December 29 until January 3))
URL: https://www.e-rad.go.jp/organ/entry.html

(Time period when e-Rad is available for use)
(Monday to Sunday) 0:00 - 24:00 (in operation 24 hours a day, 365 days a year)
However, even during the above-mentioned time period, it may happen that the operation of e-Rad is disrupted or suspended, when maintenance and inspection is being carried out. If the operation is scheduled to be disrupted or suspended, this will be announced beforehand on the Portal Site

(3) Submission of the “Checklist pertaining to the Current Status” based on “Guidelines for Responding to Research Misconduct”

Based on the “Guidelines for Responding to Research Misconduct” (Adopted by the MEXT on 26 August 2014) (hereinafter referred to as Guidelines Research Misconduct), Research institutes applying for KAKENHI need to establish related provisions.

Furthermore, when applying for KAKENHI, from FY 2017 there is a need to submit a “Checklist pertaining to Current Status” based on the “Guidelines for Responding to Research Misconduct ” (hereinafter referred to as Checklist pertaining to the Current Status)

Therefore “host research institute to which the Principal Investigator of a new KAKENHI research project in FY2019 belongs” and “host research institutions to which the Principal Investigator of a research project that will continue to receive KAKENHI in FY 2019 will belong” need to submit the “Checklist pertaining to the Current Status” to the MEXT Science and Technology Policy Bureau, Knowledge Infrastructure Policy Division, Office for Promotion of Correct Research by 2 week before the deadline for submitting the Grant-in-Aid proposal.
Please note that if no submission is made, **the applications made by researchers belonging to said research institute cannot be admitted.** Even if both the “Checklist pertaining to the Current Status” based on the “Guidelines on Research Misconduct” and the “Self-Assessment Checklist on the Improvement of the System and Other Matters” based on the “Guidelines on public research expenses” are both submitted, it takes about 2 weeks from submission until researchers can apply for KAKENHI.

Furthermore, from MEXT’s 23 March 2018 communiqué onwards, when applying for competitive funding to MEXT or to an independent administrative institution under MEXT jurisdiction, if the checklists had been submitted at the time when applying for the grant using e-Rad, there is no need to resubmit them.

For information on the method and format for submitting the Checklists over e-Rad, please see the MEXT homepage: “(communiqué) Regarding the Submission of the “Checklist Pertaining to the Current Status” based on “Guidelines for Responding to Misconduct in Research” (Request) 10 February 2017.”

(.URL: [http://www.mext.go.jp/a_menu/jinzai/fusei/1405816.htm](http://www.mext.go.jp/a_menu/jinzai/fusei/1405816.htm))

Note 1: The final days of submittal periods are set based on the recruitment round. Please refer to page 24 “2. Submitting Application Documents, (2) Submittal Periods”

Note 2: When using e-Rad, an ID and password for research institution use is needed.

* Please note that while the “Checklist pertaining to the Current Status” is similar to the “Self-Assessment Checklist on the Improvement of the System and Other Matters” based on the “Guidelines on public research expenses” in that it use e-Rad for the submission, the submission destination is different so both checklists must be submitted.

**< Inquiries >**

(Concerning the format and submission of Guidelines on Fraudulent Acts)

* Differs from the contact information for public research expenses.

  Office for Promotion of Correct Research, Knowledge Infrastructure Policy Division, Science and Technology Policy Bureau, the MEXT

  e-mail: kiban@mext.go.jp

  URL: [http://www.mext.go.jp/a_menu/jinzai/fusei/index.htm](http://www.mext.go.jp/a_menu/jinzai/fusei/index.htm)

(Concerning the research institute on e-Rad registration)

  The Helpdesk of the Cross-ministerial Research and Development management system of the MEXT

  Telephone: 0570-066-877 (Navi Dial)

  (Office hours: 9:00-18:00, except Saturdays, Sundays, National Holidays and New Year Holidays

  (from December 29 until January 3))

(Time period when e-Rad is available for use)

  (Monday to Sunday) 0:00 - 24:00 (in operation 24 hours a day, 365 days a year)

  However, even during the above-mentioned time period, the operation of e-Rad may be disrupted or suspended, when maintenance and inspection is being carried out. If the operation is scheduled to be disrupted or suspended, this will be announced beforehand on the Portal Site
(4) Confirming Applicant Eligibility
Confirm whether the Principal Investigators and Co-Investigators indicated in the Grant-in-Aid Proposal possess the application eligibility stipulated in the application guidelines.
Also, confirm whether the Principal Investigators and Co-Investigators are classified as “Not eligible for receipt of funding” in FY 2019 due to having misused or fraudulently received KAKENHI and/or other competitive research funds or due to having committed acts of research misconduct.

(5) Verification with the Principal Investigators
The research institution should verify whether the Principal Investigator who have been listed in the Research Proposal Document have completed the Research Proposal Document, after confirming the description in the column “I. Details of Call for Proposals” in this Application Procedures for Grants-in-Aid for Scientific Research.

(6) Verifying the “Confirmation of Grant Application Form”
Verify whether the principal investigator indicated in the Grant-in-Aid Proposal had the co-investigator (JSPS International Research Fellow) read and sign the Confirmation of Grant Application Form.

(7) Confirm the Grant-in-Aid Proposals and Send Them to JSPS
After confirming and approving the Grant-in-Aid Proposals submitted by the principal investigators, send them to JSPS. Regarding confirmation and approval processing of Grant-in-Aid Proposals, please refer to the below Section 2. “Submitting Application Documents (Grant-in-Aid Proposal).”

(1) Confirmation and Approval of Grant-in-Aid Proposals
The research institution should access the “Electronic Application System”, using the ID and the password for e-Rad, obtain the information of the Research Proposal Document (PDF files) that the Principal Investigators prepared, and verify their contents and other matters.
The research institution should perform the “approval” process on all the Research Proposal Document (PDF files) that has no mistakes in their contents. (Completed to submit the Research Proposal Document (PDF files) to JSPS.) Moreover, it is not possible to make corrections or other modifications to the Research Proposal Document (PDF file) for which the research institution has already performed the “approval” process.
(2) Submittal (transmission) Periods

Information on eligible applicants (List of Eligible Persons) is updated in the morning on the first day of the Grant-in-Aid Proposal submission period.

If eligible applicants are not shown on the List of Eligible Persons, the research institution should contact JSPS by no later than one week before the last day of the subject application submission (transmission) round.

Regarding International Research Fellows whose tenure has been extended but their grant for FY 2019 or after has not been officially approved, a grant application should be submitted as close to the first day of the extended fellowship period as possible. When applying for an extension, therefore, timing as to when you actually want to use the funding should be taken into consideration.

Submittal Deadline: 16:30, the final day of each submittal period (strictly enforced)

*Research Proposal Document that is submitted after this deadline will not be accepted. Therefore, the documents should be submitted well in advance.

(3) Points to Keep in Mind

2) After the submission of the application documents, it is not possible to make corrections or to re-submit them. If after submission, errors are found in the entry of project duration or requested funding, no correction of them is allowed. Therefore, take sufficient care to be accurate in preparing your Grant-in-Aid Proposal before submitting (transmitting) it.

3. Implementation of a Research Ethics Education Course based on the “Guidelines on Research Misconduct”

Principal Investigators and Co-Investigators taking part in a new research project have to complete followings before the formal application for grant delivery.

- Either to read through and learn teaching materials such as a textbook “For the Sound Development of Science -The Attitude of a Conscientious Scientist-” (Editing Committee “For the Sound Development of
Science”, JSPS), the “e-Learning Course on Research Ethics (eL CoRE)”, the “APRIN e-learning program (eAPRIN)”, etc., or to attend a lecture on research ethics conducted by research institutes based on the “Guidelines for Responding to Misconduct in Research (issued on August 26, 2014 by the MEXT)” at their host institution.

- To understand thoroughly and to exercise the proper research practices in conducting their research, from amongst the contents of both the statement “Code of Conduct for Scientists -Revised Version-” by the Science Council of Japan and the booklet “For the Sound Development of Science -The Attitude of a Conscientious Scientist-” issued by the JSPS.

To that end, each research institution is requested to disseminate broadly what the researchers should consider, in conducting of their researches as well as carrying out an Ethics Education in Research Training Session based on the “Guidelines for Responding to Research Misconduct in Research”.

As JSPS Research Fellows are required to take the above research ethics education at the time of their selection, it is not necessary for them to take it again.

4. Others

(1) Notification of Changes in a Research Institution as Specified by the MEXT Minister in Article 2 of the “Procedure on Handling Grants-in-Aid for Scientific Research (MEXT notice)”

If changes are scheduled to be made in any of the below-listed three aspects of a research institution, the Scientific Research Division of MEXT’s Research Promotion Bureau is to be notified right away.

1) The abolition or breaking up of a research institution

2) A change in the name or address of a research institution or a change in its representative’s name

3) A change in the purpose of a research institution’s establishment, or in the content of its operation, or in its internal organization’s establishment rules and regulations, bylaws, acts of endowment, or other related aspects.

(2) Applying for a Grant-in-Aid for JSPS Research Fellow as Related to Hosting a JSPS Research Fellow

Regarding the KAKENHI program’s Series of Single-year Grants and Grant-in-Aid for JSPS Research Fellows as related to hosting a JSPS Research Fellow, please use the “Application Procedures for Grants-in-Aid for Scientific Research (KAKENHI), FY 2019, JSPS Research Fellow.”

VI. Other Relevant Issues

1. Concerning Support through Grant-in-Aid for Scientific Research on Innovative Areas—Platforms for Advanced Technologies and Research Resources

In order to respond effectively to the diverse needs of researchers of KAKENHI research projects, the Grant-in-Aid for Scientific Research on Innovative Areas—Platforms for Advanced Technologies and Research Resources forms a resource and technical support platform for research (hereinafter referred to as Platform) under the close cooperation of relevant institutes with inter-university research institutes and Joint Usage / Research Centers as core institutes. Together with providing technical support towards individual research projects and providing advanced
problem solving methods to researchers, it provides an integral promotion of cooperation between researchers, interdisciplinary integration, and human resources development.

Applications for technical support etc. are open for each of the platforms below where it concerns research projects carried out through KAKENHI. Researchers desiring technical support etc. from each of the platforms are requested to check their respective websites etc. and actively apply.

* “Technical Support etc.” points to the sharing of equipment with researchers from a wide range of research fields, technical support and the collecting, conservation, and providing of resources (documents, data, experiment samples, specimen, etc.), and support for conservation techniques etc.

“Advanced Technology Support Platform Program” has scientific value and an advanced nature through the combination of multiple facilities and equipment, and provides shared use of equipment and technical support to researchers in a wide variety of research areas.

“Research Platform Resource Support Program” Collects, conserves, and supplies the resources that are the basis of research (documents, data, experiment samples, specimen, etc.) and also conducts support for conservation techniques etc.

<table>

2. Concerning the Promotion of the Shared Use of Research Equipment

In “Reform of Competitive Research Funds: Towards a Sustained Output of Research Achievements (Interim Summary)” (June 24, 2015, Competitive Research Fund Reform Review meeting) it was decided that, when the original research objectives were fully achieved, versatile and large equipment should, in principle, be shared.

Furthermore, in “On the Management of Research Organizations and the Introduction of a New, Unified System for the Shared Use of Research Equipment” (November, 2015, Science and Technology Council Advanced Research Foundation Subcommittee), the establishment and operation of a “research equipment sharing system on the research organization level” (hereinafter referred to as equipment sharing system) is demanded of universities and national research and development agencies etc.

With this in mind, when purchasing equipment with competitive research funds, please actively work on the use of equipment purchased with other research funds, and the purchase and shared use of equipment from several research funds where it concerns especially large and versatile equipment. Please also make ensure that sharing is possible within the rules of the said competitive research funds, and no obstacle is made to the execution of the research project.

3. On the Promotion of the ‘Dialogue on Science and Technology with Citizens’ (A Basic Approach Policy)

In “On the Promotion of the ‘Dialogue on Science and Technology with Citizens’ (A Basic Course of Action)” ( Adopted by the Minister of State for Science and Technology Policy and the Experts of the Council for Science and Technology Policy on June 19, 2010) which has been compiled in June 2010, the activity in which researchers explain the content and achievements of their research activities to society and citizens in an easy-to-understand form is placed in the above-mentioned ‘Dialogue on Science and Technology with Citizens’. Researchers and other researchers who have received an allotment of public research funds amounting more than 30 million yen per year per
Universities and other research institutions are also requested to make positive efforts in order to ensure the proper implementation of the Dialogue on Science and Technology between Citizens, on the one hand, and researchers and other researchers who have received public research funds, on the other hand, for example, by setting up support systems.

For KAKENHI, there is the question “Are you positively trying to publicize and disseminate the research content and research achievements?”, especially in the research progress assessment of Specially Promoted Research, for which researchers receive a relatively high amount of research funds, and the interim assessment of Scientific Research on Innovative Areas (Research in a proposed research area). Therefore, based on the above-mentioned Basic Approach Policy, researchers should disseminate the achievements of research funded with KAKENHI to society and citizens in an even more positive way.

4. Cooperation with the National Bioscience Database Center

The National Bioscience Database Center (URL: https://biosciencedbc.jp/) has been established in the Japan Science and Technology Agency (JST, a National Research and Development Agency), in order to promote the integrated use of databases in the area of life science that have been created by various research institutions and other institutions.

This Center spurs the active participation of related institutions, and based on four pillars, namely (1) the planning of strategies, (2) creation and operation of portal websites, (3) research on and development of core technology for the integration of databases and (4) the promotion of the integration of biotechnology-related databases, it is promoting projects aiming at the integration of databases in the area of life science. In this way, through wide sharing and utilization in the researchers community of the research achievements in the area of life science produced in Japan, the Center aims at invigorating overall research in the area of life science, including research and development connected to basic research and industrial applied research.

JSPS would like to request researchers to cooperate by providing to the Center copies of raw data related to achievements published in research papers and other output in the area of life science, or copies of created open databases.

Moreover, the copies provided will be able to be utilized on a non-exclusive basis as reproductions, alterations, or in other necessary forms. Furthermore, JSPS would like researchers to understand in advance that, in response to requests of the institutions that received copies, it would also like request researchers to cooperate by providing all the information necessary for utilizing the copies.

Furthermore, the National Bioscience Database Center has developed guidelines for data on humans, in order to promote the sharing and use of data related to research in the area of life science, with due considerations to the protection of personal information.

5. On the Inter-University Bio-Backup Project

The purpose of the Inter-University Bio-Backup Project is to “back up” biological genetic resources, which are indispensable research resources in various research areas, and to avoid damage or loss of biological genetic resources due to unforeseen accidents, disasters, etc. The
project newly commenced from 2012.

In the National Institute for Basic Biology of the Inter-University Research Institute Corporation National Institutes of Natural Sciences, which is the core of this project, the IBBP Center (Inter-University Bio-Backup Project for Basic Biology) (URL: http://www.nibb.ac.jp/ibbp/) has been established as a backup center for biological genetic resources. It is equipped with the newest equipment necessary for the backup of biological genetic resources.

Any researcher who belongs to a university or a research institution may apply for storage. Biological genetic resources that can be stored in IBBP are samples that can be proliferated (amplified) or cryopreserved (for vegetable seeds, the refrigeration or deep-freezing preservation condition needs to be definite), and being not pathogenic is also a condition. Since backup is provided free of charge, researchers should make use of IBBP.

Any researcher who belongs to a university or a research institution may apply for storage. Biological genetic resources that can be stored in IBBP are samples that can be proliferated (amplified) or cryopreserved (for vegetable seeds, the refrigeration or deep-freezing preservation condition needs to be definite), and being not pathogenic is also a condition. Since backup is provided free of charge, researchers should make use of IBBP.

NBRP (National BioResource Project) strategically collects and preserves important bioresources that are the basic and foundation of life science research at the core bases of this project and provides them to universities and research institutes, thereby contributing to the development of life science research in Japan. In the future, in order to contribute to the development of life science research in Japan, it is necessary to continually collect useful bioresources.

For that matter, please deposit (*) available bioresources among bioresources developed by Grant-in-Aid for Scientific Research (limited to the bioresource targeted for NBRP). Please cooperate with the NBRP collecting activities.

It is recommended to utilize the already improved resources of NBRP from the viewpoint such as efficient implementation of research.

(*) Deposit: This is a procedure to approve the use (preservation / provision) in this project without transferring the various rights related to the resource. By specifying specific provision conditions in the deposit agreement, you can add usage conditions such as restrictions on usage and quotation of articles to users.

7. Registration of Researcher Information in Researchmap
“Researchmap” is, as a general guide to Japanese researchers, Japan’s largest researcher information database. Registered information on research results can be openly disseminated over the Internet. Researchmap is linked to e-Rad and many university faculty databases. As the Japanese government also plans to expand its use of researchmap, please be sure to register your information (as a researcher) on the site (https://researchmap.jp/).

< Inquiries >
National Institute of Advanced Industrial Science and Technology

8. Security Export Control Policy

In Japan, export controls (*) are carried out under the Foreign Exchange and Foreign Trade Act (Act No. 228 of 1949) (hereinafter referred to as “Foreign Exchange Law”). Therefore, in principle, in order to export (provide) cargo and technology regulated by the Foreign Exchange Law, it is necessary to obtain permission of the Minister of Economy, Trade and Industry.

(*) Japan's Security Export Control System established on the basis of international agreements mainly consists of ① “List rules” which require permission of the Minister of Economy, Trade and Industry in principle when exporting cargo or providing technology that carry specifications and/or functions higher than certain levels, such as carbon fiber and numerically controlled machine tool etc., and ② “Catch-all regulation” which requires permission of the Minister of Economy, Trade and Industry when exporting cargo or providing technology that are not subject to regulation under the List rules but do fall under certain regulatory requirements (application requirements, consumer requirements and/or informed requirements).

Not only export of cargo but also provision of technology will be subject to the regulation by the Foreign Exchange Law. When providing a “List rules” technology to nonresidents or providing it in a foreign country, prior permission for provision is required. "Provision of technology” includes not only providing technical information such as design drawings, specifications, manuals, samples, and prototypes via storage media such as paper, mail, CD, USB memory, but also providing work knowledge and technical assistance at seminars through technical instruction, skill training etc. Researchers should be aware that there may be case in which technologies subject to regulation by the Foreign Exchange Law are involved when mentoring foreign students and/or joint research activities with oversea groups.

For this reason, research institutions are asked to take systematic measures to ensure that in implementation their various research activities, including research projects funded with KAKENHI, WMD technologies are not transferred to WMD developers, terrorist organizations, or people carrying out other dubious activities by way of their participation in research that can be converted to military purposes.

(Reference 1) Screening Panels and Other Matters

1. Screening Methods and Other Matters

The review for the of KAKENHI is carried out by the Scientific Research Grant Committee of the Japan Society for the Promotion of Science (JSPS), and it is based on the Research Proposal Document. The review takes place behind closed doors. The submitted Research Proposal Document is not returned to the applicants.

The “details on assessment rules” (Rules concerning the screening and assessment for Grants-in-Aid for Scientific Research (called “review and assessment rules”)) can be checked in the Grants-in-Aid for Scientific Research section of the JSPS’s website (URL: https://www.jsps.go.jp/j-grantsinaid/index.html).

2. Notification of the Review Results

The results of the application screening for the Grant-in-Aid for JSPS Research International Fellows will be notified by document to the host research institutions on the following schedule. Grants amounts will be disbursed in units of ¥100,000.

Schedule for provisional grant decision (tentative)
First time: Late April, 2019(*)
Second time: Early July, 2019
Third time: Late July, 2019(*)
Fourth time: Early October, 2019
Fifth time: Mid October, 2019(*)
Sixth time: Mid November, 2019(*)
Seventh time: Early January, 2020

* Asterisks show times when provisional grant decisions are made for JSPS Research International Fellows. No-asterisk times (2, 4 and 7) are when provisional grant decisions are made for JSPS Research Fellows.

(Reference 2)
Procedures on the Handling of Grants-in-Aid for Scientific Research (omitted)

(Reference 3)
Procedures on the Handling of JSPS Grants-in-Aid for Scientific Research (KAKENHI (Series of Single-year Grants)) (omitted)

(Reference 4)
Spending Rules (Supplementary Conditions for FY2018) (omitted)
Inquiries

1. Inquiries about the invitation of applications should be directed to the following divisions through research institution.

(1) For inquiries concerning the Grant-in-Aid for JSPS Research Fellows:
Research Aid Division I, Research Program Department, Japan Society for the Promotion of Science
Phone: 03-3263-0976, 0980, 1041
FAX: 03-3263-9005

(2) For inquiries concerning JSPS Postdoctoral Fellowships for Overseas Researchers:
Overseas Fellowship Division, International Program Department, Japan Society for the Promotion of Science
Phone: 3-3263-3444, 3810
* Both (1) and (2) are available from 9:30 to 12:00 and from 13:00 to 17:00 every day except Saturdays, Sundays, national holidays, the New Year Holidays (from December 29 until January 3) and JSPS’s foundation anniversary day (September 21)

(3) For inquiries concerning the use of the KAKENHI Electronic Application System:
Call center: 0120-556-739 (toll-free)
* Available from 9:30 to 17:30 every day except Saturdays, Sundays, national holidays and the New Year Holidays (from December 29 until January 3)

The following phone numbers are also available: 03-1017, 1022, 1107, 1024
Institutional Research and Information Division, Policy Planning Department, Japan Society for the Promotion of Science

(4) For inquiries concerning the use of the Cross-Ministerial Research and Development Management System (e-Rad):
e-Rad help desk: 0570-066-877 (Navi Dial)
* Available from 9:00 to 18:00 except on Saturdays, Sundays, national holidays and the New Year Holidays (from December 29 until January 3)
* The following phone number is also available: 03-6631-0622

2. The Application Procedures can be downloaded from the following JSPS website.
