- Lecture title (講演題目): (in English) Chemistry changes the world: a green and bright future

(in Japanese)

- Lecture summary (講演概要): Please summary your lecture 200-500 words.

In this lecture, I talk about the chemistry history, development, and its future. Furthermore, I give some discussion about the capacity structure for the young students who want to be scientist, especially to be a chemist. At last, I talk about the organometallic catalysis, the Nobel Prize in catalytic chemistry in the last ten years, and Prof. Kambe's Lab catalysis and partial of my PhD work. And my personal relationship with Japanese chemist is also included. Finally, I answered some questions about my presentation. To my personal opinion, some of students and teachers may be benefited from this lecture.
