- Lecture summary (講義概要): Please summarize your lecture within 200-500 words.

In my lecture, There totally had three parts.

First, I did a simple self-introduction, and introduced about my experience and country. I let them know about the special foods, view points, such as nightmarket and Taipei 101. Also, they told me, there is one student who will visit Taiwan soon.

Second, The students want to learn and improve their English. So, I taught the students how to improve their English, including listening to English music, radio, and watching the English learning video. English is the most important language in the world. I told them not just learning English for your business or job, it would make you unhappy for learning English. Learning English would colorful your life, and make you special feeling.

Third, I introduce them about the science what I study about; Light or Optics. Light is everywhere. I want to make the student interested in my lecture, so I give them some examples about the science of light, such as (1) why the light is blue, (2) why the sea is blue. Also, I taught them light could be the energy, not only focus on the solar cell. Everyday the light coming from the sun, and the vegetables and fruits absorbed it and grow up. Finally, we could eat them. It's also acts the light is energy.
