- Lecture title (講演題目): (in English) Mosses and its significance in environmental studies
(in Japanese)
- Lecture summary (講演概要): Please summarize your lecture 200-500 words.

I firstly talked about Spain and our Spanish culture and the big differences with Japanese society. I also asked some questions to know how much they know about Spain and Europe. Then, I start talking about mosses, mosses are a group of plants of small size and very primitive with great contribution in the society and specially in the environmental field of study, which is my field of study. Then I summarize the results of my experiments in a simple way. And finally we observed different kinds of mosses with the microscope, to show them the different morphology between different types of mosses.
