- Lecture title (講演題目): (in English) Prejudice

(in Japanese)

- Lecture summary (講演概要): Please summary your lecture 200-500 words.

My lecture was about prejudice; that is, the negative evaluations we make about other people who belong in different groups to our own. One example of prejudice is racism. To understand how prejudice works, scientists conduct experiments to see what is happening in our brains and minds. I conduct experiments using children and animals to better understand how prejudice develops and has evolved. This will ultimately allow us to know how prejudice arises and how it can be stopped.
