- Lecture summary (講演概要): Please summary your lecture 200-500 words.
In the first part of my lecture (20 min) I shortly described my life as a researcher. I attracted students' attention on interesting topics such as the culture, history, or typical food of the countries I lived in. Then I introduced Physics (60 min), and in particular Quantum Physics, providing some qualitative examples of its most fascinating applications. The students seemed to be very interested in quantum superposition, quantum entanglement, quantum teleportation, quantum cryptography, and quantum computers. I encouraged them to ask questions at any time (both in Japanese and English), and I left 10 min for discussion at the end of the lecture.
