- Lecture title (講演題目): (in English) Science Dialogue Lecture: Australia and my research

(in Japanese) サイエンス・ダイアログ:オーストラリア、私の研究

- Lecture summary (講演概要): Please summary your lecture 200-500 words.  
I gave an introduction about Australia in general some information about the history and culture. Australia is a large island country with diverse environment and many unique plant and animal species. I then explained about why I became a researcher: I liked animals as a child, and at school I did well in maths, so I enrolled in a Bachelor of Animal Science at Sydney University. At university, I became interested in research and genetics and disease. Afterwards, I completed a PhD in koala immunology and genetics, before coming to Japan to do research in immunity and genetics in frogs. I gave an overview of Japanese frogs, and how many frog species in the world are affected by a deadly fungal disease.
