- Lecture summary (講演概要): My presentation contains two separate sections: In the first section I talk about my scientific background in a simple language. I explain about my bachelor, master and PhD degrees and how I select them and what was my motivation to select. I give some information about chemical engineering, mechanical engineering and energy engineering as my bachelor, master and PhD degrees, respectively. Why I select these fields was the next section. Then, I try to make students familiar with basic information of my research. The section was open to questions and they asked very interesting questions. Finally, I talk about what a researcher's life is like and what are the important factors that help me to become a researcher.

In the second section, I talk about Iran from different points of view. I talk about the geography of Iran and weather distribution. The foods and cookies were the next topic.

- Overall advice or comments to future participants in the program (今後の講師へのアドバイス):

The program is very interesting both for students and researchers. It gives the chance to the researchers to give their experiences of life and research to students. Furthermore, students could obtain some information about choosing their future major and field.
