Lecture title (講演題目): (in English) Hydrology from Space: Overview of a career in the
physical sciences

Lecture summary (講演概要): The students were provided with a summary of my personal background and career, as well as early and current motivations for pursuing research in hydrology. The land water and energy budget equations were presented and the impact of humans on this natural budget discussed. Opportunities to measure the budget terms remotely from satellites were highlighted. The city of Las Vegas, NV, USA (Hoover Dam) was discussed as an example of unsustainable growth. Japan was shown to be the greatest global importer of "virtual water". The lecture included (2) 20-minute question and answer sessions.
