

## サイエンス・ダイアログ 実施報告書

1. 学校名・担当者氏名: 佐賀県立致遠館高等学校
2. 講師氏名: Vincent Jean Antoine LEBLAN
3. 同行者氏名: 山越 言
4. 実施日時: 平成24年9月28日 (土) 10:00~12:00
5. 参加生徒: 1年生 39人 普通科人文コース
6. 講演題目: Research on human and chimpanzee coexistence in Guinea, West Africa
7. 講演概要:

Dr. Lablan is a social scientist interested in primate ecology. Born and educated in France, He has already spent 10 months in Japan, at Kyoto University's Center for African Area Studies, where he has met other researchers working on social and ecological relationships to the natural environment.

Among primates, He focuses more specifically on chimpanzees. His interest for this species came through his initial studies in prehistory, when he compared the use of tools by the first human beings living in Africa 2 million years ago and present-day chimpanzees. Later on in his studies, and principally for geopolitical reasons, he had to abandon archaeological studies. He then turned to modern humans and chimpanzees, which allows him to study their coexistence in Guinean forest and savanna landscapes. Through pictures and videos, he will try to offer a concrete idea of the fieldwork and the questions which emerge from such research.
8. 使用言語: 英語
9. 講演形式:
  - (1) 講演時間 110分      質疑応答時間 10分
  - (2) 講演方法 プロジェクター使用による講演
  - (3) 通訳 同行者によるサポート(日本語・英語による説明)
  - (4) 事前学習時使用教材(事前学習を行った場合のみ)  
講師からの概要プリント・キーワードの確認
10. 学校からの支給経費(該当がある場合): なし
11. その他特筆すべき事項: なし
