サイエンス・ダイアログ 実施報告書

1. 学校名・担当者氏名: 佐賀県立致遠館高等学校
2. 講師氏名: Oscar Andres GOMEZ SALGADO
3. 同行者氏名: なし
4. 実施日時: 平成24年12月10日 (土) 14:00~16:00
5. 参加生徒: 1年生 120人 普通科人文コース
6. 講演題目: The pursuit of human security

7. 講演概要:

Through this lecture, He plans to present very briefly his personal and research background, as well as some insights from his present work as a Postdoctoral Fellow of the Japan Society for the Promotion of Science.

*His Background*

He was born in Bogotá, Colombia, South America, where He lived until March 2006. He graduated from Colombia's largest public university as a chemical engineer and then he worked as a public officer at the health department of Bogotá, the capital city. In those days he got involved in public policy and thus became interested on knowing more about the connection between politics, technology and development. Then he went to Tohoku University in Sendai, where he was introduced to the idea of human security. He researched about the four big pollution diseases of Japan in the master program and about the theory and practice of human security in the doctoral program. After the disaster in March 2011, he started a project about international relations and the earthquake, researching mainly about "foreigners" during the emergency period in Sendai.

*About human security*

Human security is the idea that security is not about the state and the military, but about people. Many of the threats that affect humans nowadays move across borders and cannot be dealt with only by the State. For example, last year triple disaster affected all the people in the area and beyond, without distinction—although not equally. Therefore, they need to reconsider the way they assess their security in order to guarantee protection for everybody. Human security is about putting people in the center when thinking about sustainable solutions.

*About his present research*

During the days after the earthquake in Tohoku, the world witnessed the strength and solidarity of the people in the region. Were foreigners part of it? Mostly yes, but the differences in the reaction offer precious lessons for Japan and the world. Some

of the lessons he is working on are related to:

- ▶ The difference between coastal areas and cities
- ▶ Is “foreigner” an appropriate category during disaster?
- ▶ Who are foreigners during disasters?
- ▶ The influence of Information and Communication Technologies during disaster
- ▶ What is the role of embassies and foreign organizations in relation to foreigners?

8. 使用言語: 英語

9. 講演形式:

(1) 講演時間 110分      質疑応答時間 10分

(2) 講演方法 プロジェクター使用による講演

---

(3) 通訳 なし

---

(4) 事前学習時使用教材(事前学習を行った場合のみ)

講師からの概要プリント・キーワードの確認

---

10. 学校からの支給経費(該当がある場合): なし

11. その他特筆すべき事項: なし
