

FY2021 Inter-University Exchange Project Nagasaki University

Support for promoting the establishment of Asian Higher Education Community

【Name of project】(Adopted year: FY2021, (Type B①))
Asia Fisheries and Marine Environment Leaders Program

【Summary of Inter-University Exchange Projects】

The project “Asia Fisheries and Marine Environment (AFIMA) Leaders Program” aims to establish a collaborative exchange program among marine and fisheries universities in Japan, China, Korea, and Malaysia, surrounding the East China Sea and the South China Sea, which are among the world’s largest fishery fields.

The program will foster highly-skilled human resources who can contribute to the realization of a sustainable marine environment and fisheries in Asia.

【Summary of Exchange program】

Double degree program (Japan, China and Korea)

Supervised by professors from two universities

Master's degrees awarded

One-year stay at an overseas university

Hybrid medium-term student exchange program

Exchange among Japan, China, Korea and Malaysia

2 months of trip + 1 month of online lecture (before and after trip)

【Global Human Resource on the project】

This project aims to foster highly professional human resources who are conversant with diversity of Asian countries and are able to co-create solutions to recover fisheries resources and marine environments for sustainable use of the bounty from the Asian ocean, where climate change and human activities are progressively damaging sustainability.

【Feature on the project】

Double Degree Program among Japan, China, and Korea

Professors at the three universities will provide unified lecture series related to “Sustainable Marine Environments and Fisheries”. Graduate students will be supported by the faculty members of the two paired universities to finish their degree thesis in English.

Medium-term Exchange Programs in Japan, China, Korea, and Malaysia

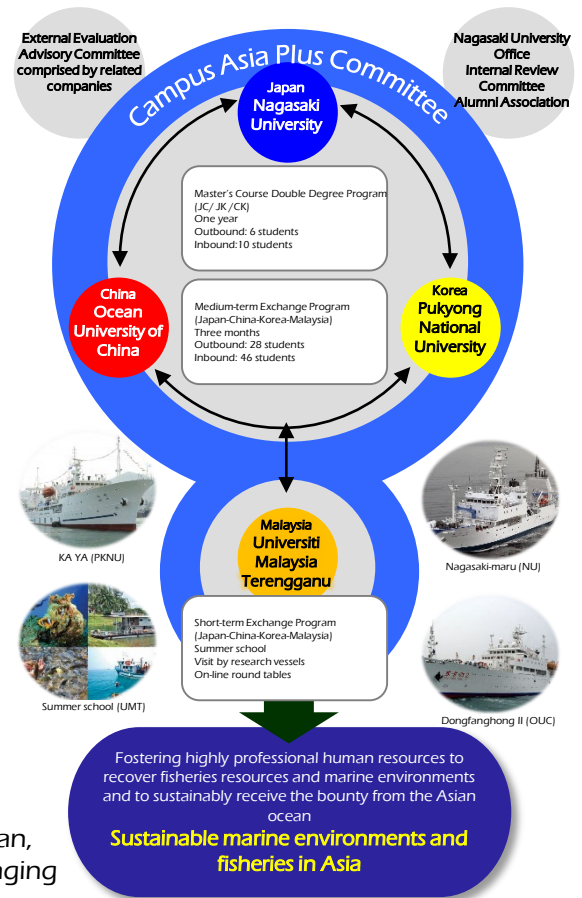

The programs will include on-line and face-to-face lectures in English, summer seminars, practical training at the marine research institute, and workshops at aquaculture and marine-related companies will be attended by both faculty and graduate school students.

The Japan-China-Korea Fisheries Training Vessel Visit and Research Exchange Meeting

Mutual visits by fisheries training vessel, research exchange meetings, and special sessions at the international academic conferences will be planned to facilitate international researcher exchanges and research development.

【Exchange number】

		2021	2022	2023	2024	2025
Out bound	Students studying abroad	0	0	0	0	0
	Students taking online international education and exchange programs in their home countries	0	0	0	0	0
	Students fulfilling both of the above requirements	0	6	8	10	10
In bound	Students studying abroad	0	0	0	0	0
	Students taking online international education and exchange programs in their home countries	0	0	0	0	0
	Students fulfilling both of the above requirements	0	6	12	18	20

1. FY2021 Progress

【Asia Fisheries and Marine Environment Leaders Program】(Adopted year: FY2021)

Exchange Programs

〈 Notice of on-line seminar in February 〉

We held an on-line exchange event in February, in which 18 graduate students from four universities participated. Special lectures on sustainable ocean environments and fisheries and short introduction by students were presented, which became the starting point of nourishing international human resources of this program.

To prepare for dispatch / acceptance of students, which will be started in FY 2022, we successfully held an exchange events among the four universities. We will continue to constantly hold similar events to motivate potential candidate students for the program.

Student-Mobility

○ Outbound

Students will be sent from FY 2022

○ Inbound

Students will be accepted from FY 2022

	2021	
	Plan	Results
Outbound	0	0
Inbound	0	0

Forming the University Network with Quality Assurance

Developed internal regulations on Nagasaki University Administration Committee

Held meetings of Administration Committee and Internal Review Committee

Shared information on the curriculum and classes of short-term program and double-degree program, which will be conducted from FY 2022 and FY 2023, respectively, with Ocean University of China and Pukyong National University at on-line meetings

Promotion of Student-Mobility Environment

Installed lecture streaming systems for the hybrid curriculum, which will enable efficient interaction among the students and lectures both in Japan and in other countries

Internationalization of the university, Information disclosure and Publication of outcome

Launched a website of the program (<https://www.campus-asia.com/>)

Printed brochures of the program (1000 copies) to distribute in the student orientation events

Displayed promotion slides of the program on digital signages installed at the entrance of the university buildings.

Good Practices

Held an on-line exchange event, in which 18 graduate students from four universities participated. During the event, Special lectures on sustainable ocean environments and fisheries and short introduction by students were presented
